Chapter 20: Goodwill and Other Intangible Assets includes a comprehensive examination of all current accounting literature bearing on the financial reporting of intangible assets, with a new emphasis on the intellectual property rights that are increasingly the foundation for business operations. Chapter 50: Cost-Volume-Revenue Analysis for Nonprofit Organization. Ideally, breaking even is a potential targeted goal of a nonprofit organization. If you generate a surplus over a number of periods, donors or funding agents may question your need for the funds, and they may be curtailed. On the other hand, operating at a long term deficit, the nonprofit may become insolvent or unable to perform the desired level of services. It is a delicate balancing act. Cost-volume-revenue (CVR) analysis, together with cost behavior information and budgeting, can assist nonprofit managers in performing many useful planning analyses.
