Guidelines for Design and Construction of Hospital and Health Care Facilities AIA Academy of Architecture for Health,2001 Reflecting the most current thinking about infection control and the environment of care, this new edition also explores functional, space, and equipment requirements for acute care and psychiatric hospitals; nursing, outpatient, and rehabilitation facilities; mobile health care units; and facilities for hospice care, adult day care, and assisted living. [Editor, p. 4 cov.]

Guidelines for Design and Construction of Residential Health, Care, and Support Facilities Facility Guidelines Institute,2017-11-30 Standards to guide the design and construction of nursing homes, assisted living facilities, independent living settings, and related outbased service facilities, including adult day care

Guidelines for Design and Construction of Hospitals and Outpatient Facilities 2014 Facility Guidelines Institute,2014-01-01 This product of the Facility Guidelines Institute (FGI) provides minimum standards for design and construction of hospitals and outpatient facilities. The standards for long- term care facilities will appear in a new document for 2014; please see the entry for *Guidelines for Design and Construction of Residential Health, Care, and Support Facilities*. Included in the *Guidelines for Hospitals and Outpatient Facilities* is information on the planning, design, construction, and commissioning process and facility requirements for both hospitals and outpatient facilities. Included are general hospitals, psychiatric hospitals, and rehabilitation facilities as well as new chapters on children's and critical access hospitals. Outpatient facilities covered include primary care facilities; outpatient surgery facilities; birth centers; urgent care centers; mobile units; outpatient psychiatric and rehabilitation centers; facilities for endoscopy, dialysis, and cancer treatment; and a new chapter on dental facilities. In addition, the 2014 Guidelines includes new material on safety risk assessments and medication safety zones; increased requirements for commissioning infrastructure systems; and updated requirements for surgery, imaging, endoscopy, and dialysis facilities as well as primary care facilities and freestanding emergency facilities.

Building Type Basics for Healthcare Facilities Richard L. Kobus,2000-09-15 Publisher description

HVAC Design Manual for Hospitals and Clinics ASHRAE (Firm),2013 Health care HVAC systems serve facilities in which the population is uniquely vulnerable and exposed to an elevated risk of health, fire, and safety hazard. These heavily

regulated, high-stakes facilities undergo continuous maintenance, verification, inspection, and recertification, typically operate 24/7, and are owner occupied for long life. The HVAC systems in health care facilities must be carefully designed to be installed, operated and maintained in coordination with specialized buildings services, including emergency and normal power, plumbing and medical gas systems, automatic transport, fire protections and a myriad of IT systems, all within a limited building envelope.

Hospital and Healthcare Facility Design Richard Lyle Miller, Earl S. Swensson, 2002 A state-of-the-art blueprint for architects, planners, and hospital administrators, *Hospital and Healthcare Facility Design* provides innovative ideas and concrete guidelines for planning and designing facilities for the rapidly changing healthcare system.

Practical Healthcare Epidemiology Ebbing Lautenbach, Preeti N. Malani, Keith F. Woeltje, Jennifer H. Han, Emily K. Shuman, Jonas Marschall, 2018-04-19 A clear, hands-on outline of best practices for infection prevention that directly improve patient outcomes across the healthcare continuum.

Justice Is Beauty Michael Murphy, Alan Ricks, 2019-12-17 The first monograph of MASS Design Group, the internationally lauded firm creating some of the most powerful and humane works of architecture today. Founded in 2008, MASS Design Group collaborated with Partners In Health and the Rwanda Ministry of Health to design and build the Butaro District Hospital in Rwanda, a masterwork of architecture that also uniquely serves a community in need. Since then, MASS has grown into a dynamic collaborative of architects, planners, engineers, filmmakers, researchers, and public health professionals working in more than a dozen countries in the fields of design, research, policy, education, and strategic planning. Amid ongoing recognition (the 2018 American Academy of Arts and Letters Award in Architecture, the 2017 Cooper Hewitt National Design Award in Architecture), MASS's most recent project, the National Memorial for Peace and Justice in Montgomery, Alabama, has been featured in more than 400 publications, including the New York Times, the New Yorker, and the Washington Post. Mark Lamster of Dallas Morning News called the memorial the single greatest work of American architecture of the twenty-first century. *Justice Is Beauty* highlights MASS's first decade of designing, researching, and advocating for an architecture of justice and human dignity. With more than thirty projects built or under construction and some 200,000 people served, MASS has pioneered an immersive approach in the practice of architecture that provides the infrastructure, buildings, and physical systems necessary for growth, dignity, and well-being, while always engaging local communities with attention to the specifics of cultural context and social needs.

Innovations in Hospital Architecture Stephen Verderber, 2010-03-31 This indispensable reference book captures key recent developments in the rapidly evolving field of sustainable hospital architecture. Today's architects must provide hospitals which enable high quality care for diverse patient populations in carbon neutral care settings, and this book

succinctly considers what needs to be done in order to meet that challenge. The contemporary hospital is viewed in the context of global climate change, the planet's diminishing natural resources and the spiralling cost of operating healthcare facilities. Stephen Verderber considers the future of the hospital, and supplies a compendium of 100 planning and design considerations for the building type. The book includes twenty-eight case studies of built and unbuilt hospitals from around the world. These are grouped into five types - autonomous community based hospitals, children's hospitals, rehabilitation and elderly care centres and hospitals, regional medical centre campuses, and visionary (unbuilt) projects. Beautifully and extensively illustrated with many photographs, diagrams and floor plans, this is essential reading for all architects, planners, engineers, product manufacturers, clients, healthcare providers and government agencies involved in the present and future of sustainable healthcare environments.

Healthcare Facility Planning Cynthia Hayward, 2016 "Spending millions of dollars to renovate, reconfigure, expand, or replace a facility can be intimidating without the right direction. Healthcare Facility Planning: Thinking Strategically is a practical guide that will help you move confidently from planning to implementation. This book's focus is on predesign planning-- a stage in the healthcare facility planning, design, and construction process. Healthcare executives have the greatest opportunity to express a vision for their organization's future during predesign planning, and decisions made during this stage have the greatest impact on long term operational costs and future flexibility. Careful predesign planning allows an organization to rethink its current patient care delivery model, operational systems and processes, and use of technology to ensure that a facility substantially benefits patients, caregivers, and payers. This new edition addresses current issues—such

as new financial incentives, fluctuating utilization and demand, constant pressure for technology adoption and deployment, rising turf wars among specialists, intense focus on patient safety, and aging physical plants--that affect the way facilities are used, planned, financed, and built."--Back cover.

Emergency Department Design Jon Huddy, 2002 A new book from ACEP that will help you participate effectively-or lead the way-in the successful design of your emergency department. Emergency Department Design will teach you the design and planning process so that you and other caregivers can make decisions about what's best for your department. Whether you're building a new department, remodeling an existing one, expanding, or simply adding a new service, the critical decisions you'll make must be based on an understanding of the design process. Time and time again, the best results are achieved when caregivers drive this process, working with design professionals to plan not just for today's patients, but also for those of the future. Read this book and learn how to: Assess your space needs Set physical design goals that meet operational outcomes Define the scope of your project Select a design professional Evaluate the workability of proposed design solutions ...and much more. You'll minimize the complexity of the challenge, reduce wasted time, and focus on creating a design that fulfills your vision of how emergency care should be provided. The author is Jon Huddy, AIA, with FreemanWhite, Inc., a nationally renowned architectural firm specializing in emergency department design. Mr. Huddy brings a passion for emergency department design, a commitment to include caregivers in the design process, and an entertaining, energetic presentation style to this book. Michael T. Rapp, MD, JD, FACEP, past president of ACEP, served as editor and contributed his insights in a special introductory chapter, The Emergency Physician's Perspective. Plus, more than 20 other emergency care professionals and architects have contributed case studies and pearls and pitfalls from their own personal experiences with emergency department design projects.
