

## Agricultural Sciences Question Paper Grade 12 March

This volume compiles and reprints the responses of 37 organizations to a series of questions issued by the House Committee on Agriculture in anticipation of debates concerning the Research Title of the 1995 Farm Bill due for updating and revision. The questions address some of the following topics: the role of the federal government in agricultural research, coordination and relations with other federal agencies, the suitability of various regulations and procedures, setting research priorities, integrating federal-state-industry research pools, effectiveness of coordinating and advisory boards, efficiency and accountability in administration of these federal funds, partnerships with other types of organizations, guidelines for use of federal funds, land grant universities' roles, fund allocation formulas, and regional research and extension cooperation. The organizations that responded to these questions include the Department of Agriculture, the Coalition on Funding Agricultural Research Mission, professional societies such as the Phytopathological Society and the Entomological Society of America, individual higher education institutions like the Universities of Minnesota and Arkansas and Ohio State University, international organizations such as the World Bank and the International Food Policy Research Institute, and Associations such as the American Feed Industry Association and the Association of American Veterinary Medical Colleges. In all the developing countries, the vast natural resource have great potentials for the production of fish. Natural water resource are categorized on the basis of altitude, temperature and salinity. The different fish species have adopted as per water ecosystem. Out of identified about 22000 fish species, only 10% belongs to freshwater. Only 107 species have been found suitable as culturable. Hence, major chunk of fish are not cultured by man but used by him as food or other uses. It is therefore, the natural fisheries is very important for human being and proper management and legislation are needed to have the sustainable production. The text of the book is written in simple language so as understandable by scientists, extension workers, students and farmers.

References and literature for further reading have been given in the end. Note: T&F does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.
