This book would suit both MALE AND FEMALE READERS. Based on a charismatic detective Parker Lamont, in Canberra, Australia's National Capital, and his pursuit of a sniper on a black unmarked motorbike, who is holding the National Capital to ransom as he strikes on random days, always at 3pm. In the background, the lives of four women are wound into the story. The main female character, Debbie, suffers from low esteem with women but has a way with men!

Human activities and decision-making have enormous impacts on the environment. This volume engages in critical conversations on these issues and how their inter-connectedness and outcomes shape the natural environment and human activity.

A motorcycle's electrical system can be daunting to even the most adept home mechanic. And yet, the more complex these systems become—and the more important to a motorcycle's function—the more useful, even critical, it will be to know something about them. That's where this book comes in with a user-friendly guide to understanding, diagnosing, and fixing the electrical systems and components that make a bike run . . . or falter. Veteran technician Tracy Martin explains the principles behind motorcycle electrical systems and how they work. He details the various tools, such as multimeters and test lights, that can be used to evaluate and troubleshoot any vehicle's electrical problem. And in several hands-on projects, he takes readers on a guided tour of their vehicle's electrical system, along the way giving clear, step-by-step instructions for diagnosing specific problems.

A guide to residential electricity for professionals and laymen, discussing tools and materials, and offering instruction on how to design electrical wiring, install main service panels, install fixtures and appliances, and other tasks.
