This handbook showcases the broad spectrum of diverse approaches to environmental accounting which have developed during the last 30 years across the globe. The volume covers a range of physical issues such as water, carbon and biodiversity, as well as specific accounting matters such as management control, finance and audit. Moreover, seven chapters present environmental accounting issues that arise in the regions of Africa, Asia, Europe, MENA, North America, the Pacific and South America. The handbook also highlights future challenges in all the topic areas addressed as well as introducing new topics, such as links between environmental accounting and the circular economy, and the issues associated with animal rights. Edited by leading scholars in the area and with key contributions from across the discipline, and covering a diverse range of perspectives and locations, the volume is divided into five key parts: • Part 1: Framing the issues • Part 2: Financial accounting and reporting • Part 3: Management accounting • Part 4: Global and local perspectives • Part 5: Thematic topics in environmental accounting This handbook will act as a significant publication in drawing together the history of the field and important reference points in its future development, and will serve as a vital resource for students and scholars of environmental accounting and environmental economics.

Intermediate Accounting by Kieso, Weygandt, and Warfield is, quite simply, the standard by which all other intermediate texts are measured. Throughout the thirty years, and ten best-selling editions, the text has built a reputation for accuracy, comprehensiveness, and student success. This Updated Edition features and incorporates the 2005 FASB key accounting standards that have been updated since the original publication of "Intermediate Accounting, 11th Edition." The Updated Eleventh Edition maintains the qualities for which the text is globally recognized, and continues to be your students' gateway to the profession! Included in the package is the "Problem-Solving Survival Guide." This edition focuses on concepts that are isolated in a logical sequence. It explains how accountants manipulate financial statements, discusses the three common features of criminal and ethical misconduct including opportunity, pressure and rationalization, and much more.

Due to the emergence of IFRS as the required convention for reporting to stock exchanges in the European Union and other important markets, accountants must gain a strong understanding of these

Principles of Accounting leads the market with balanced, flexible content supported by an array of truly integrated print and technology supplements. Whether an instructor wants to present a user or procedural orientation, incorporate new instructional strategies, develop students' core skills and competencies, or integrate technology into the classroom, the 2002e edition provides a total solution. Because most students taking the introductory accounting course are business majors, the new edition focuses on the business relevance of accounting, emphasizing decision making and analysis. The integrated text and technology program allows students and instructors to take advantage of opportunities created by new instructional technologies. New co-author Susan Crosson, coordinator of the accounting department at Santa Fe Community College and chair of the Two-Year College Section of the American Accounting Association, enhances the text with her expertise in managerial accounting and instructional technology.

Financial Accounting Theory and Analysis: Text and Cases, 13th Edition illustrates how accounting standards impact the daily decisions of accounting professionals. This authoritative textbook shows how accounting theory explains why particular companies select certain accounting methods over others, and predicts the attributes of firms by analyzing their accounting methods. The text examines empirical research relevant to various theories of accounting and the uses of accounting information, including the fundamental analysis model, the efficient markets hypothesis, the behavioral finance model, the positive accounting theory model, the human information processing model, and the value creation model. Enabling students to develop an informed perspective

accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

Dialogues and Disputes in Biblical Disguise from Late Antiquity to the Middle Ages offers the first overall discussion of the hitherto under-studied literary genre of pseudo-biblical dialogues. The essays presented here analyse texts, which transform dialogues and disputations about contemporary theological, legal or philosophical matters into a biblical scenario as discussions between biblical characters. Such dialogues, involving demonic, human and divine figures, are common and popular in the Oriental (Syriac, Coptic and Arabic) as well as Greek, Latin and medieval vernacular literatures, in prose and poetry alike, from late antiquity to the early modern. The present volume is the first attempt for a systematic and interdisciplinary study of this literature in the form of thematically organized essays by some of the most eminent experts on late antique and medieval

dialogic texts in a wide range of traditions. Presenting surveys of pseudo-biblical dialogues in various languages and cultures, the volume will foster a new interdisciplinary approach to these texts previously investigated in isolation within the individual scholarly fields of Oriental, Byzantine, Medieval or Slavonic studies. It also endeavours to create new methodologies for their investigation informed by and also impacting both literary and biblical studies. Analysing the interplay between content and literary form, the contributions present an overview of the development of pseudo-biblical dialogues from Syriac, Coptic and Greek patristics to not only Medieval Latin and Byzantine but also Slavonic, Arabic and English texts, providing us with the first manual about this wide-spread and popular, but unexplored literature.

Intermediate Accounting: IFRS Edition provides the tools global accounting students need to understand IFRS and how it is applied in practice. The emphasis on fair value, the proper accounting for financial instruments, and the new developments related to leasing, revenue recognition, and financial statement presentation are examined in light of current practice. Global Accounting Insights highlight the important differences that remain between IFRS and U.S. GAAP, and discuss the ongoing joint convergence efforts to resolve them.
