Speed in acquiring the knowledge and skills to perform tasks is crucial. Yet, it still ordinarily takes many years to achieve high proficiency in countless jobs and professions, in government, business, industry, and throughout the private sector. There would be great advantages if regimens of training could be established that could accelerate the achievement of high levels of proficiency. This book discusses the construct of 'accelerated learning.' It includes a review of the research literature on learning acquisition and retention, focus on establishing what works, and why. This includes several demonstrations of accelerated learning, with specific ideas, plans and roadmaps for doing so. The impetus for the book was a tasking from the Defense Science and Technology Advisory Group, which is the top level Science and Technology policy-making panel in the Department of Defense. However, the book uses both military and non-military exemplar case studies. It is likely that methods for acceleration will leverage technologies and capabilities including virtual training, cross-training, training across strategic and tactical levels, and training for resilience and adaptivity. This volume provides a wealth of information and guidance for those interested in the concept or phenomenon of "accelerating learning"— in education, training, psychology, academia in general, government, military, or industry.

achieve a state of mind that will leave you focused and ready to learn. The brain is a wonderful machine - a muscle that tends to get stronger as you use it. In order for it to function perfectly, it is necessary to exercise and stimulate it. In this book, you will also learn some techniques to strengthen your brain and thus be able to use all your ability to learn more and faster. You'll also learn which habits impair your mental development and how to control stress, to prevent it from stopping you when taking a test. In a world where information doubles on the planet every six months, learning will be an increasingly necessary and urgent ability. In Accelerated Learning you will read about: Creating an internal learning environment Teaching your mind how to absorb as much information in a minimum amount of time Decrease criticism to flow the achievement potential Strengthen self-esteem and self-overcoming capacity Learning how to take notes in order to summarize all the necessary information - Mind maps Using your brain resources to improve memorization Robert Dilts's - from NLP - and Tim Gallwey's - from Coaching - researches on the learning process show that learning can be real fun. Mihály Csíkszentmihályi - a Hungarian psychiatrist - states that the mind enters a state of "flow" that leads the person to feel fuller and fuller. Besides being a necessity, developing the capacity to learn is a way to generate more satisfaction, because it leaves the apprentice in a state of ecstasy superior to any fleeting pleasure. When the human being overcomes the limits and manages to master a concept, solve a math problem, find a puzzle, master an instrument, write poetry, play a sport or any activity that requires overcoming, they can actually feel happiness. Your potential is the natural and innate ability to learn; interference is the biased internal dialogue, generally, a derogatory judgment. It's the inner voice that stops your potential.

Interferences can also be hindering beliefs that often keep hammering the unconscious mind unnoticed. They may be phrases like, "I cannot", "I do not deserve this", "It's too hard for me". The success lies in teaching the mind to turn off the "must" button. The word "has to" increases adrenaline production, which decreases creative ability. Be More Creative To Achieve Excellence This book will show you how you can use the power of your mind and learn things in a better way. Enjoy! Success is not determined by your IQ alone. The people who reach the highest level of success know the value of education. However, they also do not spend their time staring at learning material or reading. They are accelerated learners who comprehend information on a deeper level, using certain techniques to help them retain information permanently. Accelerated learning is about learning to focus while you learn, helping you understand the material on a deeper level. You will also learn how to recall the information when you need to access it. Within the pages of this book, you will find actionable, practical tips to accelerated learning. These steps will guide you through the process of accelerated learning, helping you learn any topic with ease. Some of the information that will be covered in this book includes: How accelerated learning can be used to benefit your life Determining your learning style and best use it for accelerated learning Setting the environment for learning How to do full-brain learning Storing information in the brain for easy recollection Using a mind palace to store information Reviewing and recalling the information you have learned Becoming an accelerated learner is a learning process. With time, it will almost seem effortless compared to the work put in at first. You will find yourself with a deeper understanding of all that you learn, improved memory retention, and a newfound interest in life.

This work offers nine principles for brain-based approaches to accelerating learning, improving motivation and raising achievement. It offers the reader a coherent structure and describes: guaranteed ways to motivate learners; esteem-building tools for schools, teachers and parents; how to access and teach to different types of intelligence; and 17 different ways in which schools can make accelerated learning work.

We live in an era when the unprecedented speed of change means: The only certainty is uncertainty; you can't predict what skills will be

useful in ten years time; in most professions knowledge is doubling every two or three years; and no job is forever--so being employable means being flexible and retraining regularly. Accelerated Learning into the 21st Century contains a simple but proven plan that delivers the one key skill that every working person, every parent and student must master, and every teacher should teach: it's learning how to learn. The theory of eight multiple intelligences (linguistic, logical-mathematical, visual-spatial, kinesthetic, musical, interpersonal, intrapersonal, and naturalist) developed by Howard Gardner at Harvard University provides a foundation for the six-step MASTER-Mind system to facilitate learning (an acronym for Mind, Acquire, Search, Trigger, Exhibit, and Review), and is enhanced by the latest findings on the value of emotion and memory on the process of learning. Combined with motivational stories of success applying these principles, and putting forth a clear vision of how the United States can dramatically improve the education system to remain competitive in the next century, Accelerated Learning into the 21st Century is a dynamic tool for self-improvement by individuals as diverse as schoolchildren and corporate executives. The Secrets About Learning The Best Way Is Finally Revealed! Learn a new talent, stay relevant, reinvent yourself, and adapt to whatever the workplace throws your way. Ultralearning offers nine principles to master hard skills quickly. This is the essential guide to future-proof your career and maximize your competitive advantage through self-education. In these tumultuous times of economic and technological change, staying ahead depends on continual self-education—a lifelong mastery of fresh ideas, subjects, and skills. If you want to accomplish more and stand apart from everyone else, you need to become an ultralearner. The challenge of learning new skills is that you think you already know how best to learn, as you did as a student, so you rerun old routines and old ways of solving problems. To counter that, Ultralearning offers powerful strategies to break you out of those mental ruts and introduces new training methods to help you push through to higher levels of retention. Scott H. Young incorporates the latest research about the most effective learning methods and the stories of other ultralearners like himself—among them Benjamin Franklin, chess grandmaster Judit Polgár, and Nobel laureate physicist Richard Feynman, as well as a host of others, such as little-known modern polymath Nigel Richards, who won the French World Scrabble Championship—without knowing French. Young documents the methods he and others have used to acquire knowledge

Develop the Skills to Learn Anything Faster, Easier, and More Effectively Written by the creators of the #1 bestselling course of the same name, this book will teach you how to "hack" your learning, reading, and memory skills, empowering you to learn everything faster and more effectively. What Would You Do If You Could Learn Anything 3 Times Faster? In our rapidly changing and information-driven society, the ability to learn quickly is the single most important skill. Whether you're a student, a professional, or simply embarking on a new hobby, you are forced to grapple with an every-increasing amount of information and knowledge. We've all experienced the frustration of an ever-growing reading list, struggling to learn a new language, or forgetting things you learned in even your favorite subjects. This Book Will Teach You 3 Major Skills: Speed reading with high (80%+) comprehension and understanding Memory techniques for storing and recalling vast amounts of information quickly and accurately Developing the cognitive infrastructure to support this flood of new information long-term However, the SuperLearning skills you'll learn in this course are applicable to many aspects of your every day life, from remembering phone numbers to acquiring new skills or even speaking new languages. Anyone Can Develop Super-Learning Skills This course is about improving your ability to learn new skills or information quickly and effectively. We go far beyond the kinds of "speed reading" (or glorified skimming) you may have been exposed to, diving into the actual cognitive and neurological factors that make learning easier and more successful. We also give you advanced memory techniques to grapple with the huge loads of information you'll soon be able to process. "This book should be the go-to reference for anyone looking to upgrade their mind's firmware!" -Benny Lewis, Language Learning Expert Learn How to Absorb and Retain Information in a Whole New Way - A Faster, Better Way The Authors' Proprietary Method for Teaching Speed Reading & Memory Improvement You may have even taken a normal speed reading course in the past, only to realize that you didn't retain anything you read. The sad irony is that in order to properly learn things like speed reading skills and memory techniques in the past, you had to read dozens of books and psychological journals to decode the science behind it. Or, you had to hire an expensive private tutor who specializes in SuperLearning. That's what I did. And it changed my life. Fortunately, my co-authors (experts and innovators in the fields of superlearning, memory improvement, and speed reading) agreed to help me transform their materials into the first ever digital course. Over 25,000 satisfied students later, we have transformed our course into a book you can enjoy anywhere. Our teaching methodology relies heavily on at-home exercises. The chapters themselves are only part of what you're buying. You will be practicing various exercises and assignments on a regular basis over the course a 7 week schedule. In addition to the lectures, there are hours of supplemental video and articles which are considered part of the curriculum. "This vital book contains all the tools needed to learn, memorize, and reproduce anything you want with the joy that ease brings. Don't take another class until you've read it!" -Dr. Anthony Metivier, Author & Memory Expert If you wish to improve memory and concentration, learn more effectively, read faster, and learn the techniques of memory champions - look no further! An awesome read that will push the limits of your brain. Levi does an incredible job of guiding you through, to bring your brain from average to UNSTOPPABLE!" -Nelson Dellis, 4-Time USA Memory Champion

Make learning: painless, exciting, habitual, and self-motivating. Absorb info like a human sponge. We've never been taught how to learn, and that's a shame. This book is the key to reversing all the misconceptions you have and making learning fun again. Scientifically-proven, step-by-step methods for effective learning. The Science of Accelerated Learning is not a textbook - it's a guidebook for your journeys in learning.

The following topics are included in this 3-book combo: Book 1: Many people underestimate the value of awareness and consciousness when it comes to learning. Keeping information in that big brain of yours can be challenging if you don't apply the right methods to do so. For you to learn how to learn, or to remember what you have observed, it's mandatory that you trigger your senses to retain information faster and more efficiently. This can be done by understanding the topics in this book, which include using the said awareness to take in information at a faster pace, and using visual means to support you. Do you use flashcards, computer games, or other studying techniques? These will all be addressed. Book 2: Many people struggle with learning. They either take too long or don't retain the information they have learned. Here, you will learn more about how to improve all that. The author will take you through a study of learning styles, teaching yourself instead of having to be taught, and the best ways to study harder, faster, and more effectively. The book touches on memorization techniques and poses the question if those techniques are good or bad for learning. The details in this book can definitely help you with your desire to become better at studying and remembering things.

Your mind will be sharper, clearer and faster than you've ever experienced it before. Discover how to learn with these accelerated techniques. Get the guide and start learning! Book Sample: The basis of this book is on the general inclusive idea that we all possess the potential to succeed, but the majority of us only utilize a minor fraction of our minds and potential. Creative thinking and time are essential factors in recent times, and mastering the art of learning is the most important skill, with the brain as the major organ involved. We only begin to flourish when we start to learn faster and more efficiently. Almost all of us have little understanding of the key role our minds play in maximizing our productivity; we are not trained on how to learn or how to employ our learning skills. Although much has been discovered in the previous decades about the brain and its mechanism of action, these discoveries have superseded every other discovery about the brain. Very little of this knowledge is still applied in our personal and daily lives. It is entirely possible for all of us to learn speedily, be more resourceful at work, and be more accomplished. It translates our knowledge of how the brain works into beneficial knowledge for the workplace. It is a well-established fact that intelligence is multifaceted and not set at birth. It derives inspiration from the widest range of subject field-from psychology to neuroscience, theories of motivation to advanced learning, and memory to nutrition. Learning is an acquired skill. Acquiring the skills to learn is a kind of "learnacy" we all need. Our Book Covers the following topics: Accelerated Learning Techniques Accelerated Learning Accelerated Learning Mastery Cognitive Behavioral Therapy Emotional Intelligence 2.0 Accelerated Learning Memory Memory Improvement

Imagine that you could pick up a manual or a book and learn everything inside it within a matter of hours. Imagine having the freedom to gather all the knowledge you've ever desired and parse it without missing a beat. Imagine that no learning was beyond your ability. It may sound like a wonderful dream but, for some people, it's a basic reality. Those who have discovered advanced learning techniques are able to learn new information and store it away in their minds - and they can do so faster, more effectively and with less effort than their peers. You've picked up this book because you, too, want to be able to enhance your memory and improve your learning skills. You want your brain to work at its optimum capacity and to unlock and make use of the deepest recesses of your memory. Perhaps you struggled at school, finding it impossible to store away all those names and dates your teacher thought were so important. Maybe you feel frustrated trying to further your career, convinced that you don't have it in you to learn those new skills that keep appearing on the horizon. The human brain is a mysterious and beautiful thing. It is not fixed and unchangeable; it has a never ending capacity to grow and improve. To make that happen, you need only follow the same instructions that fitness instructors have for your body. Keep exercising it and giving it the correct fuel and it will perform for you to the best of its ability. In this book, you'll discover time honored and scientifically tested methods to improve your brain power. Together, we will work on both your memory and your learning skills, the two cornerstones of your ability to learn and understand anything and everything you have a mind to. It all starts with learning skills: the ability to gather and acquire new information and fully understand it as you do. At the other end of the equation is your memory, where this new learning will be stored away until you need it alongside all the other skills and facts you've gathered in your life. The stronger your learning skills, the more treasure you can add to the trove. The more advanced the trove, the better you can organize that treasure, make connections between the items inside and use what you have available to you to make connections and innovate with your ideas. What you are about to experience is a whole new way of thinking and learning. That may sound daunting, but as you progress through this book, you'll discover that it's easier than it seems. Once this ball begins rolling, your momentum will gather until Einstein himself would be proud of you. Shall we jump straight in?

Volume One teaches how to think like a native Spanish speaker and gives the vocabulary that makes up 50% of the Spanish language.

If You Want To Know How To Master Any Skill With Ease And Become A Learning Prodigy, Then Keep Reading. Many of us would agree that the role of our schooling system is to help the students to develop knowledge and skills that are crucial for their disciplines. However, little is taught about the learning process and the challenges that they face. Their performances are only rated through tests and exams without evaluating the effort to acquire and internalize the necessary information. Even if two students scored equally at the same test, their "return-on-time-investments" can differ greatly if student one invested eight hours while student two was able to process the required information in two hours. Imagine if you could double or even triple your return-on-time-investment. Imagine the additional time that you could spend with your family, your kids, or friends. While you will still have to do the hard lifting work of learning a new skill, this book will help you to cut your invested time in half or more. Based on the distillate of accelerated learning, cognitive psychology, speed reading, knowledge processing, and advanced retention techniques, this book will give you proven learning strategies used by some of the greatest minds on the planet. You will discover pragmatic and actionable guidelines that will bring you a huge step closer to becoming a learning prodigy. Discover a secret blueprint to become an information processing machine. Discover simple yet decisive techniques to sharpen your learning instincts. Cut thorough complexity with a proven toolbox conventional schools won't tell you. Discover the one easy technique to master complexity. Save your valuable time by processing information 2-3 times faster. Double your reading speed and finish books within half of the time. Dramatically improve your short- and long-term memory. And much, much more. Because theory without practice is nothing, each chapter incorporates practical exercises to put your knowledge into action. This book will give you the tools and steps to bring your learning capacities to the next level, even if you already failed before.
