Crammed with comic capers to try out on unsuspecting victims, and side-splitters to share, this ring-binder is a mix of practical pranks and wisecracks. Readers can depress the laughter button on the front for a tide of titters to accompany their tale telling. Three leaves of stickers and two funny photoframes are included. The jokers journal section contains 365 jokes - one for each day of the year and a space to fill with diary dates.

A surprisingly affordable book of excellent color photography, Tang shares 92 of his finest images of the Windy City, from beloved Buckingham Fountain to the United Center, home of the Chicago Bulls. He turns his camera on the famed sites, such as the Magnificent Mile and the Lincoln Park Zoo, as well as gems only locals know, such as historic neighborhoods, architectural details on downtown high-rises, and old watering holes such as the 1881 Schaller's Pump restaurant. Indeed, Chicago Impressions is the perfect memento of a trip to one of America's finest cities. And who better to capture its beauty than a Chicagooan!

Easter Cracked is a vital resource for churches hoping to make the most of the opportunities they have to reach out during Easter. Contains services, craft, drama and more to use with all-ages.

Korean: A Comprehensive Grammar is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of Korean grammar, taking into account the latest research in Korean linguistics. More lower-frequency grammar patterns have been added, and extra examples have been included throughout the text. The unrivalled depth and range of this updated edition of Korean: A Comprehensive Grammar makes it an essential reference source on the Korean language.

"As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric.

Evans's photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work."--Jacket.

This casebook consists of hundreds of case vignettes drawn from a variety of areas of clinical practice. It presents over 200 brief, concrete examples along with specific questions and alternatives that highlight the challenging ethical problems involved. This book can be read independently or can serve as a supplement to any core text in clinical/medical ethics.

A collection of 18 short vampire tales.

In the future world of Scorch, America is run by a "corporacracy." Three conglomerates have taken control not by force but by manipulating common beliefs and values through the media, and particularly by playing on Americans' fears of Big Brother. Consumerism and privatization have run amok in this landscape of flashing screens and subtle brainwashing, a world where even city streets and public schools are run by big business. This is a darkly comic first novel of a dystopian future, with echoes of 1984 and Brave New World.

Fangtales

Seventeen-year-old Snow Queen Thyra Winther is immortal, but if she can't reassemble a shattered enchanted mirror by her eighteenth birthday, she's doomed to spend eternity as a wraith. Based on Hans Christian Andersen's The snow queen.

"My heart wandered through the world constantly seeking after my cure, but the sweet and delicious water of life had to break through the granite of my heart." When the words of Rumi enter your heart, something softens, breaks, and is subtly reborn. That he wrote the words seven hundred years ago in a medieval Persian world that bears little resemblance to ours makes their uncanny resonance to us today just that much more remarkable. Here is a treasury of daily wisdom from this most beloved of all the Sufi masters--both his prose and his ecstatic poetry--that you can use to start every day for a year, or that you can dip into for inspiration any time you need to break through the granite of your heart.

Looking at media coverage of three very prominent murder cases, Murder Made in Italy explores the cultural issues raised by the murders and how they reflect developments in Italian civil society over the past 20 years. Providing detailed descriptions of each murder, investigation, and court case, Ellen Nerenberg addresses the perception of lawlessness in Italy, the country's geography of crime, and the generalized fear for public safety among the Italian population. Nerenberg examines the fictional and nonfictional representations of these crimes through the lenses of moral panic, media spectacle, true crime writing, and the abject body. The worldwide publicity given the recent case of Amanda Knox, the American student tried for murder in a Perugia court, once more drew attention to crime and punishment in Italy and is the subject of the epilogue.

Jaeda is back like a cat with nine lives as she proves to herself and everyone around her that there is no stopping her. Through tragedy after tragedy, we follow her for another bumpy ride on this highway called life. Jaeda will battle with her past demons as well as new demons that will try to set her back and break her down. Juggling love and the streets while trying to stay sane and find herself is all too much for one person but with the people that she loves behind her, Jaeda dusts herself off and tries again to make it out of the hood. Will love finally be on her side or will she be hit with yet another tragedy to set her back?

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are
