"I had the good fortune to grow up in a wonderful area of Jerusalem, surrounded by a diverse range of people: Rabbi Meizel, the communist Sala Marcel, my widowed Aunt Hannah, and the intellectual Yaacovson. As far as I'm concerned, the opinion of such people is just as authoritative for making social and economic decisions as the opinion of an expert using a model." Part memoir, part crash-course in economic theory, this deeply engaging book by one of the world's foremost economists looks at economic ideas through a personal lens. Together with an introduction to some of the central concepts in modern economic thought, Ariel Rubinstein offers some powerful and entertaining reflections on his childhood, family and career. In doing so, he challenges many of the central tenets of game theory, and sheds light on the role economics can play in society at large. *Economic Fables* is as thought-provoking for seasoned economists as it is enlightening for newcomers to the field.

In an age where business is too often seen as brutal combat devoid of ethics and human concern, the amazing story of Harold Simmons' journey from bank trainee to one of the nation's wealthiest, most successful corporate investors is an inspiring record of intelligence, honesty, and faith in the American system. It is also a fascinating trip through the byzantine realities of high corporate finance and corporate acquisition, and a validation of the idea that the true value of public companies can be discovered through nothing more than intellect, hard work, and public records. This is the story of Harold Simmons, whose journey from his home in Golden, Texas, has been on a path paved in gold. Written in the can't-put-it-down style of best-selling author John J. Nance.

The United States spends billions of dollars annually on social and economic policies aimed at improving the lives of its citizens, but the health consequences associated with these policies are rarely considered. In *Making Americans Healthier*, a group of multidisciplinary experts shows how social and economic policies seemingly unrelated to medical well-being have dramatic consequences for the health of the American people. Most previous research concerning problems with health and healthcare in the United States has focused narrowly on issues of medical care and insurance coverage, but *Making Americans Healthier* demonstrates the important health consequences that policymakers overlook in traditional cost-benefit evaluations of social policy. The contributors examine six critical policy areas: civil rights, education, income support, employment, welfare, and neighborhood and housing. Among the important findings in this book, David Cutler and Adriana Lleras-Muney document the robust relationship between educational attainment and health, and estimate that the health benefits of education may exceed even the well-documented financial returns of education. Pamela Herd, James House, and Robert Schoeni discover notable health benefits associated with the Supplemental Security Income

Program, which provides financial support for elderly and disabled Americans. George Kaplan, Nalini Ranjit, and Sarah Burgard document a large and unanticipated improvement in the health of African-American women following the enactment of civil rights legislation in the 1960s. *Making Americans Healthier* presents ground-breaking evidence that the health impact of many social policies is substantial. The important findings in this book pave the way for promising new avenues for intervention and convincingly demonstrate that ultimately social and economic policy is health policy.
