"Child Development provides extensive learning connections throughout the chapters. This text has benefited from the involvement of one or more leading experts on diversity to ensure that it provides students with current, accurate, sensitive information related to diversity in children's development"--

The contributors reveal new findings about the basic mechanisms underlying brain development, with

particular reference to mathematical reasoning as well as to decision-making in a variety of situations.

Recently the lives of people from age 18 to 29 have changed so dramatically that a new stage of life has developed, emerging adulthood, that is distinct from both the adolescence that precedes it and the young adulthood that comes in its wake. Rather than marrying and becoming parents in their early twenties, most people in industrialized societies now postpone these transitions until at least their late twenties, and instead spend the time in self-focused exploration as they try out different possibilities in their careers and relationships. In *Emerging Adulthood*, Jeffrey Jensen Arnett identifies and labels, for the first time, this period exploration, instability, possibility, self-focus, and a sustained sense of being in limbo. An increasing number of emerging adults emphasize having meaningful and satisfying work to a degree not seen in prior generations. Marrying later and exploring more casual sexual relationships have created different hopes and fears concerning long-term commitments and the differences between love and sex. Emerging adults also face the challenge of defending their non-traditional lifestyles to parents and others outside their generation who have made much more traditional choices. In contrast to previous portrayals of emerging adults, Arnett's research shows that they are particularly skilled at maintaining contradictory emotions--they are confident while still being wary, and optimistic in the face of large degrees of uncertainty. As the demographics of American youth, the American workplace, and adulthood continue to evolve, Emerging

Adulthood is indispensable reading for anyone wanting to understand the face of modern America.

As a master teacher, John Santrock connects current research with real-world application, helping students see how developmental psychology plays a role in their own lives and future careers. Through an integrated learning goals system, this comprehensive and chronological approach to lifespan development helps students gain the insight they need to study smarter, stay focused, and improve performance.

This exciting chronological introduction to child development employs the lauded active learning approach of Laura E. Levine and Joyce Munsch's successful topical text, inviting students to forge a personal connection to the latest topics shaping the field, including neuroscience, diversity, culture, play, and media. Using innovative pedagogy, *Child Development From Infancy to Adolescence: An Active Learning Approach* reveals a wide range of real-world applications for research and theory, creating an engaging learning experience that equips students with tools they can use long after the class ends.

Thorough. Accurate. Reliable. Engaging. These are just a few words used by adopters and reviewers of John Santrock's *Child Development*. The topically-organized fifteenth edition continues with Santrock's highly contemporary tone and focus, featuring over 1,000 new citations. The popular Connections theme shows students the different aspects of children's development to help them better understand the concepts. Used by hundreds of thousands of students over fourteen

editions, Santrock's proven learning goals system provides a clear roadmap to course mastery. Connecting Research & Results As a master teacher, Santrock connects students to current research and real world application. His integrated, personalized learning program gives students the insight they need to study smarter and improve performance. Connect with Life-Span Development and connect with success! Informed and driven by research. At McGraw-Hill Education, we have spent thousands of hours with you and your students, working to understand the key needs and concerns you face in Human Development courses. The most common topics raised include managing the vast amount of content inherent to this course and ensuring the dependability of the assigned material—is it current and accurate? The result of this research is John Santrock's Life-Span Development. Life-Span Development ensures students complete and understand the assigned material in a number of ways: Santrock's hallmark Learning Goals pedagogy provides a comprehensive roadmap to the text material, clearly pointing out the core concepts fundamental to students' learning and performance. Our LearnSmart Advantage adaptive study tools increase students' efficiency in studying by identifying what they know, and more importantly what they don't know, providing immediate remediation for the areas in which they are struggling. At the same time, instructors have access to powerful visual reports allowing them to quickly see where students' strengths and weaknesses lie. Connect Lifespan takes your instruction and your students' learning experience

to the next level without requiring hours of setup whether you are teaching face-to-face, online, or in a hybrid setting. The 15th edition continues with the connections theme to help students better understand the concepts among the different aspects of human development. This recurring theme of connections—Developmental Connections, Topical Connections, Connecting Development to Life, Connecting with Careers, and Connections through Research—ties together concepts from across chapters to reinforce the learning process and connects the material to students' everyday lives and future aspirations. Our Milestones of Development video series helps bring the course material to life, allowing students to witness development as it unfolds. And of course, all of the text material is informed by Life-Span Development's unique board of expert consultants—a who's who of developmental psychology—who make sure the material is as accurate and up-to-date as possible.

Adolescence McGraw-Hill Education

Adolescence is a time when youth make decisions, both good and bad, that have consequences for the rest of their lives. Some of these decisions put them at risk of

lifelong health problems, injury, or death. The Institute of Medicine held three public workshops between 2008 and 2009 to provide a venue for researchers, health care providers, and community leaders to discuss strategies to improve adolescent health.

Connecting research and results. As a master teacher John Santrock connects students to current research and real-world application, helping students see how developmental psychology plays a role in their own lives and future careers. Hurt provided a vivid and insightful view into the world of today's teenagers. Now leading youth ministry expert Chap Clark substantially updates and revises his groundbreaking bestseller (over 55,000 copies sold).

Hurt 2.0 features a new chapter on youth at society's margins and new material on social networking and gaming. Each chapter has been thoroughly revised with new research, statistics, quotations, and documentation.

Praise for the first edition "Based on solid research and years of insightful observation, Hurt offers a deep and penetrating look into the contemporary adolescent experience that will serve us well as we work to have a prophetic, preventive, and redemptive influence on the world of today's youth culture."--Walt Mueller, Center for Parent/Youth Understanding

"A daring yet hopeful glance into the underworld of teen promiscuity, self-mutilation, and suicide. . . . A groundbreaking resource for parents, youth ministers, and counselors."--ForeWord

"Clark's classic book [is] highly recommended by youth

workers and educators who write about teenage stress. It is foundational reading that provides valuable insight into the hurting hearts of young people."--YouthWorker Journal "Clark has been stepping inside the world of teenagers for many years. This book is a unique invitation for us to join him in their world. When we finish this journey, we will care more about kids and understand who they are and the challenges they face."--Denny Rydberg, *Young Life* "Drawing together research from many others along with his fresh exploration into the world beneath, Clark paints a compelling picture of adolescent life. . . . This book is a must-read for anyone who has any contact with adolescents."--*Journal of Youth Ministry*

This book presents a detailed and updated review of the widespread changes that take place during adolescence, adopting a preventive perspective that reflects physical, social, cognitive, and emotional changes. It addresses a broad range of aspects, including: the preventive programs and their systemic effects; the role of environment in influencing the healthy behaviors of adolescents and young adults; the use of e-Health technology in health and behavioral interventions for adolescents; and the clinical and prognostic implications of primordial prevention in healthy adolescents. All of these elements are subsequently reviewed using a multidimensional approach, in order to offer extensive information on the complex changes that characterize adolescents' physiological, psychological, and neurobiological development. In addition, the book depicts the preventive strategies currently used in

various social settings (school, family, sport club, health policies) aimed not only at reducing lifestyle risk behaviors, but also at improving resilience, happiness, social involvement, self-esteem, and sociability. This update is essential in the light of the fact that, to date, prevention has mainly been directed towards adolescents with physical or mental disorders rather than their healthy peers. As such, the book offers a valuable tool for pediatricians, child and adolescents psychiatrists, and for all professionals involved in Health Promotion and Disease Prevention.

Designed to teach nurses about the development, motivational, and sociocultural differences that affect teaching and learning, this text combines theoretical and pragmatic content in a balanced, complete style. --from publisher description.

The Third Edition of *Nutrition Education: Linking Research, Theory, and Practice* provides a simple, straightforward model for designing effective nutrition education programs that address the personal and environmental influences that affect individuals food choices and assist them in adopting healthy behaviors throughout their lifetime. Using a six-step process, this Third Edition integrates research, theory, and practice and provides advice and direction on designing, implementing, and evaluating theory-based nutrition education.

Written by the author of highly effective psychology texts relied upon by thousands of teachers and

students, Educational Psychology is a well-crafted text that emphasizes the application of theory to classroom practice. With richly evocative classroom vignettes provided by practicing teachers, as well as the most case studies - three per chapter - of any Introductory text, Santrock's Educational Psychology helps students think critically about the research basis for best practices. Additionally, Santrock's hallmark Learning System organizes the content into manageable chunks to support retention and mastery, and make it much more likely that students will have an engaging and successful course experience.

More students learn from John Santrock's Adolescence than from any other text in this field. Students and instructors rely on the careful balance of accurate, current research and applications to the real lives of adolescents. The fully-revised eleventh edition includes a new chapter on health, expanded coverage of late adolescence, and more than 1200 research citations from the 21st century.

More students learn from John Santrock's Adolescence than from any other text in this field. The 15th edition combines proven pedagogy and the most current research to provide a market-leading presentation of adolescence. This time-tested text provides compelling contemporary research, including updates from a multitude of leading experts in the field. The text's accessible presentation,

plentiful applications, and engaging writing foster increased mastery of the content. The new edition continues with the “Connections” theme, guiding students to connect topical processes in development, connect research to what we know about development, and connect development to the real world. The new edition also includes substantially expanded material on diversity and culture, adolescents’ and emerging adults’ health and well-being including numerous recommendations for improving the lives of adolescents, and expanded emphasis on the positive aspects of adolescent development. Children focuses on providing a systematic, integrative approach that helps students make connections in their learning and practice. The main goals of this text are to connect with today’s students, connect research on children’s development, connecting the developmental process, and connecting development to real life. Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who

contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well.

Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality

of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Adolescence is one of the most fascinating and complex transitions in the human life span. Its breathtaking pace of growth and change is second only to that of infancy. Over the last two decades, the research base in the field of adolescence has had its own growth spurt. New studies have provided fresh insights while theoretical assumptions have changed and matured. This summary of an important 1998 workshop reviews key findings and addresses the most pressing research challenges.

Connecting research and results. As a master teacher, John Santrock connects students to current research and real-world application, helping students see how developmental psychology plays a role in their own lives and future careers. Through an integrated, personalized digital learning program, students gain the insight they need to study smarter and improve performance.

From reviews of the First Edition: "[W]ell written with a clear focus on the undergraduate audience, it covers a wide range of relevant topics that undergraduates are interested in, it makes human development theories accessible to undergraduates, and it integrates multiple cultural lenses ... I absolutely love it compared to the other options on the market in this field ." -- Michelle Tichy,

University of Northern Iowa "The writing style is excellent! ...The Introductory 'What would you do' scenarios are great for stimulating critical thinking at the beginning of the class discussions. . . . 'Connecting with Children' sections provide helpful guidelines for teachers, families and other professionals. . . . [The text makes an] intentional effort to cover diversity and culture." -- Winnie Mucherah, Ball State University "One of the reasons I changed to this text was the very clear and interesting writing style. I found myself absorbed in the information even though I have been using these types of texts for decades. The level is appropriate for the students. In addition, if a topic is introduced, it is presented in some depth. . . . There is a great deal of material on practical considerations related to parenting and teaching as well as to cross-cultural issues and diversity. Topics are covered thoroughly and related to one another. I also like the layout of the material in terms of how it appears on the page, ease of reading the print, etc." -- Sandra Twardosz, University of Tennessee, Knoxville

"In "Children" 15e students understand ways to apply content about child development to the real world and improve children's lives, and to motivate students to think deeply about their own personal journey through life and better understand who they were as children and how their experiences and development have influenced who they are today"--

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a

rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

**PLANNING EFFECTIVE INSTRUCTION: DIVERSITY RESPONSIVE METHODS AND MANAGEMENT**, Fifth Edition, fully equips readers to teach in ways that meet the needs of all students in today's diverse classroom. The four-part organization corresponds with a new framework for diversity responsive teaching that helps focus teachers' efforts in planning for diversity. Represented by a visual organizer, this framework helps readers see that what they teach, how they teach, and the context for teaching interact to bring about the success of all students. Erika Hoff's LANGUAGE DEVELOPMENT, 5th Edition communicates both the content and the excitement of this quickly evolving field. By presenting a balanced treatment that examines all sides of the issues, Hoff helps readers understand different theoretical points of view-- and the research processes that have lead theorists to their findings. After an overview and history of the field, Hoff thoroughly covers the biological bases of language development and the core topics of phonological, lexical, and syntactic development. She also provides in-depth discussions of the communicative foundations of language, the development of communicative competence, language development in special populations, childhood bilingualism, and language development in the school years. As seen in Time, USA TODAY, The Atlantic, The Wall Street Journal, and on CBS This Morning, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent need to understand today's rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes iGen distinct from every

generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of iGen just graduating from college, we all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their views to their older peers. Because where iGen goes, so goes our nation—and the world.
