The idea of this book is to guide readers through the process of building a 12 volt powerhouse that will convert any make of van into a wild, festival campervan! With the use of detailed explanations and images all of the subjects and tasks in the book should be well within the scope of a reasonably competent DIY enthusiast. The content will be especially useful for readers with outdoor interests (e.g. fishing, hiking, cycling, or going to events and festivals) who don't wish to go to the expense of purchasing a ready-built campervan. By means of the easy to follow instructions readers will be able to cook, wash and sleep in their van whilst living completely off-grid and without the need for complicated mains electricity or gas installations.
