The empowering story of Larry Hite's unlikely rise to the top of the hedge fund world—with critical insights and lessons you can take to the bank In *The Rule*, legendary trader and hedge fund pioneer Larry Hite recounts his working-class upbringing in Brooklyn as a dyslexic, partially blind kid who was anything but a model student—and how he went on to found and run Mint Investment Management Company, one of the most profitable and largest quantitative hedge funds in the world. Hite's wild success is based on his deep understanding that markets are flawed—just like people. Through his early-life struggles and failures, Hite came to know himself well—his fears, his frustrations, his self-doubt, and his tolerance for all of the above. This motivational book reveals that by accepting the facts of his life and of himself, he was able to accept markets as they are. And that was the key to his success. In these pages, you'll walk of the footsteps of an investing legend, who imparts smart, practical trading lessons throughout the journey. Making a successful living in trading isn't about beating the markets. It's about meeting markets where they are, embracing the fact of risk, knowing yourself, and playing it strictly by the numbers. *The Rule* shows that investing decisions are not only bets or gambles, but investments in time, energy, and attention. By focusing on realistic returns on your investments—versus what you expect or hope to get—you immediately improve your probability for success.

The ultimate parent's guide to raising financially smart toddlers to teenagers. Our children today have more money than in all of history. They face more pressure to spend and to keep up with their friends. The challenge for parents is to teach restraint and responsibility when our society may not put much stock on such values. This book teaches parents what to tell their children about money and how to tell them. The authors share their challenges and successes in plain common sense language. Good money habits are put forth in an easy to follow manner. The chapters are full of practical advice and humour, and you learn to answer difficult questions posed by your children.

A pioneer in financial planning in Singapore, Goh Yang Chye debunks several misconceptions, showing how so-called experts are no better than the average seven-year-old at picking stocks. Investing is simple; look at the evidence. He tells us why we shouldn't trust the industry jargon and why cryptocurrencies are not a good investment; why Singapore's love affair with property is a mistake; why the media always get it wrong; and how not to overreact. From understanding market cycles to knowing what exactly to ask your financial adviser, this book will teach you how to secure your financial future—and enjoy the journey!

*Dutch Commerce and Chinese Merchants in Java* describes the vanished commercial world of colonial Java. Alexander Claver shows the challenges of a demanding business environment by highlighting trade and finance mechanisms, and the relationships between the participants involved.

'Telling It Like It Is' is a collection of quotations that either give good advice or are useful truths. Of course there will be quotations that you disagree with or don't identify with, but with about 700 pages how could it be otherwise! Taken as a whole though, the book tries to present a coherent view of life that has honesty and integrity and is true. Ultimately, however, you must decide for yourself whether each quote strikes a chord with you and whether all the quotes taken together present a picture of human affairs and behavior that you recognize and agree with. Whatever your final opinion, you will find this collection of quotations both fascinating and provocative.

"A good read for anyone who wants to understand what actually determines whether a developing economy will succeed" (Bill Gates, "Top 5 Books of the Year"). An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who The Financial Times said "should be named chief myth-buster for Asian business." In How Asia Works, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell's in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need "export discipline," a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron's stifling of reform to the explosive growth at a Korean steel mill. "Provocative . . . How Asia Works is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic." —The Economist

Financial markets are given to instability, but some financial systems are more crisis-prone than others. Natasha Hamilton-Hart's historically grounded investigation of central banks, governments, and private bankers in Southeast Asia helps explain why. Focusing on Indonesia, Malaysia, and Singapore, she shows how the long-term development and internal attributes of central banks and state financial institutions shape their interactions with private

bankers and influence their ability to manage the financial sector. The politics of finance in Southeast Asia is understudied, Hamilton-Hart contends, and central banks themselves virtually ignored. Yet central banks play a pivotal role in determining a country's vulnerability to regional and global financial pressures such as the currency and financial crises of the late 1990s. Southeast Asian central bankers were major players in the events surrounding these upheavals. Countries in the region experienced the economic chaos in different ways, however, as the central banks of Indonesia, Malaysia, and Singapore drew upon different institutional capacities and legacies. *Asian States, Asian Bankers* brings new case material to the field of political economics and delineates the operation of central banks and their roles in the monetary and financial policies of three Southeast Asian states. In addition, Hamilton-Hart's work bridges two areas that have often been studied apart from each other: the national-level politics of financial management and the transnational orientation of many bankers in Southeast Asia.

Trading for a Living Successful trading is based on three M's: Mind, Method, and Money. Trading for a Living helps you master all of those three areas: \* How to become a cool, calm, and collected trader \* How to profit from reading the behavior of the market crowd \* How to use a computer to find good trades \* How to develop a powerful trading system \* How to find the trades with the best odds of success \* How to find entry and exit points, set stops, and take profits Trading for a Living helps you discipline your Mind, shows you the Methods for trading the markets, and shows you how to manage Money in your trading accounts so that no string of losses can kick you out of the game. To help you profit even more from the ideas in Trading for a Living, look for the companion volume--Study Guide for Trading for a Living. It asks over 200 multiple-choice questions, with answers and 11 rating scales for sharpening your trading skills. For example: Question Markets rise when \* there are more buyers than sellers \* buyers are more aggressive than sellers \* sellers are afraid and demand a premium \* more shares or contracts are bought than sold \* I and II \* II and III \* II and IV \* III and IV Answer B. II and III. Every change in price reflects what happens in the battle between bulls and bears. Markets rise when bulls feel more strongly than bears. They rally when buyers are confident and sellers demand a premium for participating in the game that is going against them. There is a buyer and a seller behind every transaction. The number of stocks or futures bought and sold is equal by definition.

A practical guide to achieving life success as told through the inspiring and humorous accounts of the author and other young adults. Part self-help, part memoir, *Destination Awesome* is both a beacon and a road map that will help young adults of every background achieve independence, success, and fulfillment. No matter if you're living with your parents, in school housing, or couch-surfing; no matter if you have big dreams, simple plans, or are unsure of what you want to do with your life; no matter the money in your bank, the challenges you face or the number of contacts in your phone, the simple, relatable lessons in *Destination Awesome* will help you create the life you desire. *Destination Awesome* covers every strategy through Mueller's own experiences as well as those of other young adults who have succeeded against all odds. Mueller

reveals how she became the only member of her family to escape a poverty-stricken, unstable, and physically and emotionally wounding environment. She grabs at your heart, pulls you in, and offers a distinctive perspective on achievement. Whether your challenges are the same as these young adults—a negative home environment, drug addiction, a physical ailment, unplanned pregnancy, homelessness, cockroach infestation, uncontrollable vomiting—or something completely different, the strategies you'll learn will help you create your awesome life.

This volume sets out to analyze changes in governance processes in Southeast Asia,

particularly those relating to democratic development. The volume harbors an ambition to go beyond the often one-dimensional debate on democratization in Asia. With a historical perspective, and with an explicit attempt to view change from within, ten case studies from Southeast Asia are presented that illuminate how processes of governance are being altered under the pressure of accelerating globalization. These are accompanied by a review of how globalization has historically entered the debate on democratization in Southeast Asia, and an analytical conclusion which assesses the findings of the case studies in relation to recent writings on societal change in the region. Contributors: Andrew Aeria, Hans Antlöv, Dewi Fortuna Anwar, Michael Kelly Connors, Saliha Hassan, Chua Beng Huat, Eva-Lotta E. Hedman, Bent Jørgensen, Francis Loh Kok Wah, Carolina Lopez, Joakim Öjendal, Khoo Boo Teik.

This open access book presents detailed pathways to achieve 100% renewable energy by 2050, globally and across ten geographical regions. Based on state-of-the-art scenario modelling, it provides the vital missing link between renewable energy targets and the measures needed to achieve them. Bringing together the latest research in climate science, renewable energy technology, employment and resource impacts, the book breaks new ground by covering all the elements essential to achieving the ambitious climate mitigation targets set out in the Paris Climate Agreement. For example, sectoral implementation pathways, with special emphasis on differences between developed and developing countries and regional conditions, provide tools to implement the scenarios globally and domestically. Non-energy greenhouse gas mitigation scenarios define a sustainable pathway for land-use change and the agricultural sector. Furthermore, results of the impact of the scenarios on employment and mineral and resource requirements provide vital insight on economic and resource management implications. The book clearly demonstrates that the goals of the Paris Agreement are achievable and feasible with current technology and are beneficial in economic and employment terms. It is essential reading for anyone with responsibility for implementing renewable energy or climate targets internationally or domestically, including climate policy negotiators, policy-makers at all levels of government, businesses with renewable energy commitments, researchers and the renewable energy industry.

From the bestselling author of *Crazy Rich Asians* (the basis for the acclaimed major motion picture) comes a deliciously fun story of family, fortune, and fame in Mainland China. Book Two of the *Crazy Rich Asians* Trilogy It's the eve of Rachel Chu's wedding, and she should be over the moon. She has a flawless Asscher-cut diamond, a wedding dress she loves, and a fiancé willing to thwart his meddling relatives and give up one of the biggest fortunes in Asia in order to marry her. Still, Rachel mourns the fact that her birthfather, a man she never knew, won't be there to walk her down the aisle. Then a chance accident reveals his identity.

Suddenly, Rachel is drawn into a dizzying world of Shanghai splendor, a world where people attend church in a penthouse, where exotic cars race down the boulevard, and where people aren't just crazy rich ... they're China rich. Look for Kevin Kwan's latest novel, *Sex & Vanity!* A streamlined and highly effective approach to trading without indicators Most forex traders rely on technical analysis books written for stock, futures, and option traders. However, long before computers and calculators, traders were trading naked. Naked trading is the simplest (and oldest) trading method. It's simply trading without technical indicators, and that is exactly what this book is about. Traders who use standard technical indicators focus on the indicators. Traders using naked trading techniques focus on the price chart. Naked trading is a simple and superior way to trade and is suited to those traders looking to quickly achieve expertise with a trading method.
