

Accounting The International Journal Of Elsevier

Advances in International Accounting is a refereed, academic research annual, that is devoted to publishing articles about advancements in the development of accounting and its related disciplines from an international perspective. This serial examines how these developments affect the financial reporting and disclosure practices, taxation, management accounting practices, and auditing of multinational corporations, as well as their effect on the education of professional accountants worldwide. Advances in International Accounting welcomes traditional and alternative approaches, including theoretical research, empirical research, applied research, and cross-cultural studies. Advances in International Accounting is now available online at ScienceDirect - full-text online of volumes 14 onwards.

The only accounting-specific research methods textbook available on the market.

Owners and managers rely on today's accounting professional to identify and monitor enterprise risks and to provide quality assurance for a company's information systems. ACCOUNTING INFORMATION SYSTEMS, 10E focuses on three critical accounting information systems in use today: enterprise systems, e-Business systems, and controls for maintaining those systems. The text fully explores the integrated nature of AIS with its foundations in information technology, business processes, strategic management, security, and internal controls. Students will easily grasp even the most challenging subjects as they explore today's most intriguing AIS topics discussed in a conversational and relaxed tone rather than complex technical language. The tenth edition provides students with the necessary tools for organizing and managing information to help them succeed and protect the integrity of their employer's information system. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

International Accounting Harmonization analyzes the differences between national accounting rules and international accounting methods, showing that when firms adopt international accounting standards they achieve significantly higher positive coefficients compared with firms that only take on local accounting strategies.

Today's accounting professionals are challenged to identify enterprise risks and provide quality assurance for a company's information systems. ACCOUNTING INFORMATION SYSTEMS, 10th International Edition, focuses on three critical accounting information systems in use today: enterprise systems; e-Business systems; and controls for maintaining those systems. Students will easily grasp even the most challenging topics as they explore today's most intriguing AIS topics relative to business processes, information technology, strategic management, security, and internal controls. The 10th International Edition provides students with the tools for organising and managing information to help them succeed and protect the integrity of their employer's information system.

The increasing pace of global conformance towards the adoption of International Financial Reporting Standards (IFRS) highlights the need for accounting students as well as accounting practitioners to be conversant with IFRS. Teaching IFRS offers expert descriptions of, and insights into, the IFRS convergence process from a teaching and learning perspective. Hence this book is both timely and likely to have considerable impact in providing guidance for those who teach financial reporting around the world. The contents of the book come from authoritative sources and offer something distinctive to complement the existing textbooks which typically focus on the technical aspects of IFRS and their

adoption. Drawing upon the experiences of those who have sought to introduce IFRS-related classroom innovations and the associated student outcomes achieved therefrom, the book offers suggestions about how to design and deliver courses dealing with IFRS and catalogues extensive listings of IFRS-related teaching resources to support those courses. This book was originally published as a special issue of Accounting Education: An international journal. The effects of recent economic and financial crises have reached an international scale; a number of different nations have experienced the fallout of these events, calling into question issues of accountability and reform in public management. Global Perspectives on Risk Management and Accounting in the Public Sector is a pivotal reference source for the latest research on current developments and future directions of the regulation, financial management, and sustainability of public institutions. Featuring discussions on risk assessment, transparency, and information disclosure, this book is ideally designed for regulatory authorities, researchers, managers, and professionals working in the public domain.

This book provides rare, insider accounts of the academic research process, revealing the human stories and lived experiences behind research projects; the joys and mistakes of a wide range of international researchers principally from the fields of accounting and finance, but also from related fields in management, economics and the social studies of science.

The IJAISL is an intellectually reviewed journal of present-day research in quantitative accounting, information science and qualitative leadership skills. Analyses relying on organizational size, statistical financial performance, and various operationalizations of leadership composition, will present evidence of methodical control structure and demonstrate consistency in results. Examinations of meta-analyses of empirical work in accounting, information processing and leadership, useful for the understanding of their respective behaviors regionally as well as internationally, is the core of this journal.

The International Journal of Innovation in Education and Business (IJIEB) is bi-annual professional publication that publishes information, views, opinions and well- researched articles in innovation in education and business. These scholarly articles are useful for scholars, students, researchers, business executives, educators and business practitioners. The work published should adhere to high quality and context that the Editorial Board believes would be a significant contribution to the international community of scholars and readers. The journal articles can be any contemporary and innovative issues on education and business which would garnish international interest. The reports of high quality research of innovations in education and business involve any discipline and methodology. Although the journal targets to publish high quality research that contribute to the body of knowledge, research, policy and policy and

practice beyond the context that the research was undertaken.

Includes research papers that examines various issues including the adoption of International Financial Reporting Standards (IFRS) and International Public Sector Accounting Standards (IPSASs), management accounting change in the context of public sector reforms, corporate reporting disclosures, auditing, etcetera.

Advances in International Accounting welcomes traditional and alternative approaches, including theoretical research, empirical research, applied research, and cross-cultural studies. *Adopts an international perspective while addressing unique accounting issues *Peer-reviewed and credible contributions make this a valuable resource for scholars, researchers, and students

Today's accounting professionals are challenged to identify enterprise risks and provide quality assurance for a company's information systems. ACCOUNTING INFORMATION SYSTEMS, 9E, focuses on three critical accounting information systems in use today: enterprise systems, e-Business systems, and controls for maintaining those systems. Students will easily grasp even the most challenging topics as they explore today's most intriguing AIS topics relative to business processes, information technology, strategic management, security, and internal controls. The 9th edition provides students with the tools for organizing and managing information to help them succeed and protect the integrity of their employer's information system. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Since the early 1980s there has been an explosion of auditing activity in the United Kingdom and North America. In addition to financial audits there are now medical audits, technology audits, value for money audits, environmental audits, quality audits, teaching audits, and many others. Why has this happened? What does it mean when a society invests so heavily in an industry of checking and when more and more individuals find themselves subject to formal scrutiny? The Audit Society argues that the rise of auditing has its roots in political demands for accountability and control. At the heart of a new administrative style internal control systems have begun to play an important public role and individual and organizational performance has been increasingly formalized and made auditable. Michael Power argues that the new demands and expectations of audits live uneasily with their operational capabilities. Not only is the manner in which they produce assurance and accountability open to question but also, by imposing their own values, audits often have unintended and dysfunctional consequences for the audited organization.

Today's accounting professionals must help organizations identify enterprise risks and provide assurance for information systems. ACCOUNTING INFORMATION SYSTEMS: FOUNDATIONS IN ENTERPRISE RISK MANAGEMENT, 9E, International Edition helps students develop a solid foundation in enterprise risk management as it relates to business processes and their information systems. The book's proven coverage centers around three of the areas most critical in accounting information systems today: enterprise systems, e-Business systems, and controls for maintaining those systems. The book is written clearly to help students easily grasp even the most challenging topics. They will explore today's most intriguing AIS topics to see how they relate to business processes, information technology, strategic management, security, and internal controls. The 9th edition provides students with the tools and processes for organizing and managing information. Whether you desire an emphasis on enterprise risk management, a solid understanding of databases and REA, or a background in systems development, ACCOUNTING INFORMATION SYSTEMS: FOUNDATIONS IN ENTERPRISE RISK MANAGEMENT, 9E, International Edition offers a solid foundation to students. The Fifth Edition of International Accounting provides an overview of the broadly defined area of international accounting, but also focuses on the accounting issues related to international business activities and foreign operations. This edition also includes substantially updated coverage of the International Accounting Standards Board (IASB) and International Financial Reporting Standards (IFRS). The unique benefits of this textbook include its up-to-date coverage of relevant material, extensive numerical examples provided in most chapters, two chapters devoted to the application of International Financial Reporting Standards (IFRS), and coverage of nontraditional but important topics such as strategic accounting issues of multinational companies, international corporate governance, and corporate social responsibility reporting.

The Journal of Global Business and Management Research (GBMR) is a quarterly peer-reviewed journal which strives to comply with highest research standards and scientific/research/practice journals' qualities. Being international and inter-disciplinary in scope, GBMR seeks to provide a platform for debate among diverse academic and practitioner communities who address a broad area of business and management issues across the globe. It is currently indexed in a number of prestigious databases including Gale and Ebsco.

One of the prime purposes of accounting is to communicate and yet, to date, this fundamental aspect of the discipline has received relatively little attention. The Routledge Companion to Accounting Communication represents the first collection of contributions to focus on the power of communication in accounting. The chapters have a shared aim of addressing the misconception that accounting is a purely technical, number-based discipline by highlighting the use of narrative, visual and technological methods to communicate accounting information. The contents comprise a mixture of reflective overview, stinging critique, technological exposition, clinical analysis and practical advice on topical areas of interest such as: The miscommunication that preceded the global financial crisis The failure of sustainability reporting The development of XBRL How to cut clutter With an

international coterie of contributors, including a communication theorist, a Big Four practitioner and accounting academics, this volume provides an eclectic array of expert analysis and reflection. The contributors reveal how accounting communications represent, or misrepresent, the financial affairs of entities, thus presenting a state-of-the-art assessment on each of the main facets of this important topic. As such, this book will be of interest to a wide range of readers, including: postgraduate students in management and accounting; established researchers in the fields of both accounting and communications; and accounting practitioners.

Multicriteria analysis is a rapidly growing aspect of operations research and management science, with numerous practical applications in a wide range of fields. This book presents all the recent advances in multicriteria analysis, including multicriteria optimization, goal programming, outranking methods, and disaggregation techniques. The latest developments on robustness analysis, preference elicitation, and decision making when faced with incomplete information, are also discussed, together with applications in business performance evaluation, finance, and marketing. Finally, the interactions of multicriteria analysis with other disciplines are also explored, including among others data mining, artificial intelligence, and evolutionary methods.
