A fascinating exploration of the connection between profit making and morality, this book illustrates how modern accounting had its roots in the sacrament of confession. Double-entry bookkeeping (DEB), modern capitalism's first and foremost calculative technology, was "invented" during the Middle Ages when profit making was morally stigmatized. James Aho examines the problematic of moneymaking and offers an explanatory understanding of the paradoxical coupling of profit seeking and morality by situating DEB in the religious circumstances from which it emerged, specifically the newly instituted sacrament of penance, that is, confession. Confession impacted the consciences of medieval businessmen both through its sacramental form and through its moral teachings. The form of confession produced widespread habits of moral scrupulosity (leading to compulsive record keeping); the content of confession taught that commerce itself was morally suspect. Scrupulous businessmen were thus driven to justify their affairs to church, commune, and themselves. With the aid of DEB, moneymaking was "Christianized" and Christianity was made more amenable to the pursuit of wealth. Although DEB is typically viewed exclusively as a scientifically neutral account of the flow of money through a firm, it remains as it was originally devised, a rhetorical argument. James Aho is Professor of Sociology at Idaho State University and is the author of many books, including *The Things of the World: A Social Phenomenology* and *The Orifice as Sacrificial Site: Culture, Organization, and the Body*.

"Illuminate[s] the complexities of the human brain and the mysteries of the human mind." —The New York Times To many people, hallucinations imply madness, but in fact they are a common part of the human experience. These sensory distortions range from the shimmering zigzags of a visual migraine to powerful visions brought on by fever, injuries, drugs, sensory deprivation, exhaustion, or even grief. Hallucinations doubtless lie behind many mythological traditions, literary inventions, and religious epiphanies. Drawing on his own experiences, a wealth of clinical cases from among his patients, and famous historical examples ranging from Dostoevsky to Lewis Carroll, the legendary neurologist Oliver Sacks investigates the mystery of these sensory deceptions: what they say about the working of our brains, how they have influenced our folklore and culture, and why the potential for hallucination is present in us all.

Jarrett would go on to become a trusted friend and advisor to Michelle and Barack Obama -- and one of the most visible, influential African-American women of the twenty-first century. Now, in her forthright and optimistic memoir, Jarrett shares her experience as a mother, daughter, and woman who's experienced the magic that happens once we cast aside any unrealistic expectations of a perfect life or a perfect outcome. In Finding My Voice, she offers a galvanizing testament to the power in staying open to a change in course and an embrace of the uncomfortable. Only then, she argues, can we move forward together and truly learn to value--and listen to--our own voices.
