Mantle or Mays? A-Rod or Jeter? Biggio or Morgan? Clemens, Maddux, and Randy Johnson -- or Pedro, Palmer, and Carlton? These are questions baseball fans can spend endless hours debating. Former All-Star pitcher and National League Manager of the Year Larry Dierker has his own opinions, and he shares them in *My Team*, his fascinating discussion of the greatest players he has seen in his four decades in the major leagues. Dierker selects twenty-five players for My Team and another twenty-five for the opposition, the Underdogs, or "Dogs." There are two players at each position, five starting pitchers, and four relievers. (When your starters are the likes of Roger Clemens, Greg Maddux, Bob Gibson, Tom Seaver, Nolan Ryan, and Juan Marichal, you don't worry about bullpen depth.) All are players that Dierker has played with or against or watched in his years as player, coach, manager, and commentator. Each athlete must have played at least ten years in the major leagues to qualify, and players are judged on their ten best seasons. Leadership skills and personality -- critical components of team chemistry -- are highly valued. So how is it possible to select two teams composed of outstanding ballplayers from the past forty years and not have room for Sandy Koufax, Reggie Jackson, Carl Yastrzemski, or Cal Ripken Jr.? Dierker explains his choices, analyzing each position carefully, always putting the team ahead of the individual player. He provides statistics to back up his selections, and often relates personal anecdotes about the players. (From his first All-Star Game in 1969, Dierker offers a wonderful anecdote about Hank Aaron, by then an All-Star veteran.) *My Team* may start more debates than it settles, but Dierker's insights, and his passion for the game, will enlighten and fascinate true baseball fans.

How Boston radio station WBCN became the hub of the rock-and-roll, antiwar, psychedelic solar system. While San Francisco was celebrating a psychedelic Summer of Love in 1967, Boston stayed buttoned up and battened down. But that changed the following year, when a Harvard Law School graduate student named Ray Riepen founded a radio station that played music that young people, including the hundreds of thousands at Boston-area colleges, actually wanted to hear. WBCN-FM featured album cuts by such artists as the Mothers of Invention, Aretha Franklin, and Cream, played by announcers who felt free to express their opinions on subjects that ranged from recreational drugs to the war in Vietnam. In this engaging and generously illustrated chronicle, Peabody Award-winning journalist and one-time WBCN announcer Bill Lichtenstein tells the story of how a radio station became part of a revolution in youth culture. At WBCN,

creativity and countercultural politics ruled: there were no set playlists; news segments anticipated the satire of The Daily Show; on-air interviewees ranged from John and Yoko to Noam Chomsky; a telephone "Listener Line" fielded questions on any subject, day and night. From 1968 to Watergate, Boston's WBCN was the hub of the rock-and-roll, antiwar, psychedelic solar system. A cornucopia of images in color and black and white includes concert posters, news clippings, photographs of performers in action, and scenes of joyousness on Boston Common. Interwoven through the narrative are excerpts from interviews with WBCN pioneers, including Charles Laquidara, the "news dissector" Danny Schechter, Marsha Steinberg, and Mitchell Kertzman. Lichtenstein's documentary WBCN and the American Revolution is available as a DVD sold separately.

For over a century, we've accepted the scientific consensus that cancer results from genetic disease due to chromosomal damage in cell nuclei. But what if cancer isn't a genetic disease after all? What if scientists are chasing a

flawed paradigm, and cancer isn't a disease of damaged DNA but rather of defective metabolism as a result of mitochondrial dysfunction? What if that startling truth could revolutionize our understanding of other diseases as well--and show us a radical new path to optimal health? In this groundbreaking guide, the first of its kind, New York Times best-selling author and leading natural-health practitioner Joseph Mercola explains how nearly all disease is caused by defective metabolic processes. Then he reveals what's really causing your metabolism to go haywire: damage and dysfunction in the mitochondria, thousands of which are at work in nearly every cell in your body, generating 90 percent of the energy you need to stay alive and well. When mitochondria become damaged in large numbers, it is impossible to stay healthy. Dr. Mercola shows you that you can take control of your health simply by giving your body the proper fuel--and it's not what you've likely been led to believe. A ketogenic diet, very low in carbohydrates and high in healthy fats, is the way to optimize the biochemical pathways that suppress disease and support healing. And the benefits can be astonishing--not only in treating or preventing serious illness, but in boosting your brainpower, increasing your energy, helping you lose weight and keep it off, and much more. As you read this book, you'll learn in clear, rational terms how your body works at a molecular level. You'll finally understand the type of fuel it's designed to burn in the most efficient way possible. You'll find detailed guidelines for starting and sticking with a ketogenic eating plan. And you won't have to wait a decade or two for metabolic mitochondrial therapy to make its way into the mainstream. You can build a healthier body and brain at the cutting edge of this exciting new discipline, starting right now.

From health and fitness expert, and author of *The Fat-Fighter Diet*, comes a guide to dropping the fat from your most stubborn, hard-to-lose "trouble" spots. We are obsessed with fat. But how much do you really know about it? In *Trouble Spot Fat Loss*, Bruce Krahn tackles fat-loss myths, explains what fat is, how it works, and how to drop fat from trouble areas in a healthy and sustainable way. This book combines diet and fitness in an accessible manner, without being restrictive or damaging to the body as so many modern fad diets are. *Trouble Spot Fat Loss* tells you where to start and how to stay motivated to achieve the healthy body you've always wanted. Contributing a foreword to the book is Vince DelMonte, the world-renowned "Skinny Guy Saviour," who developed the No-Nonsense Muscle Building program to help people live healthier, happier lives with a more satisfying body. His program has sold tens of thousands of copies across the world. *Trouble Spot Fat Loss* shows you how to reshape your body in a healthy way and keep fat off those trouble spots for good.

In *Clean Gut*, Alejandro Junger, M.D, New York Times bestselling author of *Clean* and creator of the world-famous Clean Program, delivers a complete toolkit for reversing disease and sustaining life-long health. All of today's most-diagnosed ailments can be traced back to an injured and irritated gut. The gut is an intricate and powerful system, naturally designed to protect and heal the body every moment of every day. And yet for far too many of us, this remarkable system is in disrepair, which leads to all kinds of health problems—from extra pounds, aches and pains, allergies, mood swings, and lack of libido, to heart disease, cancer, autoimmune disorders, insomnia, and depression. But we no longer have to be sick to get healthy. In this groundbreaking program, Alejandro Junger, M.D. explains how instead of treating the symptoms as they arise, we can preemptively attack disease before it takes root in the gut. No matter your current state of health, you will benefit from this program: *Clean Gut* will help you put an end to everyday ailments, reverse chronic disease, and achieve true, long-lasting health.

Watching her child die is the hardest thing a mother can ever do. But for Kay Gilderdale, saying a final goodbye to her only daughter Lynn was exceptionally painful: she'd played a part in her death. Lynn was just 14 when she was struck down by the crippling disease ME, leaving her paralysed and in constant agony. Over the next 17 years, she became desperate to escape her miserable existence, even begging her mum to help her die. So, one night, when Kay found Lynn attempting suicide, she was forced to make an impossible decision. Continue watching her child suffer or help her end the pain? Eventually, fighting her every instinct, Kay helped her precious daughter take a fatal overdose. But while Lynn was finally free, her mother faced a fresh agony - a possible lifetime behind bars. The highly controversial trial that followed opened a fierce public debate on assisted suicide. Is it murder or mercy? Here, in her heartbreaking story, Kay reveals the harrowing truth behind the headlines and the desperate lengths a mother will go to for the love of a child.

The easy way to take charge of your adrenal health Despite their small size, the adrenal glands play an important role in the body, producing numerous hormones that impact our development and growth, affect our ability to deal with stress, and help to regulate kidney function. In Adrenal Fatigue For Dummies, you'll find clear self-evaluations and treatment guidelines that will empower you to take charge of your adrenal health through nutrition, vitamins, herbs, bioidentical adrenal hormone supplementation, and self-care practices. Adrenal fatigue is in essence a "tired out" adrenal gland that is not able to support the body the way that it should. The effects can be far-reaching and affect the quality of

Activate your weight-loss autopilot--use the power of simple intermittent fasting to lose the pounds and keep them off, from Hollywood trainer and #1 New York Times bestselling author Jorge Cruise. Timing is everything when it comes to losing weight. Or, as celebrity trainer Jorge Cruise explains: When we eat is as important as what we eat. Building on the scientifically proven but hard-to-sustain day-on, day-off technique known as "intermittent fasting," Cruise has developed a revolutionary masterplan that simplifies your calendar and eliminates between-meal hunger. He divides every day into two easy-to-remember nutritional zones: a 16-hour evening and overnight "burn zone" (semi-fasting) followed by an 8-hour "boost zone" (eating). Ingeniously, his plan also includes "bumper foods" that can be consumed in either zone--around the clock--to keep you satiated and burning fat throughout. You'll never be hungry if you don't really ever have to fully fast! Backed by the very latest research and client-tested for optimal results, The Cruise Control Diet unlocks the key to dramatic results with * recipes for deliciously unexpected boost zone foods, such as Portobello Mini Pizzas, Zoodle Spaghetti & Meatballs, Sheet Pan Salmon & Asparagus, and even Almond Butter Cookies * high-fat, no-sugar burn-zone recipes for craving-quenching foods like Double Chocolate Fudge Mousse and Vanilla Chai Tea Latte * weekly menus and handy grocery lists to take the guess work out of the equation * candid testimonials from Cruise's clients and test-panel participants * an optional burn-zone exercise program with instructional photos With The Cruise Control Diet you'll automate your diet and finally conquer weight loss forever! A Yale-trained, board-certified family physician with a specialty in women's health and obstetrics delivers a proven 28-day program to heal the overwhelmed, overloaded systems, and prevent and reverse the myriad of symptoms affecting the vast majority of women today. Weight gain, fatigue, brain fog, hormonal imbalances, and autoimmune conditions—for years, health practitioners have commonly viewed each as individual health problems resulting from a patient's genetic bad luck, poor lifestyle choices, or lack of willpower. Patients, too, have turned to different doctors to alleviate their specific symptoms: an endocrinologist for a thyroid problem; a gynecologist for hormonal issues; an internist for weight, diabetes, and high blood pressure; a rheumatologist for joint problems, and even to therapists or psychologists. While these ailments may seem unrelated, Dr. Aviva Romm contends that they are intrinsically connected by what she calls Survival Overdrive Syndrome, a condition that occurs when the body becomes overloaded. SOS can result from childhood survival patterns or adult life stressors that are compounded by foods we eat, toxins in our environment, viral infections, lack of sleep, disrupted gut microflora, and even prescribed medications. Two of the systems most affected are the adrenal system and the thyroid, which control mood, hormones, inflammation, immunity, energy, weight, will power, blood sugar balance, cholesterol, sleep, and a host of other bodily functions. When these systems become overwhelmed they lead to symptoms that can develop into full blow illnesses, including diabetes, hypertension, osteoporosis, and heart disease—all of which have medically provable origins in SOS. *The Adrenal Thyroid Revolution* explains SOS, how it impacts our bodies and can lead to illness, and most importantly, offers a drug-free cure developed through Dr. Romm's research and clinical work with tens of thousands of patients. In as little as two weeks, you can lose excess weight, discover increased energy, improve sleep, and feel better. With *The Adrenal Thyroid Revolution*, you can rescue your metabolism, hormones, mind and mood—and achieve long-lasting health.

Women are diagnosed with 80% of the over 145 identified autoimmune diseases (that number is still growing). Over 90% of the population has a form of autoimmune disease and inflammation. Several autoimmune diseases, including lupus, rheumatoid arthritis, Hashimoto's thyroiditis, myasthenia gravis, and multiple sclerosis, afflict women anywhere from two to 10 times more often than they do men. Getting to the root cause to reverse autoimmunity is possible. There are 3 root causes that functional medicine doctors spend most of their time talking about. There is one more piece to the autoimmune puzzle that affects women more than it does men. Dr. Keesha Ewers calls this the "missing piece" of the complex autoimmune puzzle. Dr. Keesha is one of the 50 million Americans who received an autoimmune diagnosis. In *Solving the Autoimmune Puzzle*, she teaches the same Freedom Framework she used to reverse not only her own autoimmune disease (rheumatoid arthritis), but also the autoimmunity in thousands of others.

The New York Times bestselling author of The Plan is back to help readers customize their diet and exercise less to lose more weight! The Plan -- the instant New York Times and USA Today bestseller that helped readers pinpoint which "healthy" foods were making them gain weight -- has helped hundreds of thousands of readers slim down. Now nutritionist Lyn-Genet Recitas shares her groundbreaking new 30-day program that helps readers create a customized diet and exercise plan to boost their metabolism and burn more fat. Readers will discover: why exercising less -- as little as 12 minutes, 3 times a week! -- can help them lose more weight; why "healthy" foods like oatmeal and salmon may be packing on the pounds, but French fries may not; and how to optimize their thyroid function. Featuring all-new recipes and backed by science, THE METABOLISM PLAN is primed to revolutionize the diet shelf and help readers shed weight for good.

One of the preeminent political philosophers of the 20th century makes a compelling argument for the political cogency of literary writing in this book which among to his intellectual autobiography and an introduction to his work.

This book describes the paleomagnetism of sediments and sedimentary rocks, how sediments and sedimentary rocks become magnetized, and how the physical and chemical processes involved can affect the accuracy of paleomagnetism. Topics covered include depositional and post-depositional remanence acquisition, the detection and correction of compaction-caused inclination shallowing, reduction diagenesis of magnetic minerals, chemical remagnetization, and rotation of remanence by grain-scale rock strain. The book also has a chapter on environmental paleomagnetism, including examples of the new technique of high-resolution rock magnetic cyclostratigraphy and its application to sedimentary sequences. By emphasising the accuracy of sedimentary paleomagnetism and the magnitude of post-depositional processes that can affect it, the book will be invaluable in the geologic interpretation of sedimentary paleomagnetic data. Paleomagnetism of Sedimentary Rocks will be welcomed by paleomagnetists, students of paleomagnetism and all Earth scientists who use sedimentary paleomagnetic data in their research. Additional resources for this book can be found at: www.wiley.com/go/kodama/paleomagnetism.

At some point in all of our lives we go through a period of feeling tired, run down or exhausted without being able to point to a readily identifiable reason. Whilst such symptoms could be attributed to a variety of factors - some lifestyle related and some related to identifiable medical conditions - some people take the view that a condition known as adrenal fatigue could be an underlying cause, and that this is an issue of increasing importance. Your adrenal glands are fundamental to a healthy body and mind - they produce a variety of key hormones, including those underpinning our "fight or flight" responses. Looking after the adrenal glands, and the wider endocrine support system is, therefore fundamental. This book explains why your adrenal glands and the hormones they produce are so important. The book then gives some analysis of why diet, exercise and stress levels are important in relation to the functioning of the adrenal glands - and what you might be able to do to develop a more robust system - also likely improving your overall general health in the process. The goal of this book is to give you the tools to help you understand the condition, consider whether or not you need to seek medical attention, and set yourself on a path to self-treatment and complete recovery. Even in broader terms, if you have ever felt that you may be somewhat low on energy, then we urge you to read this book, and put its advice into practical, daily use.

An off-the-beaten-path tour of the city's hidden highlights, and the stories behind them. London is full of curiosities. Who knew that beneath the Albert Memorial lies a chamber resembling a church crypt? Or that there are catacombs under Camden? Who would expect to find a lighthouse in East London, sphinxes in South London, dummy houses in West London, or a huge bust of film director Alfred Hitchcock in North London? How many of those who walk past Cleopatra's Needle pause to consider why a 3,000-year-old Egyptian monument stands beside the Thames? How many know that what was once London's smallest police station can be seen in Trafalgar Square? Or that pineapples are used in the architectural design of so many buildings? Or why there are memorials to the Mayflower and Pilgrim Fathers in Rotherhithe? Learn more about the capital of curiosities in this delightful guide for lovers of history, trivia, and travel.
