Jonathan Y. Tsou examines and defends positions on central issues in philosophy of psychiatry. The positions defended assume a naturalistic and realist perspective and are framed against skeptical perspectives on biological psychiatry. Issues addressed include the reality of mental disorders; mechanistic and disease explanations of abnormal behavior; definitions of mental disorder; natural and artificial kinds in psychiatry; biological essentialism and the projectability of psychiatric categories; looping effects and the stability of mental disorders; psychiatric classification; and the validity of the DSM's diagnostic categories. The main argument defended by Tsou is that genuine mental disorders are biological kinds with harmful effects. This argument opposes the dogma that mental disorders are necessarily diseases (or pathological conditions) that result from biological dysfunction. Tsou contends that the broader ideal of biological kinds offers a more promising and empirically ascertainable naturalistic standard for assessing the reality of mental disorders and the validity of psychiatric categories.

General questions of the literary as, e.g., the relation between literature and reality, truth and fiction, the dependency of author, narrator, and figure, or issues of individual and cultural styles etc., can be studied preeminently in the autobiographical genre. Yet, the tradition of life-writing has, in the course of literary history, developed manifold types and forms. Especially in the globalized age, where the media and other technological / cultural factors contribute to a rapid transformation of lifestyles, autobiographical writing has maintained, even enhanced, its popularity and importance. By conceiving autobiography in a wide sense that includes memoirs, diaries, self-portraits and autofiction as well as media transformations of the genre, this three-volume handbook offers a comprehensive survey of theoretical approaches, systematic aspects, and historical developments in an international and interdisciplinary perspective. While autobiography is usually considered to be a European tradition, special emphasis is placed on the modes of self-representation in non-Western cultures and on inter- and transcultural perspectives of the genre. The individual contributions are closely interconnected by a system of cross-references. The handbook addresses scholars of cultural and literary
