Rethinking Informed Consent in Bioethics Neil C. Manson, Onora O'Neill, 2007-03-29 Informed consent is a central topic in contemporary biomedical ethics. Yet attempts to set defensible and feasible standards for consenting have led to persistent difficulties. In *Rethinking Informed Consent in Bioethics*, first published in 2007, Neil Manson and Onora O'Neill set debates about informed consent in medicine and research in a fresh light. They show why informed consent cannot be fully specific or fully explicit, and why more specific consent is not always ethically better. They argue that consent needs distinctive communicative transactions, by which other obligations, prohibitions, and rights can be waived or set aside in controlled and specific ways. Their book offers a coherent, wide-ranging and practical account of the role of consent in biomedicine which will be valuable to readers working in a range of areas in bioethics, medicine and law.

A Philosopher Looks at Digital Communication Onora O'Neill, 2022-02-10 Explores how digital technologies have raised new ethical issues for communication.

Measuring Social Change Alnoor Ebrahim,2019-07-16 The social sector is undergoing a major transformation. We are witnessing an explosion in efforts to deliver social change, a burgeoning impact investing industry, and an unprecedented intergenerational transfer of wealth. Yet we live in a world of rapidly rising inequality, where social sector services are unable to keep up with societal need, and governments are stretched beyond their means. Alnoor Ebrahim addresses one of the fundamental dilemmas facing leaders as they navigate this uncertain terrain: performance measurement. How can they track performance towards worthy goals such as reducing poverty, improving public health, or advancing human rights? What results can they reasonably measure and legitimately take credit for? This book tackles three core challenges of performance faced by social enterprises and nonprofit organizations alike: what to measure, what kinds of performance systems to build, and how to align multiple demands for accountability. It lays out four different types of strategies for managers to consider—niche, integrated, emergent, and ecosystem—and details the types of performance measurement and accountability systems best suited to each. Finally, this book examines the roles of funders such as impact investors, philanthropic foundations, and international aid agencies, laying out how they can best enable meaningful performance measurement.

The Epistemology of Deceit in a Postdigital Era Alison MacKenzie, Jennifer Rose, Ibrar Bhatt, 2021-08-03 This edited book collection offers strong theoretical and philosophical insight into how digital platforms and their constituent algorithms interact with belief systems to achieve deception, and how related vices such as lies, bullshit, misinformation, disinformation, and ignorance contribute to deception. This inter-disciplinary collection explores how we can better understand and respond to these problematic practices. The Epistemology of Deceit in a Postdigital Era: Dupery by Design will be of interest to anyone concerned with deception in a 'postdigital' era including fake news, and propaganda online. The election of populist governments across the world has raised concerns that fake news in online platforms is undermining the legitimacy of the press, the democratic process, and the authority of sources such as science, the social sciences and qualified experts. The global reach of Google, YouTube, Twitter, Facebook, and other platforms has shown that they can be used to create and spread fake and misleading news quickly and without control. These platforms operate and thrive in an increasingly balkanised media eco-system where networks of users will predominantly access and consume information that conforms to their existing worldviews. Conflicting positions, even if relevant and authoritative, are suppressed, or overlooked in everyday digital information consumption. Digital platforms have contributed to the prolific spread of false information, enabled ignorance in online news consumers, and fostered confusion over determining fact from fiction. The collection explores: Deception, what it is, and how its proliferation is achieved in online platforms. Truth and the appearance of truth, and the role digital technologies play in pretending to represent truth. How we can counter these vices to protect ourselves and our institutions from their potentially baneful effects. A Question Of Trust David Anderson, 2015-06-11 [This convenience copy of the official report by the UK Independent Reviewer of Terrorism Legislation, made available under OGLv3 on a cost-only basis] Modern communications networks can be used by the unscrupulous for purposes ranging from cyber-attack, terrorism and espionage to fraud, kidnap and child sexual exploitation. A successful response to these threats depends on entrusting public bodies with the powers they need to identify and follow suspects in a borderless online world. But trust requires verification. Each intrusive power must be shown to be necessary, clearly spelled out in law, limited in accordance with international human rights standards and subject to demanding and visible safeguards. The current law is fragmented, obscure, under constant challenge and variable in the

protections that it affords the innocent. It is time for a clean slate. This Report aims to help Parliament achieve a world-class framework for the regulation of these strong and vital powers.

Trust and Confidence in Government and Public Services Sue Llewellyn, Stephen Brookes, Ann Mahon, 2013-10-28 Trust and confidence are topical issues. Pundits claim that citizens trust governments and public services increasingly less - identifying a powerful new erosion of confidence that, in the US, goes back at least to Watergate in the 1970s. Recently, media exposure in the UK about MP expenses has been extensive, and a court case ruled in favor of publishing expense claims and against exempting MPs from the scrutiny which all citizens are subject to under 'freedom of information.' As a result, revelations about everything from property speculation to bespoke duck pond houses have fueled public outcry, and survey evidence shows that citizens increasingly distrust the government with public resources. This book gathers together arguments and evidence to answer questions such as: What is trust? Can trust be boosted through regulation? What role does leadership play in rebuilding trust? How does trust and confidence affect public services? The chapters in this collection explore these questions across several countries and different sectors of public service provision: health, education, social services, the police, and the third sector. The contributions offer empirical evidence about how the issues of trust and confidence differ across countries and sectors, and develop ideas about how trust and confidence in government and public services may adjust in the information age.

Trust in the World Josef Früchtl, 2017-09-20 This book examines the theory, originally raised in Gilles Deleuze's philosophy of film, that cinema has the power to restore our trust in the world. Früchtl demonstrates that cinema does this in three main ways: by restoring our belief in the absurd, in the body and in a sceptical abstention from judging and acting. Cinema shares this ability with other arts, but what sets it apart in particular is that it evokes Modernity and its principle of subjectivity. This book further develops the idea of trust and cinema by synthesizing the philosophies of complementary thinkers such as Kant, Nancy, Agamben, Benjamin and Rancière. It concludes with examination of Cavell's solution to the problem of scepticism and a synthesis of Kantian aesthetic theory with Cavellian pragmatism. Originally published in German under the title *Vertrauen in die Welt*, this English-language translation features a new introduction that situates Früchtl's work within contemporary analytical philosophy of film. It will be of interest to scholars working in Continental aesthetics, philosophy of film, and film theory.

The Lifecycle of Trust in Education Kutsyuruba, Benjamin, Walker, Keith D., 2021-08-27 Understanding the dynamics of trust is an imperative undertaking for educational leaders. In this book, using an ecological perspective of the lifecycle, the authors situate trust as an essential ingredient of school leaders' moral agency and ethical decision making. Based on their 15 years of research on trust in education, the authors describe the nature and dimensions of trust, its importance and imperative, and its fragility and usefulness for school leaders, positioning them as trust brokers in school organizations.

The Crisis of Multilateral Legal Order Lukasz Gruszczynski, Marcin Menkes, Veronika Bilkova, Paolo Farah,2022-09-15 Multilateralism has served as a foundation for international cooperation over the past several decades. Championed after the Second World War by the United States and Western Europe, it expanded into a broader global system of governance with the end of the Cold War. Lately, an increasing number of States appear to be disappointed with the existing multilateral arrangements, both at the level of norms and that of institutions. The great powers see unilateral and bilateral strategies, which maximize their political leverage rather than diluting it in multilateral fora, as more effective ways for controlling the course of international affairs. The signs of the crisis have been visible for some time - but recent crises indicate an acceleration of the on-going disintegration of the multilateral system, such as Brexit, growing resistance on the part of States to international monitoring of compliance and the radical change in the US foreign policy during the presidency of Donald Trump which saw the US withdraw from several multilateral agreements (e.g. the Iran Nuclear Deal and the Paris Agreement), leave some international organizations or bodies (e.g. the United Nations Human Rights Council or the World Health Organization) or paralyze some others (e.g. the World Trade Organization (WTO)). Tackling the debate surrounding the crisis of multilateralism and the related transformation of the underlying international legal order, *The Crisis of Multilateral Legal Order* analyzes selected aspects of the current crisis from the perspective of public international law to identify the nature of the crisis, its dynamics, and implications.
