1959. These notes are included in this volume under the title *Witness Lee's Personal Notes*. 2. Twenty-five messages given in Taipei, Taiwan, in the fall of 1959. These messages were previously published in a book entitled *Lessons for New Believers* and are included in this volume under the same title. 3. Five messages given in Taipei, Taiwan, in the first part of a training that began on October 5, 1959, and concluded on January 22, 1960. Chapters 1, 2, 4, and 5 were previously published in a book entitled *On Knowing the Bible*. Chapter 3 was added based on notes taken by Brother K. H. Weigh and his wife, Lin Yi-tian. The messages that compose the first four chapters were given on October 6 through 9, 1959, and the fifth message was probably given shortly thereafter. The five messages are included in this volume under the same title as the previously published book. 4. Ten messages given in Taipei, Taiwan, in the second part of a training that began on October 5, 1959, and concluded on January 22, 1960. These messages were previously published in a book entitled *Ten Lines in the Bible*. Later, two appendices were added based on notes taken by Brother K. H. Weigh and his wife, Lin Yi-tian. The exact dates for the speaking of these messages are unknown, but they were given in the winter of 1959. The ten messages and the two appendices are included in this volume under the same title as the previously published book.

Do you want to make a difference? There are many ways someone in a leadership role can have a positive impact on the lives of their employees. Perhaps there is no leadership responsibility more profound than creating

a sustainable, injury-free workplace. Every person who goes to work expects to return home in the same condition. When someone is hurt, the adverse effects of their injury ripple through the employee's family and friends. Achieving an injury-free environment is one of the most difficult problems many leaders face. Indeed, during 35 years in manufacturing I never discovered a singular solution to this challenge. However, over these years I observed quite a few leadership actions that significantly contributed to less risk-taking, greater hazard awareness and genuine collaborative efforts among employees and supervisors. Leaders who understood, embraced, and implemented these strategies saw a dramatic reduction in incidents and injuries at their facilities. In my experience, organizations with the best safety performances do not have a secret. They simply do a lot of small things collectively and strategically well. That's really what this book is about. It is a collection of leadership concepts, thoughts, words, and actions that (when strategically implemented) can move your organization toward a better safety future. There are no 'silver bullets' here. On the other hand, you don't have to do all of these things to be successful in your safety journey. The first section of the book takes a look at some fundamental concepts everyone who is striving to achieve safety excellence should understand. It includes a discussion on compliance versus commitment, how to develop a safety strategy, why people make mistakes and take risks, and an overview of a Just Culture. The core of the book reviews some key research findings in social psychology, sociology and

neuroscience. I share personal experiences of highly effective leadership. And I recount other situations that exemplify the wrong approach. In each case, I discuss how you can leverage these concepts in a practical way to improve your safety leadership skills. Topics include: how our thoughts can drive our behaviors when it comes to safety, how the words we use can be influential on personal decision-making, how social influence and leadership actions can drive safety performance, and how to facilitate the right personal safety conversation. At the end of each chapter, there is a segment called the SAFETY LEADER'S TOOLBOX. This toolbox contains over 70 practical tools and tips for being a more effective safety leader! Readers are encouraged to consult the SAFETY LEADER'S TOOLBOX for small changes in what you think, say, and do to shape your safety culture. I invite you to put on your safety shoes and walk with me. Together we will consider how you can lead your organization to exceptional safety performance. Spoiler alert! One essential leadership skill is knowing why, how, and what to talk about when it comes to safety. Where do you begin? Start with a "Why" of caring. If you start with caring as your personal motive, you won't have to do everything perfectly. Your employees will want to do the right things for the right reasons. You can read this book in chapter order. You can also go to a specific chapter to learn more about a particular topic. Either way, you are encouraged to consult the SAFETY LEADER'S TOOLBOX throughout this book for small changes in what you think, say, or do to shape your safety culture. HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many

questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.

"You can be lonely anywhere, but there is a particular flavor to the loneliness that comes from living in a city, surrounded by thousands of strangers. The Lonely City is a roving cultural history of urban loneliness, centered on the ultimate city: Manhattan, that teeming island of gneiss, concrete, and glass. What does it mean to be lonely? How do we live, if we're not intimately involved with another human being? How do we connect with other people, particularly if our sexuality or physical body is considered deviant or damaged? Does technology draw us closer together or trap us behind screens? Olivia Laing explores these questions by travelling deep into the work and lives of some of the century's most original artists, among them Andy Warhol, David Wojnarowicz, Edward Hopper, Henry Darger and Klaus Nomi. What are the various atmospheres or moods that the reading of literary works can trigger? Hans Ulrich Gumbrecht has long argued that the function of literature is not so much to describe, or to re-present, as to make present. Here, he goes one step further, exploring the substance and reality of language as a material component of the world—impalpable hints, tones, and airs that, as much as they may be elusive, are no less matters of actual fact. Reading, we discover, is an experiencing of specific moods and atmospheres, or *Stimmung*. These moods are on a continuum akin to a musical scale. They present themselves as nuances that challenge our powers of discernment and description, as well as language's potential to capture them. Perhaps the best we can do is to point in their direction.

Conveying personal encounters with poetry, song, painting, and the novel, this book thus gestures toward the intangible and in the process, constitutes a bold defense of the subjective experience of the arts.
