This new edition of bestselling textbook Introducing Property Valuation provides students with a comprehensive introduction to the concepts and methods of valuing real estate, helping them to progress successfully from basic principles to a more sophisticated understanding. Taking a practically oriented rather than purely theoretical approach, the textbook equips readers with the skills to undertake their own valuation calculations. Fully updated to reflect recent developments in regulation and practice, experienced tutor and valuer Michael Blackledge demonstrates how the principles can be applied in professional practice in line with the requirements and guidance provided by the International Valuation Standards Council and the Royal Institution of Chartered Surveyors. Online material accompanies the new edition with Q&As and pre-programmed excel spreadsheets enabling students to prepare their own calculations. The five traditional methods of valuation are outlined and the practical applications of the two main approaches, the comparison and investment methods, are fully explored. The use of discounted cash

flow and quarterly in advance calculations, topics which are not always adequately covered elsewhere, are also explained. Accessibly written with a full range of worked examples, case studies, clear chapter summaries and extensive further reading suggestions, this book is essential for any student of real estate and its valuation.

Accounting: Building Business Skills 4th edition continues to provide students and academics with a well written and accessible textbook, with ample illustrations and applications to business, for a first course in accounting. The text is unique in the way it balances a "user" and "preparer" perspective and integrates real financial information to illustrate business decision choices and how decisions are made using accounting information. The pedagogical approach presented in the text has been tried and tested over many years, and provides a constructive framework for students to learn fundamental accounting concepts and processes. Through the use of real company information and financial statements students will quickly appreciate the use of accounting information. The textbook clearly outlines to students how to account for typical business transactions and prepare financial statements - such as a balance sheet, income statement, and statement of cash flows - that communicate the financing, operating, and investing activities of a business. Whether a student is required to study one accounting subject, as part of a wider business degree, or undertake a major study of accounting the text builds a strong conceptual understanding of accounting and will develop skills that can be applied to an accounting and business environment. The integral role of financial statements for decision making is also emphasised in this text and is reinforced throughout by the Decision Toolkit in each chapter. Students are provided with an extensive set of tools necessary to make business decisions based on financial information. The fourth edition is designed to engage and educate students.

Accounting Information Systems provides a comprehensive knowledgebase of the systems that generate, evaluate, summarize, and report accounting information. Balancing technical concepts and student comprehension, this textbook introduces only the most-necessary technology in a clear and accessible style. The text focuses on business processes and accounting and IT controls, and includes discussion of relevant aspects of ethics and corporate governance. Relatable real-world examples and abundant end-of-chapter resources reinforce Accounting Information Systems (AIS) concepts and their use in day-to-day operation. Now in its fourth edition, this popular textbook explains IT controls using the AICPA Trust Services Principles framework—a comprehensive yet easy-to-understand framework of IT controls—and allows for incorporating hands-on learning to complement theoretical concepts. A full set of pedagogical features enables students to easily comprehend the material, understand data flow diagrams and document flowcharts, discuss case studies and examples, and successfully answer end-of-chapter questions. The book's focus on ease of use, and its straightforward presentation of business processes and related controls, make it an ideal primary text for business or accounting students in AIS courses.

The Demo Docs System of instruction replicates the classroom experience by providing more "I get it" moments outside of class. We've talked to tons of POA instructors and our editors have even taken the accounting course (numerous times!) to figure out the following issue in this course that is consistent: Students understand (or "get it") right after you do a problem in class, but as soon as they leave class, with each passing hour, their ability to do the problems again and complete their homework diminishes to the point of them either having to come to office hours to get help, or they just quit and get behind in the course. On top of this, you can end up getting behind in the course as well, in order to keep everyone on track. The Demo Docs system helps to recreate the "I get it" moments outside of class-keeping both you and the students on track.
