

Alain Anderton Economics Teachers Guide

This revision and practice book is a useful way for students to prepare effectively for their AS Economics exams. It covers every Unit from the AQA, Edexcel and OCR courses, with clear, concise explanations and examples that make the subject easy to understand. There are also practice questions and exam-style questions for every topic (with outline answers at the back), plus advice for getting top marks in the AS exams.

This work maintains the approach of the US text, Principles of Economics by Case and Fair, but with the main focus on Europe. This is reflected in the use of the open economy approach, the use of the Euro as the standard currency, as well as providing numerous European examples and applications. Maths Boxes enable the lecturer to decide on the amount of calculus they wish to include. End-of-chapter problems with selected answers at the end of the book allow students to assess their progress.

Exam Board: AQA Level: AS/A-level Subject: Law First Teaching: September 2017 First Exam: June 2018 This title has been approved by AQA Accurately cover the breadth of content in the new 2017 AQA A-level specification with this textbook written by leading Law authors, Jacqueline Martin and Nicholas Price. Edexcel's own resources for the new Edexcel GCE Economics specification

Why did Kurt Vonnegut shun being labeled a writer of science fiction (SF)? How did Margaret Atwood and Ursula K. Le Guin find themselves in a public argument about the nature of SF? This volume explores the broad category of SF as a genre, as one that challenges readers, viewers, teachers, and scholars, and then as one that is often itself challenged (as the authors in the collection do). SF, this volume acknowledges, is an enduring argument. The collected chapters include work from teachers, scholars, artists, and a wide range of SF fans, offering a powerful and unique blend of voices to scholarship about SF as well as examinations of the place for SF in the classroom. Among the chapters, discussions focus on SF within debates for and against SF, the history of SF, the tensions related to SF and other genres, the relationship between SF and science, SF novels, SF short fiction, SF film and visual forms (including TV), SF young adult fiction, SF comic books and graphic novels, and the place of SF in contemporary public discourse. The unifying thread running through the volume, as with the series, is the role of critical literacy and pedagogy, and how SF informs both as essential elements of liberatory and democratic education.

The bestselling GCE Business Studies texts updated and improved for the new specifications

*Best-selling and highly respected author, Alain Anderton. *Clear unit structure throughout allows teachers and lecturers to construct their own pathways. *Vast array of topics covered, with units at the end of the book dedicated to study skills and examination techniques. *Over 500 questions and activities, which will ensure that students develop the understanding and skills required for greater examination success.

The 2018 World Cup edition of the international bestseller and "the most intelligent book ever written about soccer" (San Francisco Chronicle) is updated throughout and features new chapters on the FIFA scandal, why Iceland wins, and women's soccer. Named one of the Best Books of the Year by the Guardian, Slate, Financial Times, Independent (UK), and Bloomberg News Written with an economist's brain and a soccer writer's skill, Soccernomics applies high-powered analytical tools to everyday soccer topics, looking at data and revealing counterintuitive truths about the world's most beloved game. It all adds up to a revolutionary new approach that has helped change the way the game is played. This World Cup edition features ample new material, including fresh insights into FIFA's corruption, the surge in domestic violence during World Cups, and Western Europe's unprecedented dominance of global soccer.

Arts and Cultural Management: Sense and Sensibilities in the State of the Field opens a conversation that is much needed for anyone identifying arts management or cultural management as primary areas of research, teaching, or practice. In the evolution of any field arises the need for scrutiny, reflection, and critique, as well as to display the advancements and diversity in approaches and thinking that contribute to a discipline's forward progression. While no one volume could encompass all that a discipline is or should be, a representational snapshot serves as a valuable benchmark. This book is addressed to those who operate as researchers, scholars, and practitioners of arts and cultural management. Driven by concerns about quality of life, globalization, development of economies, education of youth, the increasing mobility of cultural groups, and many other significant issues of the twenty-first century, governments and individuals have increasingly turned to arts and culture as means of mitigating or resolving tough policy issues. For their growth, arts and culture sectors depend on people in positions of leadership and management who play a significant role in the creation, production, exhibition, dissemination, interpretation, and evaluation of arts and culture experiences for publics and policies. Less than a century old as a formal field of inquiry, however, arts and cultural management has been in flux since its inception. What is arts and cultural management? remains an open question. A comprehensive literature on the discipline, as an object of study, is still developing. This State of the Discipline offers a benchmark for those interested in the evolution and development of arts and cultural management as a branch of knowledge alongside more established disciplines of research and scholarship.

If you struggle with index numbers or calculations of elasticity, this is the book for you. This textbook companion will help improve your essential maths skills for economics, whichever awarding body specification you're following. You can use it throughout your course, whenever you feel you need some extra help. - Develop your understanding of both maths and economics with all worked examples and questions within a economics context - Improve your confidence with a step-by-step approach to every maths skill - Measure your progress with guided and non-guided questions to see how you're improving - Understand where you're going wrong with full worked solutions to every question - Feel confident in expert guidance from experienced teacher Peter Davis and examiner Tracey Joad, reviewed by Colin Bamford, Professor of Transport and Logistics at University of Huddersfield and former Chief Examiner
