Work-life balance and urban living are essential while searching for a job. This can be found rather easily in a government job. Oftentimes, young graduates overlook the opportunities present in the government sector with a hope to seek a private job. Though many would still want a career in the government sector knowing the perks and benefits that come along with it. Well, SSC provides a variety of career paths to the youngsters striving for a work-life balance, job security, and a sense of purpose

Although the emirate's economic growth can be primarily attributed to its vast hydrocarbons resources, it has also made progress diversifying into new sectors such as manufacturing, tourism, aerospace, defence, finance and logistics. In addition to its economic investments, Abu Dhabi has also made major contributions to social welfare as well as infrastructure, which has been identified as the bedrock for future growth. The government has played a key role in the expansion of the security, aerospace and defence industry over the past decade in an effort to strengthen the UAE's defence capabilities and as a means of boosting economic diversification. Despite challenges such as a high level of regional competition, most local defence and aviation firms expect to see continued expansion for years to come. The evidence suggests that the emirate has succeeded in nurturing new economic sectors and is on track to meet its goals. The oil and gas sector accounted for 56.5% of Abu Dhabi's GDP at current prices in 2012, followed by construction (9.6%), manufacturing (5.9%) and real estate (4.4%).

The Business Year returns, in partnership with Parsons, the UAE Ministry of Economy, and the Abu Dhabi Department of Economic Development (ADDED), to offer insights into the process and progress of Abu Dhabi's journey through COVID-19. This 124-page publication seeks to shed light on the main strategies used by decision makers across Abu Dhabi's key sectors, as well as bring to the fore the experiences that contextualize the Emirate's wider capacity to navigate the pandemic and bounce back stronger.

Abu Dhabi's urban development path contrasts sharply with its exuberant neighbour, Dubai. As Alamira Reem puts it, Abu Dhabi, capital of the United Arab Emirates since 1971, 'has been quietly devising its own plans ... to manifest its role and stature as a capital city'. Alamira Reem, a native Abu Dhabian and urban planner and researcher who has studied the emirate's development for more than a decade, is uniquely placed to write its urban history. Following the introduction and description of Abu Dhabi's early modern history, she focuses on three distinct periods dating from the discovery of oil in 1960, and coinciding with periods in power of the three rulers since then: Sheikh

Shakhbut bin Sultan Al Nahyan (1960–1966), Sheikh Zayed bin Sultan Al Nahyan (1966–2004), and Sheikh Khalifa bin Zayed Al Nahyan (2004–). Based on archival research, key interviews and spatial mapping, she analyses the different approaches of each ruler to development; investigates the role of planning consultants, architects, developers, construction companies and government agencies; examines the emergence of comprehensive development plans and the policies underlying them; and assesses the effects of these many and varied influences on Abu Dhabi's development. She concludes that, while much still needs to be done, Abu Dhabi's progress towards becoming a global, sustainable city provides lessons for cities elsewhere.

Ninety percent of the world's oil reserves are entrusted to state-owned companies. Originally created as political instruments, these so-called national oil companies (NOCs) face new demands amid today's dwindling oil reserves and simmering social pressures. Increasingly, state-owned oil firms—particularly in the Middle East—are having to balance the political demands of their governments with the need to be commercially competitive. In this ground-breaking new volume, Valerie Marcel draws on unprecedented access to the politicians, engineers; and businessmen directing five Middle Eastern state oil companies to shed light on one of the most secretive segments of the international oil industry. The author tells the stories of Saudi Aramco, Kuwait Petroleum Corp., the National Iranian Oil Co., Sonatrach of Algeria, and the Abu Dhabi National Oil Co.—oil titans which together produce one quarter of the world's oil and hold half of the world's known oil and gas reserves. Dr. Marcel explains the complex bond between each state and its oil company, tracing the relationship's evolution from the politically charged days of foreign concessions to today's world of profit-driven decisionmaking. Drawn from over 120 interviews with company executives, middle managers, and oil-ministry officials, the author identifies a number of surprising new trends in these companies' strategy, and she paints a picture of their nascent sense of corporate identity. The book provides rare, up-to-date insight into how state-owned companies are striking a balance between their national mission and their commercial needs. The book also provides an insider's guide to these companies' unique culture. Executives and researchers in the region—both inside and outside the oil industry—will find it a valuable tool for understanding business in the Middle East.

This is a comprehensive work exploring Sino-North African relations based on a five-dimensional approach in terms of political relations, trade ties, cultural relations, security coordination, and energy cooperation. It is a quality addition to studies examining the increasing Chinese involvement in North Africa.

2011 Updated Reprint. Updated Annually. United Arab Emirates Mining Laws and Regulations Handbook

Turnaround Management for the Oil, Gas, and Process Industries: A Project Management Approach helps readers understand the phases of development in preparation for a turnaround, with each relevant phase easily identified. Specific to the process industry, especially oil and gas, petrochemical and power plants, this reference simplifies the entire lifecycle of a turnaround and provides specific examples of both successful and unsuccessful turnaround projects. By identifying the most significant performance indicators and strategies to ensure that targets are met, this book will help plant managers keep plants safe, efficient and running successfully. Aligns turnaround project management with ISO guidance and ANSI/PMI standards Utilizes the best tools for long-term planning, including instructional videos and training material Helps users gain practical knowledge through both good and bad turnaround management case studies Presents real-world issues and challenges encountered

The second volume in a new series, the Contemporary Archive of the Islamic World (CAIW), this overview of the UAE's first forty

years or so draws on the resources of Cambridge-based World of Information, a British publisher best known for its analyses of the Middle East countries.

This book examines China's relations with member states of the Gulf Cooperation Council. It highlights the depth of China's ties with the region bilaterally and multilaterally on a five-dimensional approach: political relations, trade relations, energy security, security cooperation, and cultural relations.

The United Arab Emirates (UAE) is one of the world's major oil-producing countries. A member of the Organization of the Petroleum Exporting Countries (OPEC) and of the Organization of Arab Petroleum Exporting Countries (OAPEC), the UAE has estimated recoverable oil reserves of around 97 billion barrels, of which the emirate of Abu Dhabi alone accounts for around 92.2 billion barrels. The petroleum experience of Abu Dhabi has been varied and extensive. The structure of the industry has developed from the original concession arrangements through to the establishment of the Abu Dhabi National Oil Company (ADNOC) in 1971 and its subsidiaries. During this transformation of the industry in Abu Dhabi, the legal framework governing the development of petroleum resources in the emirate has evolved, as has the tax system applicable to operating companies, the means of dispute resolution, and the overall organizational structure of the industry. The structure of the Abu Dhabi oil industry is built around the Abu Dhabi National Oil Company (ADNOC), which has rapidly assumed the role of a link between government institutions--which establish petroleum policy--and the operating companies that are responsible for executing approved projects. ADNOC is responsible for the implementation of all aspects of the oil policy of the emirate of Abu Dhabi. As the principal producer of oil and gas in the UAE, ADNOC's position in the industry is central. Atef Suleiman is uniquely qualified to assess the role of ADNOC, and he here examines the nature of its operations, and explores its ability to innovate and develop in order to successfully ride the new trends in the oil industry.

UAE Largest Importers Directory - Strategic Information and Contacts

Features news from Member Countries, incisive forum articles, a review of the oil market, and topical issues.

The Minerals Yearbook is an annual publication that reviews the mineral and material industries of the United States and foreign countries. The Yearbook contains statistical data on materials and minerals and includes information on economic and technical trends and development.
