La storia dell’Africa è un grande tabù: durante il periodo della colonizzazione, le nazioni europee si sono macchiate di crimini orrendi che non vogliono ricordare. Anche dopo l’indipendenza, il continente africano è rimasto vittima di un prelievo netto di risorse umane, finanziarie, agricole e minerarie. Per questo motivo l’interesse del dibattito sulle migrazioni è ormai incentrato sulle necessità degli “ospitanti”: nessuno si interessa ai problemi dei paesi africani e degli altri luoghi di provenienza. Tutti impegnati a disquisire sulle conseguenze delle migrazioni, nessuno si occupa delle cause. Il presente volume nasce con l’intenzione di colmare questa lacuna. Il tentativo è quello di superare lo sguardo tipicamente eurocentrico di buona parte della storiografia, della sociologia e dell’economia, cercando di far luce sul passato e sul presente, provando a comprendere quali siano i problemi che l’Africa non è riuscita a risolvere.

L’Africa è tornata a essere terra di conquista. Dopo i conflitti scatenati nel secolo scorso per accaparrarsi le risorse naturali del continente, ora è “guerra” commerciale, ma soprattutto militare, di tutti contro tutti. L’Occidente ha deciso che è giunto il momento di arginare l’influenza cinese che ormai ha le mani su tutto il continente, nessun paese escluso. Le forze militari straniere si stanno posizionando nel Corno

D’Africa, in particolare in un fazzoletto di terra: Gibuti. Le guerre economiche in Africa non si combattono solamente attraverso accordi commerciali, è diventato indispensabile, per vincere la battaglia, “mettere gli scarponi sul terreno”. Un percorso analitico sulla situazione politica ed economica odierna ripercorre, anche narrativamente, i passi dei grandi viaggiatori del passato, lungo i suoi corsi d’acqua più imponenti, attorno ai laghi prosciugati dallo sfruttamento umano e dai cambiamenti climatici e nei gironi infernali delle miniere più preziose al mondo.

With many predicting the end of US hegemony, Russia and China's growing cooperation in a number of key strategic areas looks set to have a major impact on global power dynamics. But what lies behind this Sino-Russian rapprochement? Is it simply the result of deteriorated Russo–US and Sino–US relations or does it date back to a more fundamental alignment of interests after the Cold War? In this book Alexander Lukin answers these questions, offering a deeply informed and nuanced assessment of Russia and China’s ever-closer ties. Tracing the evolution of this partnership from the 1990s to the present day, he shows how economic and geopolitical interests drove the two countries together in spite of political and cultural differences. Key areas of cooperation and possible conflict are explored, from bilateral trade and investment to immigration and security. Ultimately, Lukin argues that China and Russia’s strategic partnership is part of a growing system of cooperation in the non-Western world, which has also seen the emergence of a new political community:

Greater Eurasia. His vision of the new China–Russia rapprochement will be essential reading for anyone interested in understanding this evolving partnership and the way in which it is altering the contemporary geopolitical landscape.

The book seeks to understand China's evolving political and economic role in Africa and assesses what impacts Chinese aid, trade and investment have on the politics of specific African countries, and the extent to which it excites geopolitical competition. Ahmadou Kourouma's remarkable novel is narrated by Bingo, a West African sora - storyteller and king's fool. Over the course of five nights he tells the life story of Koyaga, President and Dictator of the Gulf Coast. Orphaned at the age of seven, Koyaga grows up to be a terrible hunter; he fights mythical beasts, and is a shape-shifter, capable of changing himself into beasts and birds. He fights in the French colonial armies, in Vietnam and Algeria, but on his return he mounts a coup and becomes ruler and dictator of the Gulf Coast. For thirty years he runs a corrupt but 'clean' state, surviving repeated assassination attempts and gaining support and investment from abroad. But when the 'First World' decides it no longer want to support dictatorships and call for democracy, he needs another ruse to maintain himself in power... Part magic, part history, part savage satire, *Waiting for the Wild Beasts to Vote* is nothing less than a history of post-colonial Africa itself.

This book argues that, as industrial capitalism enters a period of prolonged crisis, a new paradigm of 'industrious modernity' is emerging. Based on small-scale,

commons-based and market-oriented entrepreneurship, this industrious modernity is being pioneered by the many outcasts that no longer find a place within a crumbling industrial modernity. This new industriousness draws on the new planetary commons that have been generated by the globalization of industrial capitalism itself. The outsourcing of material production to global supply chains has made the skills necessary to engage in commodity production generic and common, and the globalization of media culture and the internet have generated new knowledge commons. Together these new commons have radically reduced the capital requirements to engage in economic activity, and are providing new, highly efficient tools of productive organization at little cost. This timely analysis of the new forces of change in our societies today will be of great interest to anyone concerned with the impact of digital technologies and the future of capitalism.

Il presente ebook tratta per linee generali le varie tipologie di migrazioni che si sono verificate a livello globale, e che continuano a verificarsi tuttora seppur con delle diversità. Inoltre si cerca di analizzare le cause per cui uomini, donne, e interi nuclei familiari si spostano valicando i confini degli Stati in cui risiedono, guardando attentamente anche le nuove direttrici migratorie e i nuovi rapporti che potrebbero caratterizzare ulteriormente tali spostamenti nei prossimi anni, se non

After decades of unsatisfying performances, economic growth took off in many sub-Saharan states at the beginning of the 21st century. More recently, however, the end of the commodity cycle – particularly with the oil price drop – and the rise of jihadist violence rocked the “Emerging Africa” boat. Is this the beginning of the end for sustained growth in the region? This Report investigates the economic impact of these new challenges upon Africa's frontier markets. It shows that the positive economic trajectory of recent years is being negatively affected,

particularly for oil-exporting countries. However, while more caution is needed, Africa's growth prospects on the whole remain fairly good – at least for now. But there is an increasing need to understand the specific risks that individual countries face and the opportunities that they offer, as well as to re-assess the potential of each specific sector of economic activity. The three largest economies in the region – Nigeria, South Africa and Angola – are all under pressure. Others, including Ethiopia, Mozambique and Kenya, are still projected to achieve remarkable growth rates.

Intense political polarization, confrontation and violence have rocked Thailand recently, much of it a divisive legacy of the 2006 coup. Conflicts centre on the legitimacy of institutions and the uses and abuses of power alongside the parallel crisis of state legitimacy posed by the ongoing violence in the country's Deep South. This collection of essays explores themes and issues arising from the continuing confrontations that have dominated Thailand's domestic affairs and affected its international relations in the years 2008 to early 2010. Based on extensive research and documentation, this volume offers an important review and analysis of key events and trends in Thailand's volatile public affairs during this period. The book brings together essays by Thai specialists as well as Western scholars on pivotal topics connected to Thailand's current legitimacy

crisis. It begins with a lively narrative of major events and in subsequent chapters covers the politicization of the Khao Phra Wihan (Preah Vihear) temple issue; the People's Alliance for Democracy and its "New Politics"; the politicization of the Thai media; the revived role of the Thai military in influencing politics and governance; and the challenge of the persistent unrest in Thailand's south. The book concludes with an insightful analysis of the key challenges facing the country politically, institutionally and economically. The events of March–May 2010, which saw a dramatic face off between the red-shirt movement and the government, are discussed in an afterword. This collection is published as volume 5 in the yearbook series of King Prajadhipok's Institute, Thailand.

La complessità di una società è un arricchimento ma viene spesso vissuta come una minaccia. Da qui tante forme di discriminazione o esclusione. L'emigrazione Sud-Nord degli ultimi anni ha diffuso un'immagine impropria di un fenomeno che ha origini lontane. Scopo di questo volume è di presentare un inquadramento storico e globale, risalendo alle radici e studiando alcuni processi in cui la formazione della nazione ha dovuto confrontarsi con la presenza di comunità diverse per appartenenza geografica, culturale o religiosa ma anche per professione o ruolo sociale. In alcuni casi esse cercano l'integrazione nella nuova sede, in altre difendono la propria identità e vivono chiuse in se stesse. Come epicentro del volume c'è l'Asia sia come teatro di tante esperienze miste che come terra d'origine di minoranze che hanno cercato la fortuna o sono state trapiantate altrove, qui con una preferenza per l'Africa. Ebrei e armeni sono studiati anche per l'eccezionalità della loro epopea nel tempo e nello spazio.

L'attualità ricompare attraverso l'importanza acquisita dalle rimesse degli emigrati verso le famiglie e i paesi natali, che hanno ormai soverchiato gli altri flussi finanziari compreso l'aiuto allo sviluppo.

China's continuing rapid economic growth and expanding involvement in global affairs pose major implications for the power structure of the international system. To more accurately and fully assess the significance of China's emergence for the United States

and the global community, it is necessary to gain a more complete understanding of Chinese security thought and behavior. This study addresses such questions as: What are China's most fundamental national security objectives? How has the Chinese state employed force and diplomacy in the pursuit of these objectives over the centuries? What security strategy does China pursue today and how will it evolve in the future? The study asserts that Chinese history, the behavior of earlier rising powers, and the basic structure and logic of international power relations all suggest that, although a strong China will likely become more assertive globally, this possibility is unlikely to emerge before 2015-2020 at the earliest. To handle this situation, the study argues that the United States should adopt a policy of realistic engagement with China that combines efforts to pursue cooperation whenever possible; to prevent, if necessary, the acquisition by China of capabilities that would threaten America's core national security interests; and to remain prepared to cope with the consequences of a more assertive China.

Why, for centuries, have the West and the world continuously produced China knowledge that deviates from Chinese realities? Why, since the mid-nineteenth century, have Chinese intellectuals oscillated between commendation and condemnation of their own culture, and between fetishization and demonization of all things Western? And why have some of the world's wisest thinkers expressed opinions on Chinese culture, which are simply wrong? In order to answer these questions, this book explores the

process of knowledge production about China and the Chinese civilization and in turn, provides a critique of the ways in which this knowledge is formed. Ming Dong Gu argues that the misperceptions and misinterpretations surrounding China and the Chinese civilisation do not simply come from misinformation, biases, prejudices, or political interference, but follow certain taken-for-granted principles that have evolved into a cultural unconscious. Indeed, Gu argues that the conflicting accounts in China-West studies are the inevitable outcome of this cultural unconscious which constitutes the inner logic of a comprehensive knowledge system which he terms 'Sinologism'. This book explores Sinologism's origin, development, characteristics, and inner logic, and critiques its manifestations in the writings of Chinese, Western, and non-Western thinkers and scholars, including Montesquieu, Herder, Hegel, Marx, Weber, Russell, Pound, Wang Guowei, Guo Moruo, Gu Jiegang, Wen Yiduo, and many others in diverse disciplines from arts and humanities to social sciences. In doing so, Gu demonstrates why the existing critical models are inadequate for Chinese materials and makes an attempt to construct an alternative theory to Orientalism and postcolonialism for China-West studies and cross-cultural studies. Sinologism crosses over the subjects of history, thought, literature, language, art, archaeology, religion, aesthetics and cultural theory, and will appeal to students and scholars of East-West studies with a particular focus on China, as well as those interested in cultural theory more broadly. This is a genuinely comparative study of the different trajectories and experiences of independent African states. It addresses the differential legacies of British, French, Portuguese, Belgian and Spanish colonialism as well as the unique qualities of imperial Ethiopia and Liberia. Paul Nugent analyses boundary problems, the reshaping of territorial structures and the contrasting ideological paths followed by civilian and military regimes. The book ends with a look at the interplay between structural adjustment, ethnicity, democratization and the impact of NGOs. A state-level perspective is balanced by a sensitivity to popular culture.
