Cashing in on Education Mercedes Mateo Díaz, Lourdes Rodriguez-Chamussy, 2016-10-19 Investments in education across countries in Latin America and the Caribbean have transformed the lives of millions of girls and the prospects of their families and societies. Unleashing the full economic potential of women is nevertheless still a curtailed issue in the region: just about half of women are unable to participate in paid work. The majority of the population out of the labor market is women between the ages of 24 and 45. This is the largest share of the available pool of unused human capital countries have, and where mothers of young children are concentrated. This book argues that more and better childcare constitutes a fundamental policy option to improve female outcomes in the labor market, but countries need to pay particular attention to the design and features of such services. First-rate educational programs will be useless if children are not enrolled or do not attend formal education centers. A large program expansion will be wasted if parents cannot enroll their children because they are unable to reach the center, don't trust its quality, if the program is too expensive, or if work and care schedules are not compatible. Through an integrated framework applied to each country and an overview of the existing evidence, this book addresses the why and what questions about policy relevant instruments to achieve female labor participation. Parts I and II of the book lay out the motivation for Latin-American and Caribbean countries to act depicting their current situation both in terms of women's labor participation and the use and provision of childcare services. Moreover, this book tackles the how question contributing to the incipient evidence about factors affecting the take-up of programs and demand for childcare services and other informal care arrangements. Part III of the book explores how to improve services and implement more and better formal, center-based care arrangements for young children. It looks at international benchmarks, discusses different experiences and proposes specific actions to solve potential inequalities in access to childcare.

Self-Determined Learning Stewart Hase, Chris Kenyon, 2013-09-26 Heutagogy, or self-determined learning, redefines how we understand learning and provides some exciting opportunities for educators. It is a novel approach to educational practice, drawing on familiar concepts such as constructivism, capability, andragogy and complexity theory. Heutagogy is also supported by a substantial and growing body of neuroscience research. Self-Determined Learning explores how heutagogy was derived, and what this approach to learning involves, drawing on recent research and practical applications.

The editors draw together contributions from educators and practitioners in different fields, illustrating how the approach can be used and the benefits its use has produced. The subjects discussed include: the nature of learning, heutagogy in the classroom, flexible curriculum, assessment, e-learning, reflective learning, action learning and research, and heutagogy in professional practice settings.

Journal of Elder Policy Eva Kahana, 2020-06-21 The Journal of Elder Policy (JEP) aims to offer a forum for innovative thinking, theorizing, program planning and empirical research relevant to elder policy. We seek to publish informative articles relevant to policies that enhance quality of life and well-being of older adults including the old-old. Why a new interdisciplinary journal about old age and policy? The study of age is thriving as the scientific community works to identify and study the changing circumstances and options in later life among new cohorts of older adults. The welfare of older adults is importantly influenced by social changes, including policy arrangements, impacting both the young and old. We seek to understand factors that shape family supports available to those with needs for medical and social care in late life. We will apply diverse disciplinary lenses to explore the social forces that shape elder policy and affect what care providers can offer and sustain. Current policies and service programs to protect the growing old-old population are often inadequate to ensure a good old age. The organization and delivery of medical care poses major challenges to older adults with co-morbid conditions and disabilities. Income inequalities put low SES individuals at greater risks in old age. Strains on policy systems and inadequate resources limit care of the old-old population. But there is also great opportunity at hand as exemplified by technological advances and breakthroughs. We aim to call attention to these issues and propose improved policies that are informed by sound research in the US and around the world. Gerontechnology José García-Alonso, César Fonseca, 2019-04-13 This book constitutes the thoroughly refereed post-conference proceedings of the First International Workshop on Gerontechnology, IWOG 2018, held in Cáceres, Spain on December 14, 2018, and in Évora, Portugal, on December 17, 2018. The 24 revised full papers along with 8 short papers

presented were carefully reviewed and selected from 71 submissions. The papers are organized in topical sections on knowledge management for health: context, cognition, behavior and user modeling; technologies to increase the quality of life of the elderly population; Internet of Things (IoT); smart technologies and algorithms for health; monitoring and management of chronic and non-chronic diseases; solutions for active aging, social integration and self-care; health interventions to support caregivers of elderly people; public health initiatives.

The Political Economy of Educational Reforms and Capacity Development in Southeast Asia Yasushi Hirosato, Yuto Kitamura, 2009-02-07 Yasushi Hirosato and Yuto Kitamura Developing countries, including Southeast Asian countries, face an enormous challenge in ensuring equitable access to quality education in the context of deepening globalization and increasing international competition. They must simultaneously meet the goals of Education for All (EFA) at the basic education level and of developing a more sophisticated workforce required by the knowledge-based economy at the post-basic, especially tertiary, education level. To meet this challenge, developing countries need to reform/renovate their education systems and service deliveries as an integral part of national development. However, most of them have not yet fully developed the individual, institutional, and system capacities in undertaking necessary education reforms, especially under decentralization and privatization requiring new roles at various (central and local, or public and private) levels of administration and stakeholders. Provided that an ultimate vision of educational development and cooperation in the twenty-first century would be to develop indigenous capacity in engineering education reforms, this book analyzes the overall education reform context and capacity, including the status of sector program support using the sector-wide approach (SWAp)/program-based approach (PBA) in developing countries. We also address how different stakeholders have been interacting in order to promote equitable access to quality education, particularly from the perspectives of capacity development under the system of decentralization.

Gender-Inclusive Treatment of Intimate Partner Abuse John Hamel, LCSW, 2013-11-08 This groundbreaking book on the gender-inclusive treatment of intimate partner abuse has been fully updated to reflect new and refined evidence-based approaches that have evolved since the first edition was published nearly ten years ago. It describes new treatment protocols that are strongly supported by current research that enables mental health practitioners to engage in a more nuanced and gender inclusive conceptualization and treatment of intimate partner abuse in its many permutations. The book eschews the field's previous reliance on traditional domestic violence and treatment protocols to offer new paradigms that reflect the trend toward a more balanced, evidence-based and less heteronormative conceptualization of partner abuse. It presents the latest findings from the third installment of the Partner Abuse State of Knowledge Project. Included are new examples of evidence-based programs currently in existence and those that are in formative stages, fully updated exercises and handouts, new risk assessment instruments, and new definitions of evidence-based treatment. Of special note are several new

appendices that include updated assessment forms, a victim safety plan, client workbook guidelines and exercises, resources and programs for court-ordered clients, and exercises for high conflict family violence parent groups. In addition, a new assessment protocol will be available as a free download. New to the Second Edition: Includes the latest findings from the Partner Abuse State of Knowledge Project Presents most current literature on risk assessment instruments Provides new definitions of evidence-based treatment regarding degree of rigor along with outcome data and newest relevant studies Discusses promising new group programs Includes a new assessment tool available as free download Describes several new, evidence-based gender-inclusive approaches Offers comprehensive appendices that reflect recent advances including new assessment forms, a victim safety plan, client workbook guidelines and exercises, resources and programs for court-ordered clients, and exercises for high conflict family violence parent groups

Made in Russia Carlos Whitlock Porter, 2013-12-21 A stumbling block for Revisionists, just as it was for the post-war German defendants, is the seeming wealth of documents and testimony assembled by Allied prosecutors for the Nuremberg trials. The more than sixty volumes of trial material which appeared in the wake of the Trial of the Major War Criminals and twelve subsequent trials before the (American) Nuremberg Military Tribunal have for many years supplied a massive compilation of apparently damning evidence against Germany's National Socialist regime. Most Exterminationists, academic and lay, believe that Germany's aggression in beginning the war, and the numerous atrocities and war crimes laid to the German account, above all the alleged Holocaust of European Jewry, are amply documented in the so-called Nuremberg record.

Teaching For Quality Learning At University Biggs, John, Tang, Catherine, 2011-09-01 A bestselling book for higher education teachers and administrators interested in assuring effective teaching.

Globalizing the student rebellion in the long '68 Andrés Payà Rico, José Luis Hernández Huerta, Antonella Cagnolati, Sara González Gómez, Sergio Valero Gómez, 2018-09-28 This volume brings us closer to the dynamics of the educational world, especially students, from a wide range of national and regional scenarios, with a special focus on Europe and Latin America. In this way, a plural panorama is shown, in which the stories centered on the usual protagonists of the 1968 processes are accompanied by other scenarios, often considered secondary, but which this volume inserts in a more general story that helps us understand how the processes of the 60s were not concrete or national, but got an absolute regional and global significance. We see a complex process of transnational demand that ranged from Eastern Europe, included in the Soviet bloc, to the very heart of the Western Hemisphere, with the United States as the main axis, passing through the politically varied Western Europe, submitted to the same processes and cultural influences. In this sense, to the works that deal with the United States and France, are added others focused on Italy, Spain and Brazil, as priority focus areas, together with other European and Latin American landscapes: Great Britain, Portugal, Greece, Slovakia, Hungary, Chile, Uruguay and

Mexico, without missing, in addition, the case of one of the most unique actors on the international scene: the State of Israel. With this volume, we want to continue advancing in the knowledge of the educational world of the second half of the 20th century. Great are the challenges of this world at the beginning of the 21st century and many of them were already evident in 1968. Others have materialized as a result of those events. To confront both of them, we must first identify and analyze them, as well as being aware of their magnitude. We hope that all this work can contribute to this aim.

International Handbook of Cross-Cultural Neuropsychology Barbara P. Uzzell,Marcel Ponton,Alfredo Ardila,2007-01-05 The role of culture is significant when measuring cognitive abilities during neuropsychological assessments. However, cultural diversity is a frequently overlooked moderating variable. The International Handbook of Cross-Cultural Neuropsychology emphasizes major distinctions among cultural groups in North and South America, Europe, Africa, Asia, an

No Limits to Learning J. W. Botkin,M. Elmandjra,M. Malitza,2014-05-19 This book reconsiders global problems such as energy and the arms race, as well as more recent issues like cultural identity, communications and information. Attention is primarily focused on human problems and potential, rather than on material constraints to growth. The analysis places particular importance on new forms of learning and education, for individuals and especially for society, as indispensable for laying the groundwork to deal with global issues, and for bridging the gap between the complexity and risks of current global issues and our presently inadequately developed capacity to face up to them. This is the first Club of Rome report to authors from socialist and Third World countries as well as from the West

Intimate Partner and Family Abuse John Hamel, LCSW,2008-06-16 The collected case examples are noteworthy in their diversity of presenting issue, treatment format, and outcome. As a whole, they underline our continued need to conduct assessments with clients prior to initiating treatment, to direct treatment toward identified client-related problems (in essence, meeting clients where they are), and to collect data that speaks to the effectiveness of our interventions in many

settings and with many types of clients. -Jennifer Langhinrichsen-Rohling, PhD, Professor of Psychology, University of South Alabama Shows how to successfully conduct family interventions using case studies Includes male-perpetrated, female-perpetrated, and mutual violence scenarios Presents a variety of theoretical orientations Includes discussion questions after each case study This casebook showcases a wide variety of couples and families whose domestic violence cases vary in their composition, ethnic and socioeconomic status, and mental health issues. The case authors outline different therapeutic approaches for each case, including cognitive-behavioral, family systems, feminist, problem-solving, and many others. Each account includes a thorough description of the assessment procedure, treatment goals and reasons for selecting a particular approach and an account of the course of treatment. The book is primarily intended for mental health professionals and graduate students in the fields of family therapy, counseling, and family violence; but will also be of value to anyone in the field of family violence and those concerned with domestic violence public policy, prevention, and intervention.
