Hoda Barakat's Sayyidi Wa Habibi Hoda Barakat, 2016-09-21 Hoda Barakat's 2004 Arabic novel tells the story of Wadie, a young man who leaves school and becomes corrupted by crime, and his wife, Samia, who flees with him to Cyprus to escape from gang leaders and militiamen he has riled during his criminal career. Set against the backdrop of the Lebanese civil war, the story is narrated by Wadie until he suddenly disappears from Cyprus; Samia then takes over the narration. Discrepancies between their stories raise questions about what exactly has happened, and Wadie's disappearance is never explained. Laila Familiar abridged the text with the author's approval so that it can be read by students with low-advanced proficiency in the Arabic language. Familiar provides introductory materials, a short biography of the author, a personal dictionary, and exercises that develop linguistic and cultural competency. Audio files of Barakat reading five passages from the work will be posted for free access on the GUP web site; these, along with a recorded interview, will help students improve listening skills. The book is meant to be used as a supplementary text and can be covered in ten class sessions.

Automatic Text Simplification Horacio Saggion,2022-05-31 Thanks to the availability of texts on the Web in recent years, increased knowledge and information have been made available to broader audiences. However, the way in which a text is written—its vocabulary, its syntax—can be difficult to read and understand for many people, especially those with poor literacy, cognitive or linguistic impairment, or those with limited knowledge of the language of the text. Texts containing uncommon words or long and complicated sentences can be difficult to read and understand by people as well as difficult to analyze by machines. Automatic text simplification is the process of transforming a text into another text which, ideally conveying the same message, will be easier to read and understand by a broader audience. The process usually involves the replacement of difficult or unknown phrases with simpler equivalents and the transformation of long and syntactically complex sentences into shorter and less complex ones. Automatic text simplification, a research topic which started 20 years ago, now has taken on a central role in natural language processing research not only because of the interesting challenges it possesses but also because of its social implications. This book presents past and current research in text simplification, exploring key issues including automatic readability assessment, lexical simplification, and syntactic simplification. It also provides a detailed account of machine learning techniques currently used in simplification, describes full systems designed for specific languages and target audiences, and offers available resources for research and development together with text simplification evaluation techniques.

Handbook for Arabic Language Teaching Professionals in the 21st Century Kassem M. Wahba, Zeinab A. Taha, Liz England, 2013-04-15 This landmark volume offers an introduction to the field of teaching Arabic as a foreign or second language. Recent growth in student numbers and the demand for new and more diverse Arabic language programs of instruction have created a need that has outpaced the ability of teacher preparation programs to provide sufficient numbers of well-qualified professional teachers at the level of skill required. Arabic language program administrators anticipate that the increases in enrollment will continue into the next decades. More resources and more varied materials are seriously needed in Arabic teacher education and training. The goal of this Handbook is to address that need. The most significant feature of this volume is its pioneer role in approaching the field of Arabic language teaching from many different perspectives. It offers readers the opportunity to consider the role, status, and content of Arabic language teaching in the world today. The Handbook is intended as a resource to be used in building Arabic language and teacher education programs and in guiding future academic research. Thirty-four chapters authored by leaders in the field are organized around nine themes: Background of Arabic Language Teaching; Contexts of Arabic Language Teaching; Communicative Competence in Arabic; The Learners; Assessment; Technology Applications; Curriculum Development, Design, and Models; Arabic Language Program Administration and Management; and Planning for the Future of Arabic Language Learning and Teaching. The Handbook for Arabic Language Teaching Professionals in the 21st Century will benefit and be welcomed by Arabic language teacher educators and trainers, administrators, graduate students, and scholars around the world. It is intended to create dialogue among scholars and professionals in the field and in related fields--dialogue that will contribute to creating new models for curriculum and course design, materials and assessment tools, and ultimately, better instructional effectiveness for all Arabic learners everywhere, in both Arabic-speaking and non-Arabic speaking countries.
