Aces High Christopher Shores,2008-09-18 This volume updates the information in the first volume and adds some new names. Information has been added on the pilots who gained success against the V-1 flying bombs during 1944-45. Detail is also provided on those units in which virtually all the fighter pilots served at some time or another - the fighter Operational Training Units - and of specialist units such as the Central Gunnery School, Fighter Leader's School and Fighter Experimental Units. There is also coverage of the only other conflicts in which British pilots have been able to claim victories since 1945 - Korea and the Falklands Conflict.

**Aces High** Bill Yenne,2009-02-03 Capturing the hearts of a beleaguered nation, the fighter pilots of World War II engaged in a kind of battle that became the stuff of legend. They cut through the sky in their P-38s to go one-on-one against the enemy—and those who survived the deadly showdowns with enough courage and skill earned the right to be called aces. But two men in particular rose to become something more. They became icons of aerial combat, in a heroic rivalry that inspired a weary nation to fight on. Richard “Dick” Bong was the bashful, pink-faced farm boy from the Midwest. Thomas “Tommy” McGuire was the wise-cracking, fast-talking kid from New Jersey. What they shared was an unparalleled gallantry under fire which won them both the Medal of Honor—and remains the subject of hushed and reverent conversation wherever aerial warfare is admired. What they had between them was a closely watched rivalry to see who would emerge as the top-scoring American ace of the war. What they left behind is a legacy of pride we will never forget, and a record of aerial victories that has yet to be surpassed anywhere in the world.

Thud Ridge Jack Broughton,Hanson Baldwin,2006 This is the story of a special breed of warrior, the fighter-bomber pilot; the story of valiant men who flew the F-105 Thunderchief 'Thud' Fighter-Bomber over the hostile skies of North Vietnam. From the briefing rooms to the bombing runs, Vice-Wing Commander Colonel Jack Broughton, recounts the tragedy and heartache, the high drama and flaming terror, the exhilaration and thrill of life on the edge. He relives the incredible feeling of high-speed, low-level sorties where SAM missiles, flak and MiGs were all in a day's work. The bravery of the pilots and their commitment to each other in times of extreme fear, crisis and catastrophe are highlighted by vivid, fast moving flying sequences. Thud Ridge is a fascinating and graphic memorial to the courage of the men, the power of their machines and

their dedication to their mission.

Aces at Kursk Christopher A Lawrence, 2024-07-25 The Battle of Kursk in July 1943 is known for being the largest tank battle in history. A Russian victory, it marked the decisive end of the German offensive capability on the Eastern Front and set the scene for the Soviet successes that followed. While many have focused on the tank engagements, especially the Battle of Prokhorovka, there was an intense air battle going on overhead that was bigger than the Battle of Britain. As part of the German offensive, the Luftwaffe's VIII Air Corps deployed around 1,100 aircraft in the south alone, while the opposing Soviet Second and Seventeenth air armies initially deployed over 1,600 aircraft. There was a similar effort surrounding the German attack in the north. The battle in the south began with a Soviet air strike on German airfields and a fight for control of the air that continued throughout the day across the front. On the first day of the battle, 5 July 1943, the Germans flew at least 2,387 sorties in the south while the two Soviet air armies flew 1,688 sorties. That first day of battle resulted in 19 to 27 German planes and 189 Soviet aircraft shot down. This was an aerial engagement like no other ever seen before. Involved on the German side were the 52nd and 3rd Fighter Wings. The 52nd Fighter Wing was the most accomplished fighter wing in history and many of its top aces were involved in the combats over the Kursk battlefield. These included Walter Krupinski (197 claimed kills in the war), Günther Rall, the third highest scoring ace in history (275 claimed kills), and the highest scoring ace in history, Erich Hartmann (352 claimed kills). Opposing them were what were to become three of the top five Soviet aces: Kirill Yevstigneyev (53 claimed kills), Nikolai Gulayev (55 claimed kills) and the top scoring Allied ace of the war, Ivan Kozhedub (62 claimed kills). This was indeed the battle of the aces. But there was also the massive ground attack effort by both sides, including the Junkers Ju 87 Stuka fitted with 37mm anti-tank guns flown by the man who would become most decorated soldier of the Third Reich, Hans-Ulrich Rudel. The aerial battle involved hundreds of Soviet Sturmoviks, or IL-2s, Stalin's armored ground attack plane. The battle featured the famous attack by Luftwaffe Hs-129s and Fw-190s on Soviet armor on 8 July 1943. Aces at Kursk is not just a war story, but a revealing investigation that analyses the entire air battle that turned the tide of the war on the Eastern Front.

*Black Aces High* Robert K. Wilcox, 2007-04-01 Black Aces High is the riveting account of a modern fighter squadron at war and the exploits, triumphs, and traumas of its pilots. The Black Aces: their courage, ferocity, and instincts made them

legendary in military aviation. Flying F-14 Tomcats, they played as much a part in recent US operations in Kosovo as did any air squadron in the theater, air force or navy, and probably more. Because of its superior performance, sophisticated equipment and the two-man crews who took it upon themselves to do something extra, the Tomcat and its aviators distinguished themselves over and over. Forced to locate Serb fighters operating covertly in a mountainous land much like Afghanistan, with almost no help from ground spotters, VF-14 pilots and backseaters spearheaded new methods for the navy to pinpoint, identify, and destroy enemy troops and weapons. These were tasks that fighter crews had seldom had to do before. The Aces had to break rules and frequently go in harms way in order to be successful. And they performed so well that for the first time in aviation history, a fighter squadron - theirs - was awarded The Wade McClusky Trophy, the navy's premier bombing honor. The award, named for a World War II dive bomber pilot and post-WorldWar II admiral, had been won previously only by bombing squadrons. Robert Wilcox spent two weeks with The Black Aces aboard the aircraft carrier USS Roosevelt and here provides a long-awaited, never-before-seen glimpse into the world of a modern navy fighter squadron. Wilcox takes readers into the cockpits as the pilots go out and attack targets while avoiding anti-aircraft weaponry. He takes us into the war room as they plan their strikes and into their cabins as they contemplate the danger they are facing. And the reader can't help but worry for these men as they head off into battle, can't help sitting on the edge of the seat as they try to land at night, in a rainstorm, with waves crashing against the ship, and can't help ducking with them as they dodge missile attacks. And in the end, it is impossible not to feel for these aviators as they question their own courage, or to cheer for them when they finally return safely. Black Aces High is a story of fear and courage, mishap and success, fighting spirit and military innovation. It's a human story that goes behind the smiling, sunglass-wearing facade of aviators flashing a V, the sterile, slow motion target video that has become a staple of Pentagon briefings, and the rock 'n' roll cowboy image of fighter crews seen in the movies. Instead, it is a story that shows who these aviators really are and what they do beyond what we know, a story which probably will be repeated again and again as our carriers continue to be deployed in the new, 21 century war our nation is fighting.

Air Force Combat Units of World War II Maurer Maurer,1961

**With Great Sacrifice and Bravery** Glenn Knoblock,2004-05 This work is presented to the reader with several ideas in mind. First, it is the author's hope that, in some small way, it will help preserve the memory of a little known pilot who fought, not only for his own country, but also for France and England during the early, dark days of World War II. While Waclaw Lapkowski was an experienced pilot who became one of Poland's aces during the war, his early demise, like that of so many others, has relegated his achievements to the back pages of history, making them nearly forgotten. However, in referring to pilots such as Lapkowski, the great British ace Robert Stanford-Tuck cites the many men who were credited with six, seven, or eight victories, pilots that formed the bulk and guts of our fighter force. The second reason for producing this

work is the unique use of official combat and operations reports from the Royal Air Force (RAF). Many of those who are interested in World War II aviation and fighter aces have read the biographies, and first-hand accounts of air combat contained within, of such men as Douglas Bader, Witold Urbanowicz, Adolph Galland, and Gregory Pappy Boyington, to name just a few. But what of those aces that did not survive to tell their story? How are they to be remembered? In the case of those who served with the RAF, the answer is, in part, through the use of official combat reports and related documents. While these official RAF and Polish Air Force (PAF) records do not sound particularly exciting, a glance at the surviving records quickly proves otherwise. Indeed, the title of this book consists of a borrowed phrase from one such report, and is a small example of the many dramatic events recorded within, often in the pilot's own words. While these reports have been an important source for many works on the RAF and PAF and its achievements during the war, never before, to the author's knowledge, have official combat reports been presented to the reading public in their original form. Though not originally intended for public view, they nonetheless make for exciting and informative reading and will be of interest not only to those with a passing interest in World War II aviation, but to the serious student as well. While the author was unable to obtain combat reports for all of Lapkowski's flights, those that were procured for September 1940 and June 1941 are of particular interest as they highlight all of the kills that he made while serving in the RAF. The final reason for choosing to write about Waclaw Lapkowski is due to the availability of wartime artifacts connected with his service in the RAF. About a year ago the author came in contact with a man who owned a portion of Lapkowski's Hurricane fighter, which was legally excavated in 1979. The author subsequently obtained a small piece of the wreckage for his personal collection, while the collector retained the remains of its Merlin engine, the prop boss, its Browning machine guns, and other items formerly on display at an aviation museum. Once this artifact was in the author's possession, he became interested in finding out about Lapkowski, his career, and his subsequent fate. While this work gives much information about 303 Squadron, it is not, however, a squadron history. While a book entitled Squadron 303 was published in London in 1942, written by Arkady Fiedler, it was not intended as an exacting history of the unit. Instead, it was a nice work of wartime public relations to help explain the Polish contribution in general terms during the Battle of Britain. Despite its shortcomings, Fiedler's book deserves its own place in the annals of aviation history. Copies by the thousands were smuggled into Nazi-held Poland and served not only to show that those who had left Poland were still fighting for their country, but served as an inspiration to those left behind to continue their resistance. No definitive squadron history has yet been translated into English. What the author found out, from the official combat reports, and various published sources, uniquely combined with available archaeological artifacts, was fascinating. What emerged from the records is a story worth telling. Waclaw Lapkowski, though not famous like such other Polish aces as Stanislaw Skalski, Jan Zumbach, or Urbanowicz, had an interesting and distinguished career. He was in the thick of battle at the outset of the war, when Germany invaded Poland on September 1, 1939, and saw subsequent service

during the Battle of France and the Battle of Britain in 1940. He achieved air victories in two out of three of these campaigns, and is one of only a handful of men, less than 150 in number, who served in all three campaigns. To borrow a phrase from the British, Waclaw Lapkowski truly was one of The Few, men whose skill and bravery helped stem the tide of German aggression and made Allied victory possible, at the cost of their own lives.

*THE BEST OF ACES HIGH VOL 1 ,*

**Aces of the Republic of China Air Force** Raymond Cheung, 2015-05-20 The ace pilots of the Republic of China Air Force have long been shrouded in mystery and obscurity, as their retreat to Taiwan in 1949 and blanket martial law made records of the RoCAF all but impossible to access. Now, for the first time, the colourful story of these aces can finally be told. Using the latest research based on released archival information and full-colour illustrations, this book charts the history of the top scoring pilots of the RoCAF from the beginning of the gruelling, eight-year Sino-Japanese War to the conclusion of the Civil War against the Chinese Communists. Beginning as a ragged and very disparate group of planes and pilots drawn from various provincial air forces, the RoCAF gradually became standardised and was brought under American tutelage. Altogether it produced 17 aces who scored kills whilst flying a startling variety of aircraft, from biplanes to F-86 Sabres.

**MiG-3 Aces of World War 2** Dmitriy Khazanov, 2013-05-20 The MiG-1/3 family of fighters was built to satisfy a Soviet Air Force requirement for an advanced, fast, high-altitude fighter. Entering service in the spring of 1941, the problematic MiG-1 had its handling issues rectified with the hasty production of the MiG-3. Many of these were destroyed on the ground when the Germans launched Operation Barbarossa. Nevertheless, enough examples survived to allow pilots such as Stepan Suprun and Aleksandr Pokryshkin to claim a number of victories in the type. This book tells the complete story of the men who made ace in the first examples of the famous MiG fighter.

*Israeli Mirage III and Neshar Aces* Shlomo Aloni, 2012-12-20 Israeli delta fighters pilots have been credited with almost 300 kills between 1966 and 1974, and dozens of them became aces. The Israeli aerial kill exchange rate and overall air-to-air performance was phenomenal. Although the Israeli pilots were flying Mach 2 fighters, they lacked any modern radar equipment and their MiG-21 flying opponents should have had a performance edge over them. This book details their most significant engagements, many of which were essentially World War 2 style dogfights fought with jet aircraft. Because neither side had the combat edge to disengage at will most engagements were a life and death struggle and the introduction of air-to-air missiles and the Israeli Neshar was to prove decisive in this theatre.

**Jungle Ace** John R. Bruning, 2011 Flying P-38s, Jerry Johnson shot down 24 aircraft in 265 combat missions in the Pacific theater. At the age of only twenty-four, he commanded the highest-scoring fighter group in the Pacific. Tragically, though

Johnson had survived three combat tours, which included a mid-air collision with a Japanese aircraft and being shot down by friendly fire, the new father disappeared without a trace while flying a courier mission one month after the war's end.

**Command Of The Air** General Giulio Douhet, 2014-08-15 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision—that command of the air is all important in modern warfare—has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

*Air Force* Chester G. Hearn, From its beginnings in 1907 as the Aeronautical Division of U.S. Army's Signal Corps, which consisted of one officer and two enlisted men, the United States Air Force has grown to become the foremost aerial armed force in the world. Although they had to fly French and British planes as the fledgling army aeronautical bureaucracy failed to procure any combat-worthy American aircraft, which arguably did not exist, American aviators performed valiantly in World War I with intrepid pilots of the such as Eddie Rickenbacker and Frank Luke leading the way. Between the wars, all of aviation, commercial and military around the world grew by leaps and bounds as the numbers of aircraft in service and their capabilities tremendously increased. Although the Army Air Corps, as it was known at the time, was no better prepared for World War II than the rest of the army, it had developed a highly professional corps of experienced officers who would be able to take advantage of the latest American aircraft technology such as the B-17 Flying Fortress and the P-51 Mustang. With the end of the war and the creation of an independent armed force in 1947, the United States Air Force leapt into the jet age with such icons as the F-86 Sabre and the remarkable B-52 Stratofortress, which soldiers on today more than fifty years after going into service in 1955 and with the youngest of the 744 plane production run being forty years old, having been built in 1962. *Air Force* covers the entire history of the U.S. Air Force and its development from its beginnings early in the last century to becoming the world's largest, most powerful, and most versatile air-combat force. Special attention is paid to the air force's recent, post-Vietnam history, and an entire chapter is devoted to America's air force of the future.
