Efforts to improve mathematics education have led educators and researchers to not only study the nature of proficiency, beliefs, and practices in mathematics learning and

teaching, but also identify and assess possible influences on students' and teachers' proficiencies, beliefs, and practices in learning and teaching mathematics. The complexity of these topics has fascinated researchers from various backgrounds, including psychologists, cognitive or learning scientists, mathematicians, and mathematics educators. Among those researchers, two scholars with a similar background – Alan Schoenfeld in the United States and Günter Törner in Germany, are internationally recognized for their contributions to these topics. To celebrate their 65th birthdays in 2012, this book brought together many scholars to reflect on how their own work has built upon and continued Alan and Günter's work in mathematics education. The book contains 17 chapters by 33 scholars from six different education systems. This collection describes recent research and provides new insights into these topics of interest to mathematics educators, researchers, and graduate students who wish to learn about the trajectory and direction of research on these issues.

exercises are included. A bonus CD-ROM contains dictation/transcription exercises, plus 20 additional questions on each body system.

A quick reference for the medical transcriptionist, this book provides basic rules of grammar as well as current trends in the field. It's especially useful in searching for help with an obscure rule or in reinforcing a common practice. Using short chapters, this text provides the Do's - the grammatical rule, its exceptions, and its variations, along with examples; and the Don'ts - any common contradictions of that rule. Examples are taken from medical writing rather than general writing. Easy-to-use format provides numbered topics in each chapter, which are followed by Do's and Don'ts in quick, easy sentences. Spiral binding allows book to lay flat so MT's can refer to a rule without taking their hands off the keyboard. Clear examples are given to clarify difficult-to-understand concepts and rules. HIPAA Guidelines chapter provides general information about HIPAA legislation, with rules explaining its impact on topics such as e-mail, faxing, patient records, and privacy/security. Content has been updated to reflect changes in technology (such as use of the Internet), slang terms, and new medical terms that affect the rules of medical transcription. A table lists dangerous abbreviations to avoid, all banned by JCAHO. Homonyms and Sound-alike Words in the appendix focus on the many homonyms in medical language

that can confuse a medical transcriptionist and cause a document to be transcribed incorrectly, leading to incorrect treatment of the patient. Appendices are lettered and thumb-tabbed for ease of use, to differentiate from the body of the text. Content reflects the AAMT style, the standard among major employers of medical transcriptionists.

Muhammadu Buhari was the seventh Head of Government of an independent Nigeria, serving then as a Military Head of State- and is also the current President of a democratic Nigeria, hence the fifteenth "number one citizen" of the Federal Republic. President Muhammadu Buhari was born, 17 December 1942, in a halcyon country side of Daura (to the family of Adamu and Zulaihat) in the present day Katsina State of Nigeria. But as fate would have it, this twenty-third child of Adamu lost his dear father at a rather tender age of four. Although Buhari lost his father at such an early age in life, the hand of destiny never left him to fall by the way side- to be consigned to the dustbin of oblivion. And so it was that

under the sponsorship of a "foresighted" determined mother, the forthright Muhammadu Buhari obtained formal education at different times at his native home town of Daura- and also Mai'adua. It is on record that he attended Katsina Model School in 1953, and then Katsina Provincial Secondary School (now Government College Katsina) between 1956 and 1961. Any story told about Buhari will never be complete without mentioning the very fact that this man who prefers to live a low-profile or rather reserved life-style had a glorious Military career, spanning decades of dedicated service to father-land. This book is a compilation of some PATRIOTIC QUOTES CULLED FROM SPEECHES AND STATEMENTS of the currently serving PRESIDENT OF NIGERIA (MUHAMMADU BUHARI). The material is a well-arranged piece with the sole aim of teaching and instilling in our people that sense of patriotism or national-consciousness which seems fading away, or even lacking, but which is most needed at this time. Nothing gingers the human mind like inspirational words such as those contained in this presentation. It is our firm belief that something has to be done to re-awaken the spirit of our people towards being in tune with the change mantra of Mr. President.

This twenty-third ICMI Study addresses for the first time mathematics teaching and learning in the primary school (and pre-school) setting, while also taking international perspectives, socio-cultural diversity and institutional constraints into account. One of the main challenges of designing the first ICMI primary school study of this kind is the complex nature of mathematics at the early level. Accordingly, a focus area that is central to the discussion was chosen, together with a number of related questions. The broad area of Whole Number Arithmetic (WNA), including operations and relations and arithmetic word problems, forms the core content of all primary mathematics curricula. The study of this core content area is often

regarded as foundational for later mathematics learning. However, the principles and main goals of instruction on the foundational concepts and skills in WNA are far from universally agreed upon, and practice varies substantially from country to country. As such, this study presents a meta-level analysis and synthesis of what is currently known about WNA, providing a useful base from which to gauge gaps and shortcomings, as well as an opportunity to learn from the practices of different countries and contexts.
