There are hundreds of ancient flood legends around the world that tells of vast inundations in ancient times caused by catastrophic events. It's often assumed that these legends refer to the flood of Noah and his ark. Although many do mirror this biblical story, some people say these legends simply refer to local floods that only affected the world of the locals, not the whole globe. There are three types of flood legends: global, local, and a confusion of global mixed with local floods. We sorted these legends into categories, presented the evidences, and exhibited the causes of each type. From this discussion emerges a frightful picture of the ancient world where civilizations were affected time and time again by vastly destructive cataclysmic events. The world changed—mountains rose, continents shifted, cities and islands sunk, species were obliterated, and whole populations were wiped off the face of the earth. Legends regularly validate others as true histories. If the floods they spoke of were not global, their effect was. This roller coaster ride of evidence will challenge the worldview of ancient and geologic history that have been taught to us. Legends of the floods often mentioned God or the gods, which were considered to be either responsible for the floods or saved people from them. The age when the gods ruled is associated with advanced technology and flood legends. Atlantis is considered central in flood legends, and many researchers have incorrectly linked its destruction with all flood legends. The gods, too, are related to Atlantis and are frequently tied with floods, which necessitated a section devoted to the age of the gods wherein we discover their origins and who they are.

Praise for *Worth Killing For* “This exciting third installment in the series effectively mixes gritty crime and involving domestic drama.” —Booklist “A complex, highly suspenseful tale of murder, revenge, and redemption.” —Kirkus Reviews “Fans are certain to enjoy the complex plot and Julia and Ray’s evolving relationship.” —Publishers Weekly

Bringing together recent scholarship on religion and the spatial imagination, Kristen Poole examines how changing religious beliefs and transforming conceptions of space were mutually informative in the decades around 1600. *Supernatural Environments in Shakespeare's England* explores a series of cultural spaces that focused attention on interactions between the human and the demonic or divine: the deathbed, purgatory, demonic contracts and their spatial surround, Reformation cosmologies and a landscape newly subject to cartographic surveying. It examines the seemingly incongruous coexistence of traditional religious beliefs and new mathematical, geometrical ways of perceiving the environment. Arguing that the late sixteenth- and early seventeenth-century stage dramatized the phenomenological tension that resulted from this uneasy confluence, this groundbreaking study considers the complex nature of supernatural environments in Marlowe's *Doctor Faustus* and Shakespeare's *Othello*, *Hamlet*, *Macbeth* and *The Tempest*.

A preeminent science studies scholar shows how feminist and postcolonial science studies challenge the problematic modernity versus tradition binary.

#1 New York Times best-seller with more than 11 million copies sold and Amazon's #17 best-selling book of all time. *Heaven Is for Real* was the best-selling non-fiction book of 2011 as reported by Nielsen's Bookscan, and was developed as a major motion picture by Sony in 2014. “Do you remember the hospital, Colton?” Sonja said. “Yes, mommy, I remember,” he said. “That’s where the angels sang to me.” When Colton Burpo made it through an emergency appendectomy, his family was overjoyed at his miraculous survival. What they weren’t expecting, though, was the story that emerged in the months that followed—a story as beautiful as it was extraordinary, detailing their little boy’s trip to heaven and back. Colton, not yet four years old, told his parents he left his body during the surgery—and authenticated that claim by describing exactly what his parents were doing in another part of the hospital while he was being operated on. He talked of visiting heaven and relayed stories told to him by people he met there whom he had never met in life, sharing events that happened even before he was born. He also astonished his parents with descriptions and obscure details about heaven that matched the Bible exactly, though he had not yet learned to read. With disarming innocence and the plainspoken boldness of a child, Colton tells of meeting long-departed family members. He describes Jesus, the angels, how “really, really big” God is, and how much God loves us. Retold by his father, but using Colton’s uniquely simple words, *Heaven Is for Real* offers a glimpse of the world that awaits us, where as Colton says, “Nobody is old and nobody wears glasses.” *Heaven Is for Real* will forever change the way you think of eternity, offering the chance to see, and believe, like a child. Continue the Burpos story in *Heaven Changes Everything: The Rest of Our Story*. *Heaven Is for Real* also is available in Spanish, *El cielo es real*.

Puns, jokes, proverbs, riddles, play languages, verbal dueling, parallelism, metaphor, grammatical stretching and manipulation in poetry and song— people around the world enjoy these forms of speech play and verbal artistry which form an intrinsic part of the fabric of their lives. Verbal playfulness is not a frivolous pursuit. Often indicative of people's deepest values and worldview, speech play is a significant site of intersection among language, culture, society, and individual expression. In this book, Joel Sherzer examines many kinds of speech play from places as diverse as the United States, France, Italy, Bali, and Latin America to offer the first full-scale study of speech play and verbal art. He brings together various speech-play forms and processes and shows what they have in common and how they overlap. He also demonstrates that speech play explores and indeed flirts with the boundaries of the socially, culturally, and linguistically possible and appropriate, thus making it relevant for anthropological and linguistic theory and practice, as well as for folklore and literary criticism.

Leading Scholar Offers a Theological Approach to Preaching This primer on the ministry of preaching connects reading the Bible theologically with preparing and preaching sermons. Hans Boersma explains that exegesis involves looking beyond the historical and literal meaning of the text to the hidden sacramental reality of Christ himself, which enables us to reach the deepest meaning of the Scriptures. He provides models for theological sermons along with commentary on exegetical and homiletical method and explains that patristic exegesis is relevant for reading the Bible today. The book includes a foreword by Eugene H. Peterson.

This booklet is simply a further abridge form of the book, *Angels, Let's Talk,* which was collection of blog posts from the blog *Dew (due) From Heaven: Light 2 U Blog.* For as asked on the back cover of that book *Why are you angels here, where are you coming from and do you give a damn? where you are going!? So those who believe give a damn and would declare I Give A Damn.? Or, I believe, I care, I as an angel want to be saved. How? Where? Why? I believe and I want to receive. That sincere rhetoric of an angel is coined in this verses, "I believe; help thou mine unbelief" (Mark 9:24). This booklet intends to identify those key areas of that book and those posts, but that book is also a must read for development. Thanks and God bless.*

One couple's inspiring memoir of healing a Rwandan village, raising a family near the old killing fields, and building a restaurant named Heaven. Newlyweds Josh and Alissa

were at a party and received a challenge that shook them to the core: do you think you can really make a difference? Especially in a place like Rwanda, where the scars of genocide linger and poverty is rampant? While Josh worked hard bringing food and health care to the country's rural villages, Alissa was determined to put their foodie expertise to work. The couple opened Heaven, a gourmet restaurant overlooking Kigali, which became an instant success. Remarkably, they found that between helping youth marry their own local ingredients with gourmet recipes (and mix up "the best guacamole in Africa") and teaching them how to help themselves, they created much-needed jobs while showing that genocide's survivors really could work together. While first a memoir of love, adventure, and family, A Thousand Hills to Heaven also provides a remarkable view of how, through health, jobs, and economic growth, our foreign aid programs can be quickly remodeled and work to end poverty worldwide.

Shakespeare had extraordinary intelligence, unheard-of powers of observation and interpretation, a soaring imagination, a way with words that defies description, and a defining interest in the theater. He brought kings, queens, heroes, and peasantry to the stage so they could be seen in a more realistic fashion. Even so, in modern times, assistance is often needed to interpret Shakespeares work. In A Leg Up on the Canon, author Jim McGahern provides an extensive biography of Shakespeare and offers an introductory guide to his histories, comedies, tragedies, romances, and poems. McGahern presents summaries of the texts, explanations of difficult passages, extensive historical context, and glossaries of terms no longer in use. In each volume, he outlines the plot of plays in that category and then delivers a one-act play with inclusive commentary. McGahern includes pertinent remarks and important speeches and soliloquies interlaced with brief explanations and descriptions of the actions on stage as well as plot developments. A Leg Up on the Canon, a four-volume series, provides insights into the word music of the talented man from Stratford.

This book provides detailed evidence from everything Jesus prophesied, often broken down to the root definitions of terms from the Greek and Aramaic/Hebrew languages which manuscripts were written in, to show in context by numerous Bible records, how and why those called, Ti (Tee) and Do (Doe) were the new incarnations of the One referred to as the Father and before then, Jehovah and Elohim, with the One who was incarnate in the vehicle (body) named Jesus, and before then Elijah, Moses, Enoch and Adam, who with Their Crew of Student "Saints," were on earth again to fulfill the promised return of Their Kingdom during these "End Times," through Their task recorded as the "Two Witnesses" in the Book of Revelations, that was completed when they exited their incarnations in March of 1997 - seen in the world's news as Heaven's Gate. Ti and Do left extensive records of everything they came to awaken to know over their combined 25 years incarnate. As I spent 19 fully dedicated years with them I drew upon their records and my experience to describe many new translations of terms and new interpretations of most all Book of Revelations records. Finally, I studied world history and current events that can be shown to be valid reference points in many prophecies. This includes many unusual events NASA has photographed in outer space as Jesus prophesied; a cityscape of Lights on dwarf planet Ceres, earth-like qualities to dwarf planet Pluto, hexagon shaped top on Saturn, spire like towers on the Moon, complicated objects that resemble Star Trek's star-ship enterprise in the sun's corona, comets that are comprised of several to seven objects flying in V formation, or having companion objects with them and parts of UFO and Luciferian space alien reports, holograms like Fatima and Spirits. »Our society has undergone a paradigm shift. In the information age, you and I are the alpha males,« Dr Leonard Hofstadter, experimental physicist and protagonist of the hit sitcom »The Big Bang Theory«, assures himself and his fellow scientists. The success of this and similar formats in American popular culture proves his point: Science has finally discovered the formula for cool. This interdisciplinary study examines how »cool«, a key aesthetic and affective category in the American imagination, informs contemporary representations of technoscience. Analyzing selected audiovisual productions, Judith Kohlenberger sheds light on current processes of interaction between science and popular culture, two pivotal sources for change in post-industrial America.

This book is a theoretical inquiry into alternative pedagogies that challenge current standardized practices in the field of science education. Through Mandy Hoffen, a fictional persona, Dana McCullough, the author, explores how stories of Henrietta Lacks become part of a conspiracy to change science education. Mandy Hoffen, however, never expected to find herself in the middle of a conspiracy. As a science teacher of 20 plus years, she worked diligently to meet the needs of her charges, who are currently ninth and tenth grade biology students in an age of standardized testing. The author also creates imaginary dialogues which serve as the theoretical framework for each chapter. Each chapter unfolds in a form of a play with imaginary settings and events that bring Henrietta Lacks back from the grave to participate in conversations about science, society, and social justice. The imaginary conversations are based on the author's experiences in graduate courses, direct quotations from philosophers of science, historians of science, science educators, curriculum theorists, and stories of students in their study of Henrietta Lacks in a high school biology classroom. The play describes the journey of a graduate student/high school teacher as she researches the importance of the philosophy of science, history of science, science curriculum and social justice in science education. Through reflections on fictional conversations, stories of Henrietta Lacks are examined and described in multiple settings, beginning in an imaginary academic meeting, and ending with student conversations in a classroom. Each setting provides a space for conversations wherein participants explore their personal connections with science, science curriculum, issues of social justice related to science, and Henrietta Lacks. This book will be of interest to graduate students, scholars, and undergraduates in curriculum studies, educational foundations, and teacher education, and those interested in alternative research methodologies. This is the first book to intentionally address the stories of Henrietta Lacks and their importance in the field of curriculum studies, science studies, and current standardized high school science curriculum.

A riveting portrait of a rural Pennsylvania town at the center of the fracking controversy Shale gas extraction—commonly known as fracking—is often portrayed as an energy revolution that will transform the American economy and geopolitics. But in greater Williamsport, Pennsylvania, fracking is personal. Up to Heaven and Down to Hell is a vivid and sometimes heartbreaking account of what happens when one of the most momentous decisions about the well-being of our communities and our planet—whether or not to extract shale gas and oil from the very land beneath our feet—is largely a private choice that millions of ordinary people make without the public's consent. The United States is the only country in the world where property rights commonly extend "up to heaven and down to hell," which means that landowners have the exclusive right to lease their subsurface mineral estates to petroleum companies. Colin Jerolmack spent eight months living with rural communities outside of Williamsport as they confronted the tension between property rights and the commonwealth. In this deeply intimate book, he reveals how the decision to lease brings financial rewards but can also cause irreparable harm to neighbors, to communal resources like air and water, and even to oneself. Up to Heaven and Down to Hell casts America's ideas about freedom and property rights in a troubling new light, revealing how your personal choices can undermine your neighbors' liberty, and how the exercise of individual rights can bring unintended environmental consequences for us all.
