Radiation Oncology: Rationale, Technique, Results, by James D. Cox, MD and K. Kian Ang, MD, PhD, provides you with authoritative guidance on the latest methods for using radiotherapy to treat patients with cancer. Progressing from fundamental principles through specific treatment strategies for the cancers of each organ system, it also addresses the effects of radiation on normal structures and the avoidance of complications. This 9th edition covers the most recent indications and techniques in the field, including new developments in proton therapy and intensity-modulated radiotherapy (IMRT). It also features, for the first time, full-color images throughout the text to match those that you see in practice, and uses new color-coded treatment plans to make targets, structures, and doses easier to read at a glance. Evidence from

randomized clinical trials is included whenever possible to validate clinical recommendations. The state-of-the-art coverage inside this trusted resource equips you to target cancer as effectively as possible while minimizing harm to healthy tissue. Stands apart as the only book in the field to cover the conceptual framework for the use of radiotherapy by describing the most effective techniques for treatment planning and delivery and presenting the results of each type of therapy. Emphasizes clinical uses of radiation therapy, providing pertinent, easy-to-understand information on state-of-the-art treatments. Includes information useful for non-radiotherapists, making it "recommended reading" for other oncology specialists. Offers a practical, uniform chapter structure to expedite reference. Guides you through the use of the newest radiation oncology techniques, including principles of proton therapy and new developments in intensity-modulated radiotherapy (IMRT). Incorporates evidence from randomized clinical trials whenever possible to validate clinical recommendations. Presents full-color images throughout to match the images that you see in practice. Extensive use of "combination" imaging presents a complete picture of how to more precisely locate and target the radiotherapy field.

Was it mere encyclopedism that motivated Fakhr al-Dīn al-Rāzī (d.1210), one of the most influential Islamic theologians of the twelfth century, to theorize on astral magic – or was there a deeper purpose? One of his earliest works was *The Hidden Secret* ('al-Sirr al-Makrūm'), a magisterial study of the 'craft' which harnessed spiritual discipline and natural philosophy to establish noetic connection with the celestial souls to work wonders here on earth. The initiate's preceptor is a personal celestial spirit, 'the perfect nature' which represents the ontological origin of his soul. This volume will be the first study of *The Hidden Secret* and its theory of astral magic, which synthesized the naturalistic account of prophethood constructed by Avicenna (d.1037), with the perfect nature doctrine as conceived by Abū'l-Barakāt (d.1165). Shedding light on one of the most complex thinkers of the post-Avicennan period, it will show how al-Rāzī's early theorizing on the craft contributed to his formulation of prophethood with which his career culminated. Representing the nexus between philosophy, theology and magic, it will be of interest to all those interested in Islamic intellectual history and occultism.

Pediatric ultrasound is different to adult ultrasound in all respects. The equipment chosen for pediatric work has different requirements, the technique of scanning is different, the normal anatomy changes throughout childhood and the pathology encountered in childhood are unique to children. This book addresses the 'how', 'why' and 'when' of pediatric ultrasound. Each chapter begins with the 'how': how to scan and what special techniques or tricks to use when scanning children. The 'why' and 'when' discuss the pathology and use of other imaging modalities - an essential skill in pediatric radiology where the limitation of both radiation exposure and number of examinations is of paramount importance. Accessible, step-by-step approach Covers the practical aspects of scanning, as well as the role, value and limitations of ultrasound in diagnosing different diseases Written at a level suitable for both students and practitioners

It is hard to overestimate the importance of the contribution made by Dame Frances Yates to the serious study of esotericism and the occult sciences. To her work can be attributed the contemporary understanding of the occult origins of much of Western scientific thinking, indeed of Western civilization itself. The Occult Philosophy of the Elizabethan Age was her last book, and in it she condensed many aspects of her wide learning to present a clear, penetrating, and, above all, accessible survey of the occult movements of the Renaissance, highlighting the work of John Dee, Giordano Bruno, and other key esoteric figures. The book is invaluable in illuminating the relationship between occultism and Renaissance thought, which in turn had a profound impact on the rise of science in the seventeenth century. Stunningly written and highly engaging, Yates' masterpiece is a must-read for anyone interested in the occult tradition.

Perfect for radiation oncology physicians and residents needing a multidisciplinary, treatment-focused resource, this updated edition continues to provide the latest knowledge in this consistently growing field. Not only will you broaden your understanding of the basic biology of disease processes, you'll also access updated treatment algorithms, information on techniques, and state-of-the-art modalities. The consistent and concise format provides just the right amount of information, making *Clinical Radiation Oncology* a welcome resource for use by the entire radiation oncology team. Content is templated and divided into three sections -- Scientific Foundations of Radiation Oncology, Techniques and Modalities, and Disease Sites -- for quick access to information. Disease Sites chapters summarize the most important issues on the opening page and include a full-color format, liberal use of tables and figures, a closing section with a discussion of controversies and problems, and a treatment algorithm that reflects the treatment approach of the authors. Chapters have been edited for scientific accuracy, organization, format, and adequacy of outcome data (such as disease control, survival, and treatment tolerance). Allows you to examine the therapeutic management of specific disease sites based on single-modality and combined-modality approaches. Features an emphasis on providing workup and treatment algorithms for each major disease process, as well as the coverage of molecular biology and its relevance to individual diseases. Two new chapters provide an increased emphasis on stereotactic radiosurgery (SRS) and stereotactic body irradiation (SBRT). New Associate Editor, Dr. Andrea Ng, offers her unique perspectives to the Lymphoma and Hematologic Malignancies section. Key Points are summarized at the beginning of each disease-site chapter, mirroring the template headings and highlighting essential information and outcomes. Treatment algorithms and techniques, together with

In the last half of 1509 and the first months of 1510, Cornelius Agrippa, known in his day as a Magician, gathered together all the Mystic lore he had obtained by

the energy and ardor of youth and compiled it into the elaborate system of Magic, in three books, known as Occult Philosophy, the first book of which--Natural Magic--constitutes the present volume. This is true and sublime Occult Philosophy. To understand the mysterious influences of the intellectual world upon the celestial, and of both upon the terrestrial; and to know how to dispose and fit ourselves so as to be capable of receiving the superior operations of these worlds, whereby we may be enabled to operate wonderful things by a natural power--to discover the secret counsels of men, to increase riches, to overcome enemies, to procure the favor of men, to expel diseases, to preserve health, to prolong life, to renew youth, to foretell future events, to see and know things done many miles off, and such like as these. These things may seem incredible, yet read but the ensuing treatise and thou shalt see the possibility confirmed both by reason and example.
