A long-overdue publication that restores Wilfred to the art-historical canon Lumia presents a long-overdue reevaluation of the groundbreaking artist Thomas Wilfred (1889-1968), whose unprecedented works prefigured light art in America. As early as 1919, many years before the advent of consumer television and video technology, Wilfred began experimenting with light as his primary artistic medium, developing the means to control and project unique compositions of colorful, undulating light forms, which he referred to collectively as lumia. Manifested as both live performances on a cinematic scale and self-contained structures, Wilfred's innovative displays captivated audiences and influenced generations of artists to come. This publication, the first dedicated to Wilfred in over forty years, draws on the artist's personal archives and includes a number of insightful essays that trace the development of his work and its relation to his cultural milieu. Featuring a foreword by the celebrated artist James Turrell, Lumia helps to secure Wilfred's rightful place within the canon of modern art.

Eighth grader Scarlett is boy crazy -- and not just a little boy crazy. We're talking seriously, utterly, completely, 100-percent boy crazy! So much so that her mother, in an effort to curb Scarlett's enthusiasm, ships her off to a prestigious all-girls charter school. Scarlett thinks her life is absolutely over. But what she doesn't know is that her life is about to get absolutely interesting, because on her desk in her dorm room she finds a letter. The letter says it contains four truths and a lie -- and Scarlett's reputation depends on determining which is which.... Maybe an all-girls school isn't so boring after all.

Draws on Christian principles to counsel couples on how to promote marital health, revealing the dynamic between the different personalities of men and women. A century after the Armistice and the associated peace agreements that formally ended the Great War, many issues pertaining to the UK and its empire are yet to be satisfactorily resolved. Accordingly, this volume presents a multi-disciplinary approach to better understanding the post-Armistice Empire across a broad spectrum of disciplines, geographies and chronologies. Through the lens of diplomatic, social, cultural, historical and economic analysis, the chapters engage with the histories of Lagos and Tonga, Cyprus and China, as well as more obvious geographies of empire such as Ireland, India and Australia. Though globally diverse, and encompassing much of the post-Armistice century, the studies are nevertheless united by three common themes: the interrogation of that transitional 'moment' after the Armistice that lingered well beyond the final Treaty of Lausanne in 1924; the utilisation of new research methods and avenues of enquiry to compliment extant debates concerning the legacies of colonialism and nationalism; and the common leitmotif of the British Empire in all its political and cultural complexity. The centenary of the Armistice offers a timely occasion on which to present these studies.

A guidebook to seducing, satisfying, and loving the only man you'll ever need In an act of generosity, Adrian Colesberry has written an exquisitely detailed guidebook to ensure that every reader knows precisely how to please him - in bed and beyond. Brimming with self-indulgent and incredibly bawdy humor, How to Make Love to Adrian Colesberry is a sexual memoir disguised as a manual on Colesberry's pet peeves, favorite positions, and surefire ways to turn on your man (aka Adrian Colesberry). Recounting dozens of annoying peccadilloes and helpful pro tips gleaned from his experiences with former lovers, Colesberry covers all corners to ensure that no stage of the court-and-conquer process is overlooked. Beginning with how to attract Colesberry, he later progresses to foreplay and finally the full monty, revealing his own erratic, often unerotic sexual history along the way. From his awkwardly celibate teenage years to the emotional scars inflicted by his domineering ex-wife, Colesberry muses on bondage, three-ways, toys, bi-curiosity, and other kinks. A pitch-perfect parody that

spares no detail, How to Make Love to Adrian Colesberry is a hilarious and filthy new entrant into the fratire genre.

One of the most powerful, yet relatively unknown features available in HEC-RAS is the HECRASController. TheHECRASController API has a wealth of procedures which allow a programmer to manipulate HEC-RAS externally by setting input data, retrieving input or output data, and performing common functions such as opening and closing HEC-RAS, changing plans, running HEC-RAS, and plotting output. HECRASController applications are seemingly endless. Not only can the retrieval and post-processing of output be automated, but with the HECRASController, real-time modeling and probabilistic experiments like Monte Carlo are possible. If you have HEC-RAS on your computer, you already have the HECRASController! "Breaking the HEC-RAS Code" explains how the HECRASController works, provides example applications of the HECRASController, and catalogs the vast array of programming procedures (with explanations and examples on how to use them) embedded in the HECRASController. This is a "must-have" book for all HEC-RAS users. Professionals: Give yourself an edge for the next proposal and do something groundbreaking with HEC-RAS. Students: Make yourself marketable by adding the skills offered in this book.

Brealey, Principles of Corporate Finance 13e describes the theory and practice of corporate finance. We hardly need to explain why financial managers must master the

practical aspects of their job, but we should spell out why down-to-earth managers need to bother with theory. Throughout this edition, the authors demonstrate how managers use financial theory to solve practical problems. They also explore what financial managers should do to increase company value. Some of the biggest changes in this edition were prompted by the tax changes enacted in the U.S. Tax Cuts and Jobs Act passed in December 2017.

“Rosetti’s illustrations are personalized affirmations of the rights of women. They congratulate the empowered, comfort the survivors, and present rebuttals to the oppressive comments that rain down upon women from the heights of the patriarchy.” —Bust The message we receive from the world is clear: we’re not good enough. We’re not skinny enough, pretty enough, smart enough. Women is all about accepting ourselves. Carol Rossetti asks us instead to say, “We’re not good enough—we’re even better.” Despite the progress we’ve made as a society, there is still a cruel and subtle gender oppression that exists today—and many don’t realize it’s there. In response, Rossetti decided to draw women to focus on the issues we face. Her illustrations are of women who feel safe expressing themselves by showing the world their fashion, sexuality, relationships, religion, disabilities, and even traumatic experiences. Rossetti’s commanding images belong on billboards and street corners and in schools and offices to remind us that our unique experiences and expressions should make us feel beautiful, intelligent, and proud. We have the power to embrace who we are and can stop trying so hard to please the rest of the world. Carol Rossetti and Women offer us a vision of who we can be.

A task-oriented look at Linux Mint, using actual real-world examples to stimulate learning. Each topic is presented in an easy-to-follow order, with hands-on activities to reinforce the content. If you are starting out with Linux from a different platform or are well versed with Linux Mint and want a guide that shows you how to exploit certain functionality, this book is for you. No previous Linux experience is assumed.

One problem with helicoptering is that there are virtually no flying clubs, at least of the sort that exist for fixed wing, so pilots get very little chance to swap stories, unless they meet in a muddy field somewhere, waiting for their passengers. As a result, the same mistakes are being made and the same lessons learnt separately instead of being shared - it's comforting sometimes to know that you're not the only one to inflate the floats by accident! Even when you do get into a school, there are still a couple of things they don't teach you, namely that aviation runs on paperwork, and how to get a job, including interview techniques, etc - flying the aircraft is actually less than a third of the job. Another is that nobody really tells you anything, either about the job you have to do (from the customer) or how to do it (the company) - you will always be up against the other guy who managed to do it last week! Sure, there will be training, but, even in the best companies, this will be relatively minimal. This book is an attempt to correct the above situations by gathering together as much information as possible for helicopter pilots, old and new, professional and otherwise, in an attempt to explain the why, so the how will become easier (you will be so much more useful if you know what the customer is trying to achieve). In short, this is all the stuff nobody taught me - every tip and trick I have learnt has been included.
