Advances in Chronic Kidney Disease 2007 C. Ronco, N. W. Levin, 2006-01-01 The volumes in this series are published annually on the occasion of the International Conference on Dialysis organized by the Renal Research Institute, New York, in collaboration with the ISN, ISPD, NKF and RPA. This year's meeting emphasized differences in opinion regarding dialysis guidelines, measurement of dialysis dose and the value of observational research. Besides, this volume includes papers on problems inherent in the management of a dialysis center; diabetes and dialysis; new information on topics such as dialysate composition; the role of body composition in dialysis outcome; problems associated with excess or deficiency of vitamin C; application of nanotechnology, or the role of periodontal disease as a cause of problems in dialysis patients. Last but not least, a molecular approach to infection in chronic kidney disease is presented, using detection of bacterial DNA in patients with sepsis. Covering a broad spectrum of topics, this publication is thus a most helpful reference tool for both clinicians and basic investigators involved in hemodialysis.

Fog, Edge, and Pervasive Computing in Intelligent IoT Driven Applications Deepak Gupta, Aditya Khamparia, 2020-12-03 A practical guide to the design, implementation, evaluation, and deployment of emerging technologies for intelligent IoT applications With the rapid development in artificially intelligent and hybrid technologies, IoT, edge, fog-driven, and pervasive computing techniques are becoming important parts of our daily lives. Intelligent and Fuzzy Techniques for Emerging Conditions and Digital Transformation Cengiz Kahraman, Selcuk Cebi, Sezi Cevik Onar, Basar Oztaysi, A. Cagri Tolga, Irem Ucal Sari, 2021-08-23 This book presents recent research in intelligent and fuzzy techniques. Emerging conditions such as pandemic, wars, natural disasters and various high technologies force people for significant changes in business and social life. The adoption of digital technologies to transform services or businesses, through replacing non-digital or manual processes with digital processes or replacing older digital technology with newer digital technologies through intelligent systems is the main scope of this book. It focuses on revealing the reflection of digital transformation in our business and social life under emerging conditions through intelligent and fuzzy systems. The latest intelligent and fuzzy methods and techniques on digital transformation are introduced by theory and applications. The intended readers are intelligent and fuzzy systems researchers, lecturers, M.Sc. and Ph.D. students studying digital transformation. Usage of ordinary fuzzy sets and their extensions, heuristics and metaheuristics from optimization to machine learning, from quality management to risk management makes the book an excellent source for researchers.

Active and Healthy Aging and Quality of Life: Interventions and Outlook for the Future Yulan Lin, Waqas Sami, Mila Nu Nu Htay, Sudip Bhattacharya, 2024-04-15 The continuous growth of older adult populations, as a consequence of demographic changes, is a huge challenge. To prevent costly and negative impacts effects on the population as a whole, it is crucial that societies increase their knowledge of promoting good health among older adults, to promote good health and a better quality of life in their later years. Active aging is the process of optimizing opportunities for health, participation, and security in order to enhance quality of life as people age. An active and healthy life has remained one of the most important aspirations for all people, both young and older adults alike. This ambition has become a genuine possibility for many due to a rising life expectancy among people of diverse attributes across the world. While celebrating longer life and with more financial security in later life than ever before, we need to challenge how these aspirations can be sustained, through our own behavioural responses and through public policy, institutional reforms, and innovations. The challenge is to identify, recommend, and promote strategies and interventions that stimulate and sustain the activity, independence, and health of people of all ages, especially older adults and, in the process, promote the well-being and quality of life of people and make

public welfare systems more sustainable.

Renal Fibrosis Mohammed S. Razzaque, Takashi Taguchi, 2003-01-01 This publication provides a synopsis of the rapid progress made in the field of renal cell biology during the last decade, progress which has resulted in a better conceptual understanding of the cellular and molecular mechanisms of fibrotic renal disease. These developments have provided new therapeutic choices and led to the discovery of gene-based therapeutic options. The topics covered in this book have been carefully selected from the immense number of aspects of the disease to provide essential information on the molecular basis of renal fibrosis. Individual chapters discuss topics such as proteinuria and tubulointerstitial injury, the roles and regulation of TGF-beta, chemokines, oxidant stress, matrix remodeling, significance of renal expression of NF-kappa, and the potential impact of cell death in renal fibrosis. Written so as to present the complex information as simply as possible, this publication will be a very useful tool for general health professionals involved in the fields of immunology and cell biology, as well as for clinicians and researchers within the fields of nephrology, pathology and matrix biology.

Nutritional Management of Renal Disease Joel D. Kopple, Shaul G Massry, Kamyar Kalantar-Zadeh, 2012-12-31 This translational text offers in-depth reviews of the metabolic and nutritional disorders that are prevalent in patients with renal disease. Chapter topics address the growing epidemic of obesity and metabolic syndrome. Each chapter integrates basic and clinical approaches, from cell biology and genetics to diagnosis, patient management and treatment. Chapters in sections 4-7 include new illustrative case reports, and all chapters emphasize key concepts with chapter-ending summaries. New features also include the latest National Kidney Foundation Clinical Practice Guidelines on Nutrition in Chronic Renal Failure, the most recent scientific discoveries and the latest techniques for assessing nutritional status in renal disease, and literature reviews on patients who receive continuous veno-venous hemofiltration with or without dialysis. - Provides a common language for nephrologists, nutritionists, endocrinologists, and other interested physicians to discuss the underlying research and translation of best practices for the nutritional management and prevention of renal disease - Saves clinicians and researchers time in quickly accessing the very latest details on nutritional practice as opposed to searching through thousands of journal articles - Correct diagnosis (and therefore correct treatment) of renal, metabolic, and nutritional disorders depends on a strong understanding of the molecular basis for the disease - both nephrologists and nutritionists will benefit - Nephrologists and nutritionists will gain insight into which treatments, medications, and diets to use based on the history, progression, and genetic make-up of a patient - Case Reports will offer an added resource for fellows, nutritionists, and dieticians who need a refresher course

Continuous Renal Replacement Therapy John A. The Cystic Kidney K.D. Gardner, J. Bernstein, 2012-12-06 This is a book about renal cysts and cystic kidneys. Its contributors have created a resource of current information in a field that once aroused only curiosity, but that now stands at the leading edge of molecular nephrology. Its authorship includes 'oldtimers', who bring the wisdom of experience, and 'newcomers', whose presence attests to the contributions made by the investigative and technological advances of the past decade. Its text is organized to carry the reader from renal cyst to cystic renal disease. Each of its chapters defines or

explores a challenge or an advance. Cells that line renal cysts are diverse in structure, type, and perhaps function. The cysts themselves lie within an interstitium that is not normal and may influence cyst development and growth. Experimental analogs of human disease offer increasing opportunities to basic researchers to examine, in sequence and under controlled circumstances, those events that favor nephron dilation, cyst growth and ultimate renal failure.

Pathophysiology: A Practical Approach Lachel Story, 2020-11-16 Pathophysiology: A Practical Approach, Fourth Edition focuses on teaches nursing students how normal versus abnormal physiological alterations can present in patients to identify disease or injury progression.

Recent Advances of Sarcopenia and Frailty in CKD Akihiko Kato, Eiichiro Kanda, Yoshihiko Kanno, 2020-02-29 This book highlights recent advances in our understanding of sarcopenia and frailty in CKD. The prevalence of sarcopenia and frailty increases substantially as CKD progresses, and experimental studies have demonstrated the pivotal role of accumulated uremic toxin in the development of muscle wasting. Further, sarcopenia and frailty are associated with falls, bone fractures, cognitive impairment, and poor survival prognoses, especially in elderly CKD patients. The syndromes are also related to the risk of end-stage kidney disease. This book provides readers with a deeper understanding of the prevention and management of sarcopenia and frailty in CKD patients to improve their renal and overall health, and suggests directions for future basic and clinical research.
