

Advanced Bushcraft An Expert Field To The Art Of Wilderness Survival

Many have died in the Australian bush who might have lived had they known the appropriate survival skills. Bushcraft covers all areas of survival and camping activities: making ropes and cords, building huts, camp craft, finding food and water, making maps, starting fires, tying knots, and fashioning hunting and trapping gear—virtually every technique required to stay alive in the woods. With over 400 black-and-white illustrations and photographs, this book explains how to make use of natural materials found locally in any area, conserving instead of destroying native flora and fauna. It describes many of the skills used by primitive man, adding to these the skills necessary for modern man's survival, such as methods for determining time and direction. The author, who popularized the term "bushcraft," claims its practice has many unexpected results. By developing adaptability and honing the five senses, it will also improve your self-esteem and your ability to overcome difficulties in everyday tasks. The practice of bushcraft encourages self-confidence and counters the narrowing influence of modern living by broadening your horizons. Bushcraft is a clear, accurate, and reliable resource for anyone who wishes to face nature on its own terms with just a knife and this book.

For those who have been accustomed to reading books on wilderness skills that entertain but fall short of actually teaching you "how to" accomplish the tasks and skills at hand, this book is a pleasant surprise - written for those who wish to actually head into the wilderness and practice the skills of our ancestors. Primitive Wilderness Living and Survival Skills is a compilation of ten booklets written over the course of seven years each chapter a complete, concise "how-to" in itself. Unlike many who have written on this subject in the past, John and Geri McPherson have spent years daily

practicing these skills, perfecting methods through trial and error - and documenting it. This vast knowledge is passed on to the reader. Illustrated with over 700 photographs crammed into 400 pages, this massive work is not a rehashing and perpetuation of myths. These are tried and true methods of primitive wilderness living and survival skills. Field and Stream says: "The McPherson's book....deals with taking flat nothing into boondocks and staying for a long period of time. If you'd like to know how to make a spear thrower, or pottery, or brain cure deer hides, or build a permanent shelter from what you find at and, here is the place to learn." And Sports Afield: "...Full of practical, tested advice for living off the land." Don't panic! Here are the essential techniques you need to cope with a short-term survival situation.

You're alone in the forest on a fine autumn day with nothing but a multitool. You're stuck there for a week. Should you be more worried about finding a source of uncontaminated water or about a bear that might be in the area? Neither, says Les Stroud. The bear will most likely avoid you, and dehydration will affect you faster than parasites in untreated water. Your bigger worry should be shelter—the daytime might be nice, but it's likely going to be cold at night. And that's just the beginning. The concept of Survivorman is simple: left in a remote location, Les must survive for seven days on his own without food, water or equipment. Now, he shares his expert knowledge in Survive!, a fully illustrated guide based on his experiences on six continents and filled with field-tested advice. Many books on survival are culled from Second World War—era training techniques that are out-of-date or just plain wrong. Survive! debunks these dated myths, exploring basic and advanced tactics that show you how to cope in any survival situation. Brought to life with Les's own anecdotes and the tales of others, Survive! is the perfect manual for anyone -- from beginner to armchair traveller to seasoned explorer -- who wants to meet nature's dangers with confidence. As Les writes, "If you believe you can make it through the bad times, and you are not intimidated by the forces of nature, you will markedly increase your chances of survival." SURVIVE! includes detailed information on the following: preparing for survival, mentally and physically fire-making techniques basic survival kit components finding, collecting and making water sources of food types of shelter

If you breathe and have a pulse, you NEED this book. -Cody Lundin Cody Lundin, director of the Aboriginal Living Skills School in Prescott, Arizona, shares his own brand of wilderness wisdom in this highly anticipated new book on commonsense, modern survival skills for the backcountry, the backyard, or the highway. It is the ultimate book on how to stay alive-based on the principal of keeping the body's core temperature at a lively 98.6 degrees. In his entertaining and informative style, Cody stresses that a human can live without food for weeks, and without water for about three days or so. But if the body's core temperature dips much below or above the 98.6 degree mark, a person can literally die within hours. It is a concept that many don't take seriously or even consider, but knowing what to do to maintain a safe core temperature when lost in a blizzard or in the desert could save your life. Lundin delivers the message with wit, rebellious humor, and plenty of backcountry expertise. Cody Lundin and his Aboriginal Living Skills School have been featured in dozens of national and international media sources, including Dateline NBC, CBS News, USA Today, The Donny and Marie Show, and CBC Radio One in Canada, as well as on the cover of Backpacker magazine. When not teaching for his own school, he is an adjunct faculty member at Yavapai College and a faculty member at the Ecosa Institute. Cody is the only person in Arizona licensed to catch fish with his hands, and lives in a passive solar earth home sixty miles from Prescott, Arizona.

"The 10 Bushcraft Books" is, as the title suggests, literally all ten of Richard Graves' "Bushcraft Handbooks" bound together as a convenient single volume, perfect for slipping into your rucksack. A true classic of the genre and out of print for more than forty years, "The 10 Bushcraft Books" is back! This edition is a perfect replica of the First Edition, with the same size, formatting, layout, page count and illustrations, but in a softcover format. Unlike the poorly-OCR'd, abridged, censored and dumbed down modern US market reprint edition titled "Bushcraft : The Ultimate Guide to Survival in the Wilderness", this edition of Graves' "The 10 Bushcraft Books" is the REAL DEAL, presented exactly as the author

intended, with no deletions or omissions. It is the ONLY COMPLETE volume of Richard Graves' work available today. Remember: If it doesn't have the orange and black cover, it's incomplete and dumbed down. Don't waste your money buying anything else. The term "Bushcraft" describes the activity of how to make use of natural materials found locally in any area. It includes many primitive skills, and to these are added modern skills necessary for survival such as time and direction and the provision of more modern camp comforts and equipment. The practice of bushcraft develops in an individual a remarkable ability to adapt quickly to a changing environment. Because this is so, the activity is a valuable counter to today's specialisation, and it is particularly significant in youth training work. The author of "The 10 Bushcraft Books", Richard Graves, is a member of the Irish literary family of that name. He is also the author of: "Bushcraft: How to live in Jungle and Bush" "Survival Hints", a pamphlet which was included in all Allied jungle survival kits in the Pacific during WWII The Bushcraft Handbook "Ropes and Cords" The Bushcraft Handbook "Huts and Thatching" The Bushcraft Handbook "Bush Campcraft" The Bushcraft Handbook "Food and Water" The Bushcraft Handbook "Fire Making" The Bushcraft Handbook "Knots and Lashings" The Bushcraft Handbook "Traps and Tracking" The Bushcraft Handbook "Snares and Traps" The Bushcraft Handbook "Travel and Gear" The Bushcraft Handbook "Time and Direction" ...all authoritative works on bushcraft and the art of bush and jungle survival. An enthusiastic bushwalker, skier and pioneer of white-water canoeing, Richard Graves foresaw how a knowledge of bushcraft could save lives in the Second World War. To achieve this end, he initiated and led the Australian Jungle Rescue Detachment, assigned to the American Far East Air Force. This detachment of 60 specially selected A.I.F. soldiers successfully effected more than 300 rescue missions, most of which were in enemy-held territory, without failure of a mission or loss of a man. An essential preliminary for rescue is survival, and it was for this purpose that the notes for these books were written. These notes were later revised and prepared for a School in Bushcraft which was conducted for nearly 20 years. As far as is known, "The 10 Bushcraft Books" are unique. There is nothing quite like them, nor is any collection of bushcraft knowledge under one cover as comprehensive.
