NEW 2021 EDITION of the best-selling notary prep guide to the difficult Louisiana exam. The Louisiana Notary Exam has a 20% pass rate. The Notary Exam has an official Study Guide you use during the exam. But the Study Guide has no index, no big picture, no study strategies, no exam-day tips, not enough cross-references . . . and few of the forms notaries use that they test. It doesn't explain most-tested subjects, past exams, or recent changes to the Guide. It's got the law and notary rules, but it's missing essentials for any such textbook. This book has all that—and much more that anyone contemplating the exam should read. It even includes crucial information about notary practice for the newbie notary, and is useful to experienced notaries for its expanded cross-references, complete index, and summary lists. Basically it's the rest of the official Study Guide they somehow omitted. Why would they leave out the index, of all things? Reminder: a 20% pass rate. As a senior law teacher and member of two state bars, Professor Childress still needed to pass the Louisiana Notary Exam to practice as one. It's a challenging exam for everyone, yet he found in the 'Study Guide' lots of trees but little forest—and even less real guidance. Determined that current test-takers can do better with more real help, he wrote this book and geared the page numbers—including an index, cross-references, lists, and illustrated explanation of successions, community property, and authentic acts—to the latest edition of the state's official text, Fundamentals of Louisiana Notarial Law and Practice. An affordable addition to the Self-Study Sherpa Series from Quid Pro Books, that actually pays for itself six-times-over with its 'one weird trick' saying how to save \$65 in fees in the notary qualification process.

The book is written for active learners – those keen on cutting their own path through the complex and at times hardly comprehensible world of THEORY in International Relations. To aid this process as much as possible, this book employs the didactical and methodical concept of integrating teaching and self-study. The criteria for structured learning about IR theory will be derived from an extensive discussion of the questions and problems of philosophy of science (Part 1). Theory of IR refers to the scientific study of IR and covers all of the following subtopics: the role and status of theory in the academic discipline of IR;

the understanding of IR as a science and what a "scientific" theory is; the different assumptions upon which theory building in IR is based; the different types of theoretical constructions and models of explanations found at the heart of particular theories; and the different approaches taken on how theory and the practice of international relations are linked to each other. The criteria for the structured learning process will be applied in Part 2 of the book during the presentation of five selected theories of International Relations. The concept is based on "learning through example" – that is, the five theories have been chosen because, when applying the criteria developed in Part 1 of the book, each single theory serves as an example for something deeply important to learn about THEORY of IR more generally.

This study guide to the Epistle to the Ephesians is part of a series that has enabled millions to effectively explore and understand God's eternal message, and which continues to be the most widely used tool for Bible study today.
