Every discipline tends to develop its own particular language and ways of communicating. This is true also about the various disciplines that talk about and describe the human voice - particularly as it relates to singing. The aim of this book is to bridge any gaps in communication, foster better understanding of the singing voice and encourage collaboration between those involved in performance, teaching, therapy and medicine. Because there is increasing interest in research in all these disciplines, creating a "common ground" for communication about the singing voice is essential for mutual understanding and for effective prevention and treatment of disorders in singers. One object for the artistic and scientific professions is to understand each other better by finding a vocabulary and terminology which they can share and use effectively. Difficulty in communication often arises when a singer or teacher of singing attempts to describe something sensory in nature by use of imagery and sign-language to non-singers, including the health and medical professions; and, in the same way, the use of obscure and sometimes frightening terminology by those in the medical sciences when offering explanations to singers. Teaching and simple language was and is needed from both sides. A number of advances are helping to create rapid change in bridging gaps in communication and in adding new information: 1. The formation of Associations for Performing Arts Medicine on a national and international scale are bringing new awareness to those who work with singers and other artists.

"Singing is as human as breathing, and this book tells us why." —Mark Guarino, contributing music writer, *The Guardian* Popular yogi-musician Girish opens new possibilities for transforming your life through song, combining the ancient art of singing mantra with twenty-first century neuroscience research. For as long as he can remember, Girish has created rhythm to accompany life. His first experience of music as sacred art came in college, playing with jazz bands. "During improvisational sessions," he recalls, "there were these unexplainable moments of synchronicity and intuition that felt like magic." This led Girish to an unexpected journey—a seeming detour to live as a monk in an ashram for five years that inadvertently nourished his musical artistry. Here, he studied Sanskrit as a means to understand the deeper meanings of ancient chants, which sparked a life-changing event that led him back to music—and to combining music with Sanskrit chants. Now he shares what he's learned to help people of all ages, backgrounds, and traditions to transform body, brain, and life through mantra and music. With *Music and Mantras*, Girish has created a toolkit for personal transformation through singing, sharing his own experience as a musician, yogi, and former Hindu monk. Weaving simple, elegant mantras from ancient traditions with neuroscience, Girish shows us how to achieve greater peace of mind, clarity, calm, focus, and even improved health and wealth through "kirtan," the yogic art of chanting—an inspiration that anyone can sing their way to happiness, health, and prosperity.
