'The Bitcoin Saga: A Mixed Montage' is an exciting story about the birth and growth of bitcoin and the blockchain technology underpinning it. The book takes the untutored reader on a thrilling rollercoaster ride through the complexities and myriad facets of cryptocurrencies. The sub-prime crisis of 2008 and the Cypherpunk movement sets the stage for the advent of the mysterious Satoshi Nakamoto and the release of the first cache of bitcoins. The narrative takes on a Houdini like magical quality as it unravels the skeins of the Dark Web and the secret of the Silk Road. The story of the Mt Gox heist and Nostradamus like prophecies of bitcoin doom add a generous dollop of intrigue to the crypto story. The cryptocurrency regulatory-tax tales of countries like USA, Canada, Japan, Australia, China, India etc give the narrative an intellectual slant. The bitcoin saga ends on an introspective note. The blockchain technology has enormous power to change the world. Whether it will be a benevolent Titan or a Frankenstein monster, only time can tell. Layering climate science, mythologies, nature writing, and personal experiences, this New York Times Notable Book presents a stunning reckoning with our current moment and with the literal and figurative end of time. *Desert Notebooks* examines how the unprecedented pace of destruction to our environment and an increasingly unstable geopolitical landscape have led us to the brink of a calamity greater than any humankind has confronted before. As inhabitants of the Anthropocene, what might some of our own histories tell us about how to confront apocalypse? And how might the geologies and ecologies of desert spaces inform how we see and act toward time—the pasts we have erased and paved over, this anxious present, the future we have no choice but to build? Ehrenreich draws on the stark grandeur of the desert to ask how we might reckon with the uncertainty that surrounds us and fight off the crises that have already begun. In the canyons and oases of the Mojave and in Las Vegas's neon apocalypse, Ehrenreich finds beauty, and even hope, surging up in the most unlikely places, from the most barren rocks, and the apparent emptiness of the sky. *Desert Notebooks* is a vital and necessary chronicle of our past and our present—unflinching, urgent—yet timeless and profound.

clerk, odd-jobs man, and lowly factotum who became the best-known "underground" writer in the English language. His work—raw, crude, heartbreaking, and hilarious—has inspired imitators, emulators, sycophants, and detractors. This book chronicles the man, the myth, and his work.

This book is a collection of musings on topics you've heard discussed in the media or maybe over coffee or perhaps something stronger. The style floats from slightly academic (though hopefully not much), to irreverent, to humorous. I want readers to look at the money world and social issues affecting that world differently. My goal is to make you think. For many reasons, we're weak with critical thinking skills. We need these skills at an important juncture in our nation's history. Information dumps from print (what's left of it), TV and the Internet can overwhelm anyone. What's emerged is a cottage industry of people deciding fact and fiction. In other cases, people try to convince us that stop means go and that red is somehow green. While their statements may be true, we have lost our ability to judge.

Using the letters Warren Buffett wrote to his partners between 1956 and 1970, a veteran financial advisor presents the renowned guru's "ground rules" for investing—guidelines that remain startlingly relevant today. In the fourteen years between his time in New York with value-investing guru Benjamin Graham and his start as chairman of Berkshire Hathaway, Warren Buffett managed Buffett Partnership Limited, his first professional investing partnership. Over the course of that time—a period in which he experienced an unprecedented record of success—Buffett wrote semiannual letters to his small but growing group of partners, sharing his thoughts, approaches, and

reflections. Compiled for the first time and with Buffett's permission, the letters spotlight his contrarian diversification strategy, his almost religious celebration of compounding interest, his preference for conservative rather than conventional decision making, and his goal and tactics for bettering market results by at least 10% annually. Demonstrating Buffett's intellectual rigor, they provide a framework to the craft of investing that had not existed before: Buffett built upon the quantitative contributions made by his famous teacher, Benjamin Graham, demonstrating how they could be applied and improved. Jeremy Miller reveals how these letters offer us a rare look into Buffett's mind and offer accessible lessons in control and discipline—effective in bull and bear markets alike, and in all types of investing climates—that are the bedrock of his success. Warren Buffett's Ground Rules paints a portrait of the sage as a young investor during a time when he developed the long-term value-oriented strategy that helped him build the foundation of his wealth—rules for success every investor needs today.

Words of wisdom from Charlie Munger—Warren Buffett's longtime business partner and the visionary Vice Chairman of Berkshire Hathaway—collected and interpreted with an eye towards investing by David Clark, coauthor of the bestselling Buffettology series. studied mathematics at the University of Michigan, trained as a meteorologist at Cal Tech Pasadena while in the Army, and graduated magna cum laude from Harvard Law School without ever earning an undergraduate degree. Today, Munger is one of America's most successful investors, the Vice Chairman of Berkshire Hathaway, and Warren Buffett's business partner for almost forty years. Buffett says "Berkshire has been built to Charlie's blueprint. My role has been that of general contractor." Munger is an intelligent, opinionated business man whose ideas can teach professional and amateur investors how to be successful in finance and life. Like *The Tao of Warren Buffett* and *The Tao of Te Ching*, *The Tao of Charlie Munger* is a compendium of pithy quotes including, "Knowing what you don't know is more useful than being brilliant" and "In my whole life, I have known no wise people who didn't read all the time—none, zero." This collection, culled from interviews, speeches, and questions and answers at the Berkshire Hathaway and Wesco annual meetings, offers insights into Munger's amazing financial success and life philosophies. Described by Business Insider as "sharp in his wit and investing wisdom," Charlie Munger's investment tips, business philosophy, and rules for living are as unique as his life story; intelligent as he clearly is; and as successful as he has been.

make laugh until you cry. Sheila Nevins is the one person who always tells it like it is. In *You Don't Look Your Age*, the famed documentary producer (as President of HBO Documentary Films for over 30 years, Nevins has rightfully been credited with creating the documentary rebirth) finally steps out from behind the camera and takes her place front and center. In these pages you will read about the real life challenges of being a woman in a man's world, what it means to be a working mother, what it's like to be an older woman in a youth-obsessed culture, the sometimes changing, often sweet truth about marriages, what being a feminist really means, and that you are in good company if your adult children don't return your phone calls. So come, sit down, make yourself comfortable, (and for some of you, don't forget the damn reading glasses). You're in for a treat.

Between the twelfth and sixteenth centuries, a distinct form of Islamic thought and practice developed among Muslim trading communities of the Indian Ocean. Sebastian R. Prange argues that this 'Monsoon Islam' was shaped by merchants not sultans, forged by commercial imperatives rather

than in battle, and defined by the reality of Muslims living within non-Muslim societies. Focusing on India's Malabar Coast, the much-fabled 'land of pepper', Prange provides a case study of how Monsoon Islam developed in response to concrete economic, socio-religious, and political challenges. Because communities of Muslim merchants across the Indian Ocean were part of shared commercial, scholarly, and political networks, developments on the Malabar Coast illustrate a broader, trans-oceanic history of the evolution of Islam across monsoon Asia. This history is told through four spaces that are examined in their physical manifestations as well as symbolic meanings: the Port, the Mosque, the Palace, and the Sea.
