On a trip to the Holy Land, Rabbi Small is drawn into a deadly conflict between religious extremists in the New York Times–bestselling series. Retired millionaire Barney Berkowitz, from the small Massachusetts town of Barnard's Crossing, invites Rabbi David Small to come to Israel and bar mitzvah him, as Berkowitz never went through the ceremony in his youth. On what should be a joyous occasion—and an all-expenses-paid trip to the Holy Land—the rabbi discovers danger lurking in every corner and a conspiracy that threatens to destroy the state of Israel. An innocent American has been murdered and when the sleuthing rabbi begins his investigation, he finds the death may have been part of an international conspiracy fueled by religious radicals and an arms-smuggling scheme. Anyone, from a liberal Jewish-American professor to a young religious fundamentalist, could be a suspect—and the rabbi must rely on his Talmudic logic and daring chutzpah to untangle the mystery and prevent an even more deadly attack.

By the author of Rosemary's Baby, a horrifying journey into a future only Ira Levin could imagine. Considered one of the great dystopian novels—alongside Anthony Burgess's A Clockwork Orange and Aldous Huxley's Brave New World—Ira Levin's frightening glimpse into the future continues to fascinate readers even forty years after publication. The story is set in a seemingly perfect global society. Uniformity is the defining feature; there is only one language and all ethnic groups have been eugenically merged into one race called "The Family." The world is ruled by a central computer called UniComp that has been programmed to keep every single human on the surface of the earth in check. People are continually drugged by means of regular injections so that they can never realize their potential as human beings, but will remain satisfied and cooperative. They are told where to live, when to eat, whom to marry, when to reproduce. even the basic facts of nature are subject to the UniComp's will—men do not grow facial hair, women do not develop breasts, and it only rains at night. With a vision as frightening as any in the history of the science fiction genre, This Perfect Day is one of Ira Levin's most haunting novels.

"Mr. Harrison's perceptions are jagged and cutting . . . a remarkably well-plotted story."—Christopher Lehmann-Haupt, *The New York Times* The New York Times bestselling author of thirty-nine books of fiction, non-fiction, and poetry—including *Legends of the Fall*, *Dalva*, and *Returning to Earth*—Jim Harrison was one of our most beloved and acclaimed writers, adored by both readers and critics. His novel *A Good Day to Die* centers on an unlikely trio: a poet with a tendency to lapse into beatific reveries of superb fishing in cold, fast streams; a Vietnam vet consumed by uppers, downers, and violence; and a girl who loved only one of them—at first. With plans conceived during the madness of one long drunken night, the three of them leave Florida, driving west to buy a case of dynamite, determined to save the Grand Canyon from a dam they believe is about to be built. *A Good Day to Die* is an unrelenting tour de force, and a dark exploration of what it means to live beyond the pale in contemporary America.

The true story of how a renowned writer's struggle with mood storms led her to try a remedy as drastic as it is forbidden: microdoses of LSD. Her revealing, fascinating journey provides a window into one family and the complex world of a once-infamous drug seen through new eyes. When a small vial arrives in her mailbox from "Lewis Carroll," Ayelet Waldman is at a low point. Her moods have become intolerably severe; she has tried nearly every medication possible; her husband and children are suffering with her. So she opens the vial, places two drops on her tongue, and joins the ranks of an underground but increasingly vocal group of scientists and civilians successfully using therapeutic microdoses of LSD. As Waldman charts her experience over the course of a month--bursts of productivity, sleepless nights, a newfound sense of equanimity--she also explores the history and mythology of LSD, the cutting-edge research into the drug, and the byzantine policies that control it. Drawing on her experience as a federal public defender, and as the mother of teenagers, and her research into the therapeutic value of psychedelics, Waldman has produced a book that is eye-opening, often hilarious, and utterly enthralling.

In 1955, former nightclub manageress Ruth Ellis shot dead her lover, David Blakely. Following a trial that lasted less than two days, she was found guilty and sentenced to death. She became the last woman to be hanged in Britain, and her execution is the most notorious of hangman Albert Pierrepoint's 'duties'. Despite Ruth's infamy, the story of her life has never been fully told. Often wilfully misinterpreted, the reality behind the headlines was buried by an avalanche of hearsay. But now, through new interviews and comprehensive research into previously unpublished sources, Carol Ann Lee examines the facts without agenda or sensation. A portrait of the era and an evocation of 1950s club life in all its seedy glamour, *A Fine Day for a Hanging* sets Ruth's gripping story firmly in its historical context in order to tell the truth about both her timeless crime and a punishment that was very much of its time.

Five stories about George and Martha, two hippopotamuses who are very best friends.

Adam Watson's interest in snow began at 7, the Cairngorms at 9, mountaineering and ski-mountaineering in later boyhood. His book recounts many fine days on the hill in Scotland, Iceland and northern Scandinavia on foot or ski, often on his own in wonderful places that excited him beyond measure. He tells what it was like to be with four remarkable Scots who greatly influenced him as a young naturalist and mountaineer, Seton Gordon, Bob Scott o the Derry, Tom Weir and Tom Patey. The beauty and variety of the hill, the weather and the wildlife were and are an inspiration to him, and his descriptions touch on this. In these modern times of pervasive regulation and politically correct control, this book is a breath of fresh air as a proclamation of the value and wonder that are the greatest joys of lone exploration on the spur of the moment. Author Adam Watson, BSc, PhD, DSc, DUniv, raised in lowland Aberdeenshire, is a retired research ecologist aged 80. He began lifelong interests on winter snow in 1937, snow patches in 1938, the Cairngorms in 1939. A mountaineer and ski-mountaineer since boyhood, he has experienced Scotland, Iceland, Norway, Sweden, mainland Canada, Newfoundland, Baffin Island, Finland, Switzerland, Italy, Vancouver Island and Alaska. His main research was and is on population biology, behaviour and habitat of northern birds and mammals. In retirement he has contributed 16 scientific publications on snow patches since 1994. He is a Fellow of the Arctic Institute of North America, Centre for Ecology and Hydrology, Royal Meteorological Society, Royal Society of Edinburgh, and Society of Biology. Since 1954 he has been a member of the Scottish Mountaineering Club and since 1968 author of the Club's District Guide to the Cairngorms. This book is testimony to the idea that

Exploring for yourself by your own free will, without formal courses or training, is the best joy the hills can give (my Preface, *The Cairngorms*, 1975). Now I would add 'without detailed planning', for my best days have been lone trips begun without such planning, indeed on the spur of moment and weather, almost chance events. Four chapters salute Scots to whom I owed much as a young naturalist and mountaineer, Seton Gordon, Bob Scott, Tom Patey and Tom Weir. They held to the above idea. Reading Seton Gordon's *Cairngorm Hills of Scotland* in 1939 changed my life. I wanted to be in these hills at all seasons. Exploration by one's own free will is best pervaded by humility and wonder. Alien to this are avalanche alerts, 'challenge' walks, 'character-building', courses, Duke of Edinburgh Awards, guided walks, hill-runs, interpretive boards, marker cairns, outdoor centres, qualifications, rangers, route-cards, school outings, signposts, sponsored walks, tests of snowpack stability, text messages sent as avalanche alerts to mobile phones, transceivers, visitor centres, 'walk of the day', wardens, and 'wilderness walks'. Also alien are Munros, Corbetts and other anthropocentric designations, those who 'bag' them as if hills were shot birds, and assault, attack, battle, conquer, conquest, fight, vanquish and victory as if hills were enemies. Many with flashing camera, global positioning, map, compass, mobile phone, and survival equipment are unsafe, as rescue accounts often reveal. Even climbers have been rescued after neglecting navigation on easy ground after completing rock climbs or ice climbs. Those who behave as if alone on an icecap when nobody else knows where they are and no help is possible, have greater inherent safety. They are also more likely to understand and appreciate the hill and its weather, snow, wildlife and indigenous folk.

As Passover approaches, Rabbi Small contends with infighting, backstabbing, and an actual murder in this New York Times bestseller. As Rabbi David Small's 5-year contract winds down at the synagogue in Barnard's Crossing, Massachusetts, some members of the congregation are plotting to remove him; others are whispering about starting a new temple of their own across the street. When the rabbi gets an invitation to perform Passover services at a local university, he's eager to get away from the bickering and spend a few days on campus. But instead of peace and enlightenment, he finds a murder wrapped up in drug deals and racial tensions. From tuned-out hippies to political zealots, the college is full of potential suspects. Once again it's up to the rabbi to draw on his deductive skills to solve the case—and avoid getting sucked into the bitter culture war—before the killer strikes again.

From the New York Times bestselling author Darynda Jones comes the second novel in her laugh-out-loud *Sunshine Vicram* mystery series, *A Good Day for Chardonnay*.

Running a small-town police force in the mountains of New Mexico should be a smooth, carefree kind of job. Sadly, full-time Sheriff—and even fuller-time coffee guzzler—Sunshine Vicram, didn't get that memo. All Sunshine really wants is one easy-going day. You know, the kind that starts with coffee and a donut (or three) and ends with take-out pizza and a glass of chardonnay (or seven). Turns out, that's about as easy as switching to decaf. (What kind of people do that? And who hurt them?) Before she can say iced mocha latte, Sunny's got a bar fight gone bad, a teenage daughter hunting a serial killer and, oh yes, the still unresolved mystery of her own abduction years prior. All evidence points to a local distiller, a dangerous bad boy named Levi Ravinder, but Sun knows he's not the villain of her story. Still, perhaps beneath it all, he possesses the keys to her disappearance. At the very least, beneath it all, he possesses a serious set of abs. She's seen it. Once. Accidentally. Between policing a town her hunky chief deputy calls four cents short of a nickel, that pesky crush she has on Levi which seems to grow exponentially every day, and an irascible raccoon that just doesn't know when to quit, Sunny's life

is about to rocket to a whole new level of crazy. Yep, definitely a good day for chardonnay. Praise for the Sunshine Vicram series "Laugh-out-loud funny, intensely suspenseful, page-turning fun."--New York Times Bestselling author Allison Brennan "A Bad Day For Sunshine is a great day for the rest of us."--New York Times bestselling author Lee Child
