This guide complements and builds on International Education Standards (IES™) of the International Accounting Education Standards Board™ (IAESB™).

CIMA P2 Advanced Management Accounting: Mock Exam 3

There is considerable national variation in the professionalization and status of the management accountant. Although researchers from different countries have contributed to our knowledge about tasks and roles, we have limited insights into the development, education, and socio-cultural influences in different countries and surprisingly little is known about the local and national contexts in which these roles are learned and performed. This book bridges this research gap using two complementary perspectives. The first part explores management accountants in a range of different national contexts, providing information about country-specific historical developments and educational standards as well as specific roles and tasks. The second part focusses on important global developments that will increasingly impact management accountants in the future, such as sustainability, the financial crisis, technology and changing roles. By combining local context with a global overview, this insightful volume provides an agenda for future research which will be of great interest to scholars and advanced students in management accounting throughout the world.

This revised edition of **ADVANCED MANAGEMENT ACCOUNTING** provides a comprehensive and updated coverage of important topics, current trends, latest ideas and researches in management accounting. Expanding on its theoretical base, the book provides practical exposition to help students strengthen conceptual understanding and develop problem-solving skills to succeed in the classroom and beyond. Pedagogically enriched with new features and an impressive layout, this new edition is an essential text for students of M.Com, MBA, CA, ICWA, CS, CFA and other professional courses
