"Kennedy is a world class writer."--The New York Times Book Review A brilliant American debut from one of Scotland's most acclaimed writers, named by Granta as one of the Twenty Best Young British Novelists. Emotionally numb, crippled with insomnia, and caught in a frightening, abusive marriage, Helen Brindle believes that God has recently left her. She spends her days performing banal domestic chores in front of a blaring television. On the BBC one day she watches a self-help guru expound on, among other things, the "rules" of masturbation and the importance of "interior lives." Edward G. Gluck, she discovers has developed a program that guides lost souls toward contentment. Helen seeks him out, hoping to find an answer. Instead she discovers Gluck's own sadomasochistic obsession, and his profound shame and disgust. And what they both encounter, painfully, is the love each fears and both yearn to embrace. "A darkly comic tale.... [that] is hilariously funny about sexual obsession and brilliantly perceptive about the dynamics of human relationships."--The Baltimore Sun

A Reader in Medical Anthropology: Theoretical Trajectories, Emergent Realities brings together articles from the key theoretical approaches in the field of medical anthropology as well as related science and technology studies. The editors' comprehensive introductions evaluate the historical lineages of these approaches and their value in addressing critical problems associated with contemporary forms of illness experience and health care. Presents a key selection of both

classic and new agenda-setting articles in medical anthropology Provides analytic and historical contextual introductions by leading figures in medical anthropology, medical sociology, and science and technology studies Critically reviews the contribution of medical anthropology to a new global health movement that is reshaping international health agendas

The memoir of a man and woman who escaped into the forest, joined the Jewish partisans—and fell in love—as Hitler laid waste to their Polish hometowns. Jack and Rochelle first met at a youth dance in Poland before the war. They shared one dance, and Jack stepped on Rochelle's shoes. She was unimpressed. When the Nazis invaded eastern Poland in 1941, both Jack (in the town of Mir) and Rochelle (in the town of Stolpce) witnessed the horrors of ghettoization, forced labor, and mass killings that decimated their families. Jack and Rochelle managed, in their separate ways, to escape into the forest. They reunited, against all odds, in the winter of 1942–43 and became Jewish partisans who fought back against the Nazis. The couple's careful courtship soon blossomed into an enduring love that sustained them through the raging hatred of the Holocaust and the destruction of the lives they had known. Jack and Rochelle's story, told in their own voices through extensive interviews with their son, Lawrence, has been in print for twenty years and is celebrated as a classic of

Holocaust memoir literature. This is the first electronic edition. "A story of heroism and of touching romance in a time of fear and danger." —USA Today

Outcasts from two different worlds... Dragons are meant to be creatures of fire and fury, not salt water and mercy. But Bastian isn't an ordinary dragon. Vector Analysis and Cartesian Tensors, Second Edition focuses on the processes, methodologies, and approaches involved in vector analysis and Cartesian tensors, including volume integrals, coordinates, curves, and vector functions. The publication first elaborates on rectangular Cartesian coordinates and rotation of axes, scalar and vector algebra, and differential geometry of curves. Discussions focus on differentiation rules, vector functions and their geometrical representation, scalar and vector products, multiplication of a vector by a scalar, and angles between lines through the origin. The text then elaborates on scalar and vector fields and line, surface, and volume integrals, including surface, volume, and repeated integrals, general orthogonal curvilinear coordinates, and vector components in orthogonal curvilinear coordinates. The manuscript ponders on representation theorems for isotropic tensor functions,

Cartesian tensors, applications in potential theory, and integral theorems. Topics include geometrical and physical significance of divergence and curl, Poisson's equation in vector form, isotropic scalar functions of symmetrical second order tensors, and diagonalization of second-order symmetrical tensors. The publication is a valuable reference for mathematicians and researchers interested in vector analysis and Cartesian tensors.

"All I want to find is one dinosaur," Daniel was saying. "And I'll find it right here. Like I do all my fossils." Wandering through the Natural History Museum with her grandchildren, Julia Creath feels the presence of her dead brother, Daniel, she remembers a time when fossil fever hit everyone, old and young -- a time when people would kill for those old bones under the ground. Julia becomes the Nebraska farm girl she once was, as she weaves together the story of the great dinosaur rush -- an adventurous tale of love and treachery, but most of all the story of her own childhood, and of the older brother she loved more than anything. Daniel had a dream that Julia shared -- and the she alone would see come true.

Intended as a textbook for undergraduate courses in heat transfer for students of mechanical, chemical, aeronautical, and metallurgical engineering, or as a reference for professionals in industry, this book emphasizes the clear understanding of theoretical concepts followed by practical applications. Treating each subject analytically and then numerically, it provides step-by-step solutions of numerical problems through the use of systematic procedures by a prescribed format. With more than a million users in industry, MATLAB is the most popular computing programming language among engineers. This Second Edition has been updated to include discussions on how to develop programs that solve heat transfer problems using MATLAB, which allows the student to rapidly develop programs that involve complex numerical and engineering heat transfer computations.

Analytical Instrumentation offers powerful qualitative and quantitative techniques for analysis in chemical, pharmaceutical, clinical, food-processing laboratories and oil refineries. It also plays a critical role in the monitoring and control of environment pollution. Over the years, this field has become extremely sophisticated. Today, microcontrollers and personal computers have been integrated into analytical instruments. This has brought in automation, efficiency and precision in analytical instrumentation. To keep users abreast of such advances, this edition of the Handbook of Analytical Instruments describes the principles and building blocks of analytical instrumentation. Recent advances in bio-sensors, gamma spectrometry, electron spin resonance (ESR) spectrometry, visualization methods for electrophoresis and several other tools and techniques of analytical instrumentation have been covered. In order to

ensure that readers make the right decision, in terms of the instrument that best meets their requirements, the book includes a discussion of analytical instruments from various manufacturers. Useful for.....

- ∩ Supervisors and technicians in clinical, pharmaceutical, food-processing laboratories and oil refineries.
- ∩ Personnel concerned with the monitoring and control of environmental pollution
- ∩ Service and maintenance engineers
- ∩ Post-graduate students of physics and chemistry undergoing courses in instrument analysis
- ∩ Students of instrumentation, electronics and chemical engineering

“In this timely and thought-provoking analysis of modern coupledness, Pamela Haag & Perel paints a vivid tableau of the ‘semi-happy’ couple. Written with wit and aplomb, this page-turner will instigate an insurrection against our marital complacency.” —Esther Perel, author of *Mating in Captivity* Written with the persuasive power of Naomi Wolf and the analytical skills of Susan Faludi, Pamela Haag’s provocative but sympathetic look at the state of marriage today answers—and goes beyond—the question many of us are asking: “Is this all there is?”

When ailing companies are on the brink of collapse, the biggest question that owners have is whether a turnaround effort is worth shedding blood, sweat or tears over. Employees and the labour union believe that a turnaround is always possible; all that is required is a change in management. Shareholders will be sceptical and wonder whether further resources should be showered on an under-performing company, preferring to liquidate saleable assets. This book explains how smart managers unlock the value of hidden or neglected assets to successfully turn such cases around. In proposing a ‘frugal turnaround’ approach, the book advocates tapping the existing resources rather than just pumping money or changing top leadership.

For use as supplement or as textbook.

"You're not doing very much at the moment, darling. I don't suppose you'd care to

house-sit for a while?" Thus begins the irresistible story of two fixer-uppers-an old house and a young woman-and their efforts to recapture their true luster. When Hetty Longden, freshly dumped and brokenhearted, agrees to look after her great-uncle's long-abandoned mansion in the British countryside, she's at something of a lifetime low. With no job, no lover, no prospects, and no particular talent for resuscitating crumbling estates, she hope for nothing more than some good old-fashioned escape. What she finds includes a cast of quirky an ever-present neighbors, a couple of SNAGs (Sensitive New Age Guys), some very humorless bank officials, two disarming little canines, one gracious, dilapidated, romantic old house, and, just maybe, enough elbow grease to polish everything up again. A British bestseller that's as inviting as an elegant old house full of unexplored rooms (after a good scrubbing-down, of course), *Stately Pursuits* is the funniest, smartest, and warmest read of the season.

Paul Fleischman spins three engrossing stories about the unexpected ways an artist's creations reveal truths - tales whose intriguing plots and many moods will entertain readers and inspire future writers. Can wood, copper, or marble communicate? They can if they are the graven images in Newbery Medalist Paul Fleischman's trio of eerie, beguiling short stories. If you whisper a secret into a wooden statue's ear, will anyone find out? Can a wobbly weathervane bearing the image of Saint Crispin, the patron saint of shoemakers, steer a love-struck apprentice toward the girl of his dreams? And if a ghost hires a sculptor to carve a likeness of him holding a drink to a baby's lips, what ghastly crime might lie behind his request? And, in a brand-new afterword, the acclaimed storyteller reveals how he found his own author's voice.

Cosmetics have been in utilization for more than thousands years. More commonly known as make- up, it includes a host of skin products like foundation, lip colors etc. The international market for skincare and color cosmetics surpassed a sale of 53 billion dollars in 2002. The quantity and number of latest products brought to market both nationally and internationally continues to develop at a fast pace. Cosmetic chemists all the time are looking for attractive and striking material that enhances skin's appearance and healthiness. A huge collection of compounds is required to supply these products. The newest edition of the Cosmetics Toiletries and Fragrance Association (CTFA) Dictionary displays more than 10,000 raw materials and the list continues to increase with every year hundreds of new ingredients being added. The cosmetic chemistry has encompasses a vast area of study and one such is Herbal Cosmetics. Herbal cosmetics are the product of cosmetic chemistry, a science that combines the skills of specialists in chemistry, physics, biology, medicine and herbs. Since cosmetics are applied mostly to the skin, hair and nails, a brief description of the anatomy of these is desirable. Herbal cosmetic major users are girls and women who are very much peculiar about their skin type and requirement. Synthetic cosmetic being harsh and prone to more side- effects, herbal cosmetic is quickly replacing it and gaining a lot of popularity. As a result it has created an enormous market for itself both domestic as
