With the Sepoy Mutiny still threatening British lives in India, Commander Phillip Hazard volunteers to accompany a special army force to rescue the besieged British garrison at Ghorabad. Hazard and the men of the Shannon's Naval Brigade are put under the command of Colonel Cockayne, a cavalry officer whose own wife and daughter are among those caught in the siege.

Sequel to *Change of Heart*: Book Two Jin Rayne is having trouble adjusting to the new life he's supposed to love. Instead of adapting to being the mate of tribe leader Logan Church, Jin can't get past the fact that his lover was straight before they met. He's discovered the joy in belonging to Logan but fears his new life could disappear at a moment's notice, despite Logan's insistence that they are forever, end of story. Jin wants to trust Logan, but that desire will be put to the test both by a rival tribe leader and by a startling revelation about Jin's existence. At stake is Jin's life and his place in the tribe. If he's going to survive to see Logan again, he'll have to release his fear and freely accept the bond, for only then can he truly trust. This anthology explores the recurring trope of the dead or absent mother in Western cultural productions. Across historical periods and genres, this dialogue has been employed to articulate and debate questions of politics and religion, social and cultural change as well as issues of power and authority within the family. Åström seeks to investigate the many functions and meanings of the dialogue by covering extensive material from the 1200s to 2014 including hagiography, romances, folktales, plays, novels, children's literature and graphic novels, as well as film and television. This is achieved by looking at the discourse both as products of the time and culture that produced the various narratives, and as part of an on-going cultural conversation that spans the centuries, resulting in an innovative text that will be of great interest to all scholars of gender, feminist and media studies.

A National Book Award Finalist In this ambitiously multilayered novel from the acclaimed and award-winning writer Jennifer Egan, a fashion model named Charlotte Swenson emerges from a car accident in her Illinois hometown with her face so badly shattered that it takes eighty titanium screws to reassemble it. She returns to New York still beautiful but oddly unrecognizable, a virtual stranger in the world she once effortlessly occupied. With the surreal authority of a David Lynch, Jennifer Egan threads Charlotte's narrative with those of other casualties of our infatuation with the image. There's a deceptively plain teenaged girl embarking on a dangerous secret life, an alcoholic private eye, and an enigmatic stranger who changes names and accents as he prepares an apocalyptic blow against American society. As these narratives inexorably converge, *Look at Me* becomes a coolly mesmerizing intellectual thriller of identity and imposture.

This addition to Anissa Rogers' bestselling *Human Behavior in the Social Environment* expands the original text with new chapters on spirituality, families and groups, organizations, and communities. Written in the compact, concise manner of the original text, the new chapters cover mezzo and macro contexts, and offer additional material valuable to two- and three-semester HBSE courses.

When Darkness Reigns and the Full Moon Glows, Terror Emerges to Stalk the Unsuspecting... From lycanthropic creatures found on television and film such as *Teen Wolf*, *Twilight*, and *True Blood* to the earliest folklore of shape-shifting creatures, *The Werewolf Book: The Encyclopedia of Shapeshifting Beings* is an eye-opening, blood-pounding tour through the ages of monsters with the most amazing camouflage capabilities—they hide among us! Along the way, you'll land at the doorstep of creatures like hirsute mass-murderer Albert Fish, and Fritz Haarman, who slaughtered and ate his victims—selling the leftovers as steaks and roasts in his butcher shop—as well as visits to mythical shamans, sirens, and skin walkers. Covering 140,000 years of legend, mythology, and fact, *The Werewolf Book* provides hair-raising

evidence of strange and obsessional behavior through the centuries. Learn the basics of becoming a werewolf and the intricacies of slaying the beast. A true homage to werewolves and other full moon beasts, it includes topics such as ... • Bear, tiger, coyote, and other shape-shifting people • Classic and modern werewolf movies • Gargoyles, totem poles, and Internet depictions • Serial killers and sadistic rulers • Sorcery, spells, and talismans • Television shows, songs, and computer games

Emerging Contaminants presents the reader with information on classification, recent studies, and adverse effects on the environment and human health of the main classes of contaminants. Emerging contaminants are synthetic or natural compounds and microorganisms produced and used by humans that cause adverse ecological and human health effects when they reach the environment. This book is organized into four sections that cover the classification of contaminants and the instrumental techniques used to quantify them, recent studies on pesticides, antibiotics as an important group of emerging contaminants, and studies of different classes of emerging contaminants such as polybrominated diphenyl ethers (PBDEs), microplastics, and others.

Noel Carroll, film scholar and philosopher, offers the first serious look at the aesthetics of horror. In this book he discusses the nature and narrative structures of the genre, dealing with horror as a "transmedia" phenomenon. A fan and serious student of the horror genre, Carroll brings to bear his comprehensive knowledge of obscure and forgotten works, as well as of the horror masterpieces. Working from a philosophical perspective, he tries to account for how people can find pleasure in having their wits scared out of them. What, after all, are those "paradoxes of the heart" that make us want to be horrified?

Doctor Impossible—evil genius, would-be world conqueror—languishes in prison. Shuffling through the cafeteria line with ordinary criminals, he wonders if the smartest man in the world has done the smartest thing he could with his life. After all, he's lost every battle he's ever fought. But this prison won't hold him forever. Fatale—half woman, half high-tech warrior—used to be an unemployed cyborg. Now, she's a rookie member of the world's most famous super-team, the Champions. But being a superhero is not all flying cars and planets in peril—she learns that in the locker rooms and dive bars of superherodom, the men and women (even mutants) behind the masks are as human as anyone. *Soon I Will Be Invincible* is a wildly entertaining first novel, brimming with attitude and humor—an emotionally resonant look at good and evil, love and loss, power and glory.

The most comprehensive book on this subject ever published. With 3,638 references,

The contributors to *Monster Theory* consider beasts, demons, freaks and fiends as symbolic expressions of cultural unease that pervade a society and shape its

collective behavior. Through a historical sampling of monsters, these essays argue that our fascination for the monstrous testifies to our continued desire to explore difference and prohibition.

Presenting a vivid historical account of the contributions that black psychiatrists have made to American psychiatry, this important book documents the growth and influence of the group in tandem with the advancement of the field as a whole. It provides us with a deep appreciation for what these pioneers accomplished and the hurdles they overcame. Spurlock and the book's many distinguished contributors provide an overview of the history spanning generations and various areas of psychiatry. This volume documents early and contemporary pioneers and their contributions to modern psychiatry. Surveys of black psychiatrists in academia, child psychiatry, psychiatric research, forensic psychiatry, and psychoanalysis provide an enlightening view of their experiences. From a collection of descriptive essays, readers can step into the shoes of several pioneers and experience how they lived. These personal reflections provide enormous insight into the history of American psychiatry. Finally, the book addresses current mental health issues affecting African Americans as well as the barriers black psychiatrists face and the coping mechanisms they use. This work should be of particular interest to psychiatry students or residents and to anyone interested in the history of American psychiatry. It discusses the widening opportunities for professional growth for black psychiatrists and the important place black psychiatrists have reached in the present mental health arena.

Postmortem Toxicology addresses the various aspects of the practice of forensic postmortem toxicology from a viewpoint of elements which must be taken into consideration for proper interpretation of the toxicological result, not in a vacuum but in a more holistic and global sense. The volume examines pre-analytical factors, storage containers/conditions, prior medical interventions and therapy, along with information from the scene investigation and anatomical findings. This reference also provides explanation of the complicating conditions for the interpretation of the toxicological results due to postmortem decomposition, embalming artifacts and the postmortem redistribution of drugs. Tolerance is also discussed as an aid to interpreting results from a habitual/chronic user of medications and/or drugs of abuse. The book is geared towards the current practitioner; however, it is written to be used as a valuable reference for a graduate or post-graduate level courses in forensic toxicology or forensic pathology. Presents a holistic approach to the interpretation of toxicology results Covers pre-analytical factors, storage containers/conditions, prior medical interventions, therapy, and much more Written for the current practitioner, but an excellent resource for graduate level students training in the field of forensic toxicology Jin Rayne is still growing into his frightening new powers as a nekhene cat and his place as reah of Logan Church's tribe when he learns that a sepat, an honor challenge, has been called. Logan, who has never wanted to do anything but lead his small-town tribe, must travel around the world to Mongolia and fight to become the most powerful leader in the werepanther world. Logan won't be the only one making the journey. As

his mate, Jin must fight with him to honor his commitment to Logan, his culture, and his tribe. But the trial is long, involving a prolonged separation between the two men, and Logan's humanity is at stake. In order to make it through the nightmarish sepat, Jin and Logan must accept their fates, trust each other, and honor the vows between them no matter the cost.

Rather than assuming that film and the media tell us little about the reality of criminological phenomena, "Gothic criminology," as instantiated in this collection of essays, recognizes the complementarity of critical academic and aesthetic accounts of deviant behavior as intersecting with the public policy in complex, non-reductive ways."

THE STORY: Sam, a successful politician and diplomat, is invited to speak at the dedication of a new building named for his old school friend, Perry, and paid for by Perry's wealthy mother. The knowledge that Perry died of AIDS galvanizes Sam as he "For sheer adventure L'Amour is in top form."—Kirkus Reviews Here is the kind of authentically detailed epic novel that has become Louis L'Amour's hallmark. It is the compelling story of U.S. Air Force Major Joe Mack, a man born out of time. When his experimental aircraft is forced down in Russia and he escapes a Soviet prison camp, he must call upon the ancient skills of his Indian forebears to survive the vast Siberian wilderness. Only one route lies open to Mack: the path of his ancestors, overland to the Bering Strait and across the sea to America. But in pursuit is a legendary tracker, the Yakut native Alekhin, who knows every square foot of the icy frontier—and who knows that to trap his quarry he must think like a Sioux.

Once upon a time there were two cats: one black as tar, one white as snow. They are pals, but always squabble over which one is the prettier cat. One day their curiosity gets the best of them, and they jump into buckets of paint to change color—turning their whole world topsy turvy! After some playful chaos, they soon learn their lesson and rekindle their friendship. Ayin Hillel's bouncy rhymes and Shimrit Elkanati's endearingly cute drawings combine to tell a charming tale of friendship and folly. A Tale of Two Cats is a lovingly crafted comics story that will enchant early readers and their parents.

The human mind needs monsters. In every culture and in every epoch in human history, from ancient Egypt to modern Hollywood, imaginary beings have haunted dreams and fantasies, provoking in young and old shivers of delight, thrills of terror, and endless fascination. All known folklores brim with visions of looming and ferocious monsters, often in the role as adversaries to great heroes. But while heroes have been closely studied by mythologists, monsters have been neglected, even though they are equally important as pan-human symbols and reveal similar insights into ways the mind works. In *Monsters: Evil Beings, Mythical Beasts, and All Manner of Imaginary Terrors*, anthropologist David D. Gilmore explores what human traits monsters represent and why they are so ubiquitous in people's imaginations and share so many features across different cultures. Using colorful and absorbing evidence from virtually all times and places, *Monsters* is the first attempt by an anthropologist to delve into the mysterious, frightful abyss of mythical beasts and to interpret their role in the psyche and in society. After many hair-raising descriptions of monstrous beings in art, folktales, fantasy, literature, and community ritual, including such avatars as Dracula and Frankenstein, Hollywood ghouls, and extraterrestrials, Gilmore identifies many common denominators and proposes some novel interpretations. *Monsters*, according to Gilmore, are always enormous, man-eating, gratuitously violent, aggressive, sexually sadistic, and superhuman in power, combining our worst nightmares and our most urgent fantasies. We both abhor and worship our monsters: they are our gods as well as our demons. Gilmore argues that the immortal monster of the mind is a complex creation embodying virtually all of the inner conflicts that make us human. Far from being something alien, nonhuman, and outside us, our monsters are our deepest selves.

This volume examines different forms of language and dialect discrimination on U.S. campuses, where relevant protections in K-12 schools and the workplace are absent. Real-world case studies at intersections with class, race, gender, and ability explore pedagogical and social manifestations and long-term impacts of this prejudice between and among students, faculty, and administrators. This book will be useful for students in courses in language and power, and language variety, among others; researchers in sociolinguistics, education, identity, and social justice; and diversity officers looking to understand and – with chapters by Walt Wolfram and Christina Higgins – combat this bias.

What does popular culture's relationship with cyborgs, robots, vampires and zombies tell us about being human? Insightful scholarly perspectives shine a light on how film and television evince and portray the philosophical roots, the social ramifications and the future visions of a posthumanist world.

Gruesome Spectacles tells the sobering history of botched, mismanaged, and painful executions in the U.S. from 1890 to the present. Since the book's initial publication in 2014, the cruel and unusual executions of a number of people on death row, including Clayton Lockett in Oklahoma and Joseph Wood in Arizona, have made headlines and renewed vigorous debate surrounding the death penalty in America. Austin Sarat's book instantly became an essential resource for citizens, scholars, and lawmakers interested in capital punishment—even the Supreme Court, which cited the book in its recent opinion, *Glossip v. Gross*. Now in paperback, the book includes a new preface outlining the latest twists and turns in the death penalty debate, including the recent galvanization of citizens and leaders alike as recent botched executions have unfolded in the press. Sarat argues that unlike in the past, today's botched executions seem less like inexplicable mishaps and more like the latest symptoms of a death penalty machinery in disarray. *Gruesome Spectacles* traces the historical evolution of methods of execution, from hanging or firing squad to electrocution to gas and lethal injection. Even though each of these technologies was developed to "perfect" state killing by decreasing the chance of a cruel death, an estimated three percent of all American executions went awry in one way or another. Sarat recounts the gripping and truly gruesome stories of some of these deaths—stories obscured by history and to some extent, the popular press.

CNN host and best-selling author Fareed Zakaria argues for a renewed commitment to the world's most valuable educational tradition. The liberal arts are under attack. The governors of Florida, Texas, and North Carolina have all pledged that they will not spend taxpayer money subsidizing the liberal arts, and they seem to have an unlikely ally in President Obama. While at a General Electric plant in early 2014, Obama remarked, "I promise you, folks can make a lot more, potentially, with skilled manufacturing or the trades than they might with an art history degree." These messages are hitting home: majors like English and history, once very popular and highly respected, are in steep decline. "I get it," writes Fareed Zakaria, recalling the atmosphere in India where he grew up, which was even more obsessed with getting a skills-based education. However, the CNN host and best-selling author explains why this widely held view is mistaken and shortsighted. Zakaria eloquently expounds on the virtues of a liberal arts education—how to write clearly, how to express yourself convincingly, and how to think analytically. He turns our leaders' vocational argument on its head.

American routine manufacturing jobs continue to get automated or outsourced, and specific vocational knowledge is often outdated within a few years.

Engineering is a great profession, but key value-added skills you will also need are creativity, lateral thinking, design, communication, storytelling, and, more than anything, the ability to continually learn and enjoy learning—precisely the gifts of a liberal education. Zakaria argues that technology is transforming education, opening up access to the best courses and classes in a vast variety of subjects for millions around the world. We are at the dawn of the greatest expansion of the idea of a liberal education in human history.

There's been an accident! Something's wrong! She doesn't know who she is, and doesn't know why she's invisibly floating through the buildings and grounds of a half-remembered boarding school. Then, to her horror, she encounters the ancient evil that four peculiar sisters have unwittingly woken -- and learns she is their only hope against a deadly danger. A ghost, uncertain of her identity, watches the four Melford sisters hatch a plan to get their parents' attention and slowly becomes aware of the danger from a supernatural power unleashed by the girls and their friends from the boys boarding school run by the Melfords. The house next door to the Kennedys appears to be haunted by an all-pervasive evil, and the couple watches as a succession of owners becomes engulfed by the sinister force, until the Kennedys set out to destroy the house themselves.
