This volume is devoted to management accounting approaches for analyzing business benefits and costs of climate change. It discusses future directions on carbon accounting, performance measurement and reporting as well as links between climate accounting and business processes, product and service development, supply chain innovation, economic successes and stakeholder relations. Companies are increasingly called on to contribute to combatting climate change and also face the challenges presented by climate-change related costs, risks and benefits. Risks can result from unpredictable weather conditions and government regulations, such as the EU emission trading system and new building codes. Climate change also offers numerous opportunities, such as energy efficiency innovations and carbon neutral products and production. Good management requires that carbon emissions are tracked and climate-related costs, risks and benefits are identified, measured and assessed. As such, research addressing corporate accounting frameworks and tools is of increasing importance when it comes to managing these carbon and climate-related issues.

This book contains peer reviewed papers accepted for presentation at the National Conference on Advances in Environmental Science & Technology. Topics include environmental regulations, groundwater remediation technologies, waste to energy, climate

change, economics, environmental justice, fate and transport of contaminants, food bio-processing, innovative environmental technologies, sustainable energy and water resources and waste management. Federal agencies, private agencies and university professors set the stage for the September 12, 2013 National Conference on Advances in Environmental Science and Technology. The purpose of the National Conference on Advances in Environmental Science and Technology which was held in Greensboro, North Carolina, was to provide a forum for agencies to address advances in environmental science and technology including problems, solutions and research needs.

The Stress Test Every Business Needs A Capital Agenda for Confidently Facing Digital Disruption, Difficult Investors, Recessions and Geopolitical Threats John Wiley & Sons UK GAAP 2019 provides a comprehensive guide to interpreting and implementing UK accounting standards, particularly: FRS 100: Application of Financial Reporting Requirements FRS 101: Reduced Disclosure Framework — Disclosure exemptions from EU-adopted IFRS for qualifying entities FRS 102: The Financial Reporting Standard applicable in the UK and Republic of Ireland FRS 103: Insurance Contracts FRS 104: Interim Financial Reporting This book is an essential tool for anyone applying, auditing, interpreting, regulating, studying or teaching those accounting standards. Written by the financial reporting professionals from the Financial Reporting Group of EY, this book provides a clear explanation of the UK GAAP accounting requirements which apply in 2019 and will prove invaluable in implementing these requirements. It also addresses the requirements of the UK Companies Act and relevant statutory instruments, as well as practical worked examples. Also available is International GAAP® 2019 — a three volume comprehensive guide to interpreting International Financial Reporting Standards (IFRS), setting IFRS in a relevant business context and providing insight into how complex practical issues should be resolved in the real world of global financial reporting.

This book provides a comprehensive treatment of the role of the private sector in accelerating the transition to a low-carbon, climate-resilient, and inclusive world. In the lead up to and since the historic Paris Agreement on climate change, more than 6,000 companies from 120 countries representing more than \$36.5 trillion in revenue have made climate commitments. Examining this trend, *The New Corporate Climate Leadership* provides a clear synthesis of the relationship between the real economy and climate change and offers a state-of-the-art assessment of corporate initiatives that focus on greenhouse gas emissions reductions and the management of climate risk through enhanced resilience. It debates the relative merits of incremental and sequenced ambition versus radical systems change – including a critique of the prevailing capitalist approach to climate change – and provides an actionable guide to skills development for change-makers in the shift toward a low-carbon world. Drawing on perspectives from leading thinkers inside the private sector, across government, and within civil society to truly interrogate the scale, scope, and speed of progress, this book provides a clear vision for what the next generation of corporate climate leadership should look like. Optimistic in tone, this book will be of great interest to students, scholars, and practitioners of climate change and sustainable business.

Understanding the main concepts of IFRS Standards The fourth edition of *Applying IFRS Standards* explains the core principles of International Financial Reporting (IFRS) Standards. It also addresses the skills needed to apply the standards in business environments. The book begins with an overview of the International Accounting

Standards Board (IASB) and how it establishes accounting standards. The general book topics are then covered in detail and include: income taxes, financial instruments, fair value measurement, property, inventories, employee benefits and more. Discussion questions, exercises and references are provided throughout the book.

Future-proof your business today for stronger performance tomorrow The Stress Test Every Business Needs: A Capital Agenda for Confidently Facing Digital Disruption, Difficult Investors, Recessions and Geopolitical Threats provides a comprehensive approach to creating value and flexibility in an increasingly volatile business environment that presents both great risks and opportunities every day. The authors extend the banking “stress test” concept to a company’s Capital Agenda — how executives manage capital, execute transactions and apply corporate finance tools to strategic and operational decisions. Having a static Capital Agenda, however appropriate for your current market position, is not enough in today’s uncertain world. Long-term success comes from building resilience into each element and in the way those elements interact. The book uses a broader definition of business stress that includes traditional macroeconomic and geopolitical risks, as well as technological disruption, hostile takeovers and activist shareholders. Companies that make poor strategic decisions or underperform operationally will likely find themselves facing great stress. And that stress is symmetric; threats come from downside risks and from missed opportunities. The chapters address the how and why of essential issues such as: Formulating corporate strategy in a digital world Pre-empting activist shareholders Restoring distressed companies to operational and financial health Ensuring effective collaboration among strategy, finance and operations Getting the most out of your advisors Proactively managing intrinsic value Rigorously allocating capital across the enterprise Acquiring and divesting for optimum value Syncing financing decisions with business strategy and capital market conditions Incorporating tax planning throughout the Capital Agenda Liberating excess cash with leading working capital management practices Aligning strategic goals and metrics to reach your company’s full potential Companies that develop strategy and set operational priorities with a balanced Capital Agenda are best positioned to control their own destiny. The Stress Test Every Business Needs provides a roadmap to future-proof your business today for stronger performance tomorrow.

International GAAP 2020 is a comprehensive guide to interpreting and implementing International Financial Reporting Standards (IFRS), setting IFRS in a relevant business context, and providing insights into how complex practical

issues should be resolved in the real world of global financial reporting. This book is an essential tool for anyone applying, auditing, interpreting, regulating, studying, or teaching IFRS. Written by financial reporting professionals from around the world, this guide to reporting under IFRS provides a global perspective, clearly explaining complex technical accounting issues and setting IFRS in a practical context. Numerous worked examples and hundreds of illustrations from the published financial reports of major listed companies from around the world are included. The 2020 edition has been fully revised and updated with information on the latest IFRS changes and current issues.

This technical note and manual (TNM) explains what accrual accounting means for the public sector and discusses current trends in moving from cash to accrual accounting. It outlines factors governments should consider in preparing for the move and sequencing of the transition. The note recognizes that governments considering accounting reforms will have different starting points across the public sector, different objectives, and varying coverage of the existing financial statements, it therefore recommends that governments consider each of these, and the materiality of stocks, flows and entities outside of government accounts when planning reforms and design the sequencing and stages involved accordingly. Building on international experiences, the note proposes four possible phases for progressively increasing the financial operations reported in the balance sheet and operating statement, with the ultimate aim of including all institutional units under the effective control of government in fiscal reports.

Focussing on the dominance of the Big Four auditing firms – PwC, EY, Deloitte and KPMG – this concise volume provides an authoritative critical assessment of the state and future of the audit market, currently the subject of much debate and the focus of significant government enquiries. Drawing on extensive research and a vast collection of evidence from interviews with insiders, experts and users, it explores the key issues of audit quality, independence, choice and the growing expectation gap. Just as disruptive technologies are overturning other established sectors, this book explores their impact on accounting, financial reporting and auditing. It questions whether the Big Four-dominated audit market is prepared not only for the inevitable disruption of new technologies, but also the challenges of negative public perceptions, cynicism about regulation and demands for greater transparency. In the context of increasing high-profile corporate failures, this book provides a compelling scrutiny of the industry's failings and present difficulties, and the impact of future disruption. At this crucial time, it will be of great interest to students, researchers and professionals in accounting and auditing, as well as policy makers and regulators.

Value Creation and its effects on Transfer Pricing and tax law Emerging from the OECD/G20 BEPS Project, a new, somewhat fuzzy notion of Value Creation came to permeate not only Transfer Pricing language but also wider allocation rules and anti-abuse provisions in international tax law. The notion of 'Value Creation' reframes the interpretation and application of the Arm's Length Principle (ALP) that is embedded in

Articles 7 and 9 of the OECD Model Convention. This new Value Creation notion and approach assist in understanding key enterprise functions while different industry sectors manifest these concepts in various ways. Situating such notions and this approach within the law of tax treaties and analyzing terms of the OECD Transfer Pricing Guidelines alongside their factual context is the aim of this book. Here, law students address Transfer Pricing and Value Creation in sectors as varied as commodities trade, automotive, consumer products, food and beverages, pharmaceutical and life sciences, telecommunications, and the key topic of value creation in a digitalized economy. Our LL.M. students were required to address issues not explored in legal research and to discuss factual topics relevant for Transfer Pricing. All students focused on topics that are new to the international tax debate that keep evolving and on factual matters that often escape legal research.

International GAAP® 2019 is a comprehensive guide to interpreting and implementing International Financial Reporting Standards (IFRS), setting IFRS in a relevant business context and providing insights into how complex practical issues should be resolved in the real world of global financial reporting. This book is an essential tool for anyone applying, auditing, interpreting, regulating, studying or teaching IFRS. Written by EY's financial reporting professionals from around the world, this three-volume guide to reporting under IFRS provides a global perspective on the application of IFRS. Complex technical accounting issues are explained clearly and IFRS is set in a practical context with numerous worked examples and hundreds of illustrations from the published financial reports of major listed companies from around the world. The 2019 edition of International GAAP® has been fully revised and updated in order to:

- Continue to investigate the many implementation issues arising as entities adopt IFRS 9 (Financial Instruments) and IFRS 15 (Revenue from Contracts with Customers).
- Explore the complex implementation issues arising as entities adopt, in 2019, IFRS 16 (Leases).
- Include an updated chapter on the new insurance contracts standard IFRS 17 (Insurance Contracts), which reflects the recent discussions of the IASB's Transition Resource Group on implementation issues raised, proposed narrow-scope amendments to IFRS 17 intended by the IASB, and also explores other matters arising as users prepare for the adoption of this standard.
- Include an amended chapter on the revised Conceptual Framework, which was published in March 2018. The changes to the Conceptual Framework may affect the application of IFRS in situations where no standard applies to a particular transaction or event.
- Address amended standards and new interpretations issued since the preparation of the 2018 edition.
- Explain the many other initiatives that are currently being discussed by the IASB and by the IFRS Interpretations Committee and the potential consequential changes to accounting requirements.
- Provide insight on the many issues relating to the practical application of IFRS, based on the extensive experience of the book's authors in dealing with current issues.

Discover how the author transformed a massive government department in just a few years and fixed seemingly unfixable problems In *Transforming a Federal Agency: Management Lessons from HUD's Financial Reconstruction*, finance and strategy expert Irving (Irv) L. Dennis delivers an insightful and eye-opening exploration of the lessons he learned in bringing private sector experience to the transformation of the US Department of Housing and Urban Development's financial systems. Pulled out of

retirement after a 37-year career at Ernst & Young (EY), the author's tenure at HUD involved a rapid and surgical rejuvenation of their financial infrastructure. The book details the ten management areas he focused on and also includes: The transformation process and the barriers and roadblocks the author encountered on his journey Ensuring an enduring transformation even after changes in administration Functional differences between the private sector and governmental organizations How the author approached his first 100 days as Chief Financial Officer of the Department Insights into the innerworkings of the Executive Branch of government Perfect for government employees, finance professionals in the public and private sectors, and business students, Transforming a Federal Agency is a simultaneously fascinating and instructive journey through the remediation of seemingly intractable financial mismanagement.
