If I built a car, it'd be totally new! Here are a few of the things that I'd do. . . . Young Jack is giving an eye-opening tour of the car he'd like to build. There's a snack bar, a pool, and even a robot named Robert to act as chauffeur. With Jack's soaring imagination in the driver's seat, we're deep-sea diving one minute and flying high above traffic the next in this whimsical, tantalizing take on the car of the future. Illustrations packed with witty detail, bright colors, and chrome recall the fabulous fifties and an era of classic American automobiles. Infectious rhythm and clever invention make this wonderful read-aloud a launch pad for imaginative fun.

It's crazy! Fifteen-year-old Masi Burciaga's neighborhood is becoming more and more of a ghost town since the lard company moved away. Her school closed down. Her family's bakery and the other surviving businesses may soon follow. As a last resort, the neighborhood grown-ups enlist all the remaining able-bodied boys and girls to haul bricks to help build a giant pyramid in the park in hopes of luring visitors. Maybe their neighbors will come back too. But something's not right about the entrepreneur behind it all. Then there's the new boy who came to help, the one with the softest of lips. Claudia Guadalupe Martinez, author of the award-winning *The Smell of Old Lady Perfume*, has long been distressed about how the global economy is displacing workers and families. Claudia grew up in a tight family in Segundo Barrio in El Paso, Texas. She

learned that letters form words from reading the Spanish subtitles of old westerns for her father. At age six, she already knew she wanted to create stories. Her father, who passed away when she was eleven, encouraged her to dream big and write many books. Claudia, her husband, and their daughter Penny live in Chicago, Illinois.

What if all those seemingly insignificant little what a coincidence! moments you've experienced were actually hinting at something very personal and important about yourself, and about the workings of human consciousness as a whole? Would you listen? Sue Watkins does. For more than thirty-five years, Susan M. Watkins, a former small-town newspaper reporter and the author of five books, has logged coincidences

as they've occurred in her life. What she's discovered is that single, seemingly inconsequential coincidences—an old friend calling at the exact moment she pops into your head, for example—are often pieces of larger, more complex and meaningful coincidence clusters that together create rich and revealing stories. In *What a Coincidence!* Watkins presents coincidence clusters that are truly astounding and, along the way, explores those two important questions: What do our personal coincidence clusters reveal to us about ourselves and our lives? And what do they reveal about human consciousness at large? The conclusions she draws are utterly life altering. You will never brush off those what a coincidence! moments again.

Presenting a fascinating insider's view of U.S.A.F. special operations, this volume brings to life the critical contributions these forces have made to the exercise of air & space power. Focusing in particular on the period between the Korean War & the Indochina wars of 1950-1979, the accounts of numerous missions are profusely illustrated with photos & maps. Includes a discussion of AF operations in Europe during WWII, as well as profiles of Air Commandos who performed above & beyond the call of duty. Reflects on the need for financial & political support for restoration of the forces.

"This book is a message from autistic people to their parents, friends, teachers, coworkers and doctors showing what life is like on the spectrum. It's also my love letter to autistic people. For too long, we have been forced to navigate a world where all the road signs are written in another language." With a reporter's eye and an insider's perspective, Eric Garcia shows what it's like to be autistic across America. Garcia began writing about autism because he was frustrated by the media's coverage of it; the myths that the disorder is caused by vaccines, the narrow portrayals of autistic people as white men working in Silicon Valley. His own life as an autistic person didn't look anything like that. He is Latino, a graduate of the University of North Carolina, and works as a journalist covering politics in Washington D.C. Garcia realized he needed to put into writing what so many autistic people have been saying for years; autism is a part of their identity, they don't need to be fixed. In *We're Not Broken*, Garcia uses his own life as a springboard to discuss the social and policy gaps that exist in supporting those

on the spectrum. From education to healthcare, he explores how autistic people wrestle with systems that were not built with them in mind. At the same time, he shares the experiences of all types of autistic people, from those with higher support needs, to autistic people of color, to those in the LGBTQ community. In doing so, Garcia gives his community a platform to articulate their own needs, rather than having others speak for them, which has been the standard for far too long.

Identifies common vocabulary words found at such locations as the park, the beach, the hospital, the racetrack, and the farm.

The LEGO® Technic Idea Book: Simple Machines is a collection of hundreds of working examples of simple yet fascinating Technic models that you can build based on their pictures alone. Each project uses color-coded pieces and is photographed from multiple angles, making it easy to see how the models are assembled without the need for step-by-step instructions. Every model illustrates a different principle, concept, or mechanism that will inspire your own original creations. You're encouraged to use these elements as building blocks to create your own masterpieces. The Technic models in Simple Machines demonstrate basic configurations of gears, shafts, pulleys, turntables, connectors, and the like. You'll learn how to create small, elegant machines like cranes, operable doors,

A Lego family goes to the airport to leave for a beach vacation, where they check their baggage, board the plane, and fly into the air to their destination.

For the 50th anniversary of the Boeing 747's first commercial flight, a picture book about the development of the iconic passenger plane and how it changed the history of air travel. In 1968, the biggest passenger jet the world had ever seen premiered in Everett, Washington. The giant plane was called the Boeing 747, but reporters named it "the Jumbo jet." There was only one problem. It couldn't fly. Yet. Jumbo details the story of the world's first wide body passenger jet, which could hold more people than any other plane at the time and played a pivotal role in allowing middle class families to afford overseas travel. Author and illustrator Chris Gall, himself a licensed pilot, shows how an innovative design, hard work by countless people, and ground-breaking engineering put the Jumbo jet in the air. On January 22, 1970, the Boeing 747 made it's first transatlantic flight, taking passengers from New York to Paris in seven hours.

Today's business leaders operate in an increasingly harsh environment. Uncertainty in the economy causes paralysis. Quarterly goals drive short-term and shortsighted decisions. Workforce mobility kills loyalty. Iconic products decline as fast as start-ups create new categories. And the pressure to do more with less, combined with the multiplicity of available marketing tools and technology, can be overwhelming. Now more than ever, brands and the people who lead them need clarity and guidance. The good news is that people have found ways to thrive in harsh environments for millennia. Author Jonathan David Lewis, combining the lessons of group survival dynamics with more than a decade of proprietary research into the factors that cause companies to lose their way, shows leaders how to thrive in unforgiving business environments by learning to: Focus on navigating risk instead of trying to measure or reduce it. Cultivate your brand's will to live by staying positive and asking the most important question: Are you worth it? Read the brand signs by observing the market, keeping an eye on performance measures, engaging your team, and listening to your gut. Develop a concept of "mission" to ensure internal alignment and reduce friction. Act with urgency rather than waiting for the right circumstance. Brand vs. Wild helps readers understand the wilderness in which they find their companies and identify the specific steps they must take to thrive in the Brand Wilderness. There is hope in a harsh business world. And Brand vs. Wild is it.

At first, everything appeared normal, except for the absence of people. Then I saw enemy bunkers and firing positions hidden among the trees. I reported my sightings to Maj. Thompson in the C & C ship. Then I saw several individuals running through the undergrowth toward the bunkers. They were dressed in black VC pajamas and carrying weapons. I quickly flew away

from the village. The Cobra gunships rolled in firing rockets and mini guns at the bunkers. When they finished their gun run, we came back in to do a damage report. As I came around the edge of the village at tree-top level and slow speed, all hell broke loose. I received heavy automatic weapons fire as rounds penetrated my Loach. I radioed, "Taking fire, taking fire." Brick by Brick Brilliance LEGO bricks are the building blocks of childhood. Yet they are far from child's play.
