comprehensive treatment of selected topics in a clear and understandable manner. The third edition reflects current issues in advanced accounting, integrates all three alternative recording methods (cost, partial equity, complete equity) for teaching consolidation concepts using worksheet icons and labels to distinguish among the three methods and new, enhanced student pedagogy.

Advanced Accounting delivers an in-depth, comprehensive introduction to advanced accounting theory and application, using actual business examples and relevant news stories to demonstrate how core principles translate into real-world business scenarios. Clearly defined and logically organized Learning Objectives aid in student comprehension, while highlighted Related Concepts illustrate how individual concepts fit into the larger picture. Short answer questions throughout the chapter allow students to test their knowledge before reaching the more in-depth end-of-chapter questions, promoting a deeper understanding of both technical and conceptual aspects of the field. Written by active accounting researchers, this text brings clarity and flexibility to the central ideas underlying business combinations, consolidated financial statements, foreign currency transactions, partnerships, non-profit accounting and more. This new Seventh Edition has been updated to reflect the latest changes to FASB and GASB standards, allowing

students to build a skill set based on up-to-date practices. With a student-oriented pedagogy designed to enhance comprehension, promote engagement, and build real-world understanding, this user-friendly book provides an essential foundation in current advanced accounting methods and standards.

Guiding students through the complexities of advanced accounting, *Advanced Financial Accounting*, helps students to develop a professional approach to accounting issues. This classic text provides everything students need to understand the core issues of advanced accounting. With a focus on the direct method of consolidation this text provides examples and problem material for students to understand this complex and demanding topic.

This edition is completely updated to reflect current issues in advanced accounting and it integrates the complete equity method throughout the consolidation chapters. It also includes student-oriented pedagogy and design.

The most reader-friendly text on the market, *ADVANCED ACCOUNTING* brings real-world accounting topics to the student's level, presenting advanced concepts and issues in a flexible, step-by-step approach. This is the only advanced book that completely separates the following three major concepts dealt with in the consolidations area: (1) the general concept of consolidating (2) the concept

of a non-controlling interest, and (3) the change or no change in basis of accounting concepts for business combinations. Separating these concepts makes it much easier for students than having to simultaneously learn multiple concepts.

The approach used by Hoyle, Schaefer, and Douppnik in the new edition allows students to think critically about accounting, just as they will do while preparing for the CPA exam and in their future careers. With this text, students gain a well-balanced appreciation of the Accounting profession. As Hoyle 12e introduces them to the field's many aspects, it often focuses on past controversies and present resolutions. The text continues to show the development of financial reporting as a product of intense and considered debate that continues today and into the future. The writing style of the eleven previous editions has been highly praised. Students easily comprehend chapter concepts because of the conversational tone used throughout the book. The authors have made every effort to ensure that the writing style remains engaging, lively, and consistent which has made this text the market leading text in the Advanced Accounting market. The 12th edition includes an increased integration of IFRS as well as updated accounting standards.

This book, *Basics of Consolidation of Financial Statements*, presents a step-by-step approach in learning the basics concepts in consolidation of

financial statements. Rather than focusing on complex explanations and discussions, this book explains consolidation of financial statements using simple concepts. The book is intended primarily for students who are at the advanced stage of financial accounting and reporting course. To prepare consolidated financial statements, it is essential for students to equip themselves with strong understanding of the basic concepts of consolidation. Therefore, the aim of this book is to provide accounting students with a framework for learning these basic concepts in consolidation. Each chapter of the books offers examples, comprehensive illustrations, exercises and problems for students to tackle at different stages of the consolidation so that the students' understanding on the concepts and techniques of consolidations is strengthened.

This unique text takes an innovative approach to advanced financial accounting topics. A combination of core chapters present critical material, while shorter modules throughout provide maximum flexibility for the instructor. The authors mirror the changing emphases and content in financial accounting. Coverage of new developments such as the latest FASB and GASB pronouncements is included. Throughout the text, the authors present a logical structure to analyze the issues rather than merely explain them. The accounting entity, as a

unifying theme, underlies the many diverse advanced accounting topics. The text focuses on business combinations and consolidated financial statements as well as conceptual and income tax issues. Chapters 3 through 7 address consolidation of financial statements, using the complete equity method approach. To parallel current practice, the 1999 Exposure Draft Business Combinations and Intangible Assets is covered. Two unique chapters cover international operations with coverage of FASB Statement 52. The text also provides the only self-contained chapter on derivative financial instruments currently available in advanced financial accounting texts. Provisions of SFAS 133 are fully incorporated throughout these chapters with a discussion of the euro and its implications for risk management and reporting.

For undergraduate and graduate courses in advanced accounting. Practical learning and real-world application in accounting Advanced Accounting is an in-depth guide to accounting that reflects the most up-to-date business developments. This comprehensive textbook addresses practical financial reporting problems while reflecting recent business developments and changes in accounting standards. The 13th Edition offers a better teaching and learning experience by providing real-world context. Students learn how to apply key accounting concepts through studying real-world examples,

such as reports from popular companies, and up-to-date coverage of businesses. Accounting students and accounting practitioners alike will find this text useful in preparing or analyzing consolidated financial statements, accounting for derivative securities, and governmental and not-for-profit accounting and reporting.

This 4th edition has been updated to reflect recent FASB and NCGA pronouncements, including the May 1987 pronouncement that changes the treatment of consolidations. Emphasis in the consolidation chapters is on the cost method, which is compatible with the new FASB ruling. The most up-to-date information on foreign currency is also provided. Like the previous editions, underlying theory and application of business combinations, consolidated financial statements, foreign currency transactions, partnerships and accounting for non-business organizations are all covered. The book is illustrated and contains exercises, questions and problems, many of which are adapted from the CPA examination.

The most reader-friendly text on the market, *Advanced Accounting: Concepts and Practice 7/e* brings real-world accounting topics to the student's level, presenting advanced concepts and issues in a flexible, step-by-step approach. This is the only advanced book that completely separates the following three major concepts dealt with in the

consolidations area: (1) the general concept of consolidating (2) the concept of a non-controlling interest, and (3) the change or no change in basis of accounting concepts for business combinations. Separating these concepts makes it much easier for students than having to simultaneously learn multiple concepts.

Renowned for its flexibility, clarity and comprehensiveness, this user-friendly text discusses the underlying theory and application of business combinations, consolidated financial statements, foreign currency transactions, partnerships and accounting for non-business organizations. This edition contains new material on leveraged buyouts, FASB's ongoing project on consolidations and related matters, enhanced and expanded illustrations and examples along with fresh discussion problems.

Modern Advanced Accounting in Canada continues the approach that made it the best selling advanced financial accounting text in Canada. This includes the complete & comprehensive coverage of business combinations, the preparation of consolidated financial statements, the consolidation of joint ventures and foreign subsidiaries, and push-down accounting. Consolidation coverage continues to emphasize the direct approach accompanied by a "building block" development of the consolidation basics. Coverage of unrelated topics - bankruptcy and receivership, partnerships, and accounting for not-for-profit organizations - has also been maintained.
