At dog obedience trials, fighting is common -- especially between owners. But Dog's Life columnist Holly Winter is shocked when a mere training session ends in murder. Between sit, heel and the final long down, a retired doctor takes the longest down of all -- strangled with his malamute Rowdy's leash! And when Holly takes the big, beautiful orphaned dog home, he quickly becomes her cherished new partner in digging up clues to a crime that cuts to the bone with betrayal . . . and touches the heart of everyone who

has ever loved a dog.

“A compelling look at the origins of and the ongoing unique relationship between humans and dogs . . . [a] lively blend of science and history.”—Kirkus Reviews (starred review) We know dogs are our best animal friends, but have you ever thought about what that might mean? Fossils show we’ve shared our work and homes with dogs for tens of thousands of years. Now there’s growing evidence that we influenced dogs’ evolution—and they, in turn, changed ours. Even more than our closest relatives, the apes, dogs are the species with whom we communicate best. Combining history, paleontology, biology, and cutting-edge medical science, Kay Frydenborg paints a picture of how two different species became deeply entwined—and how we coevolved into the species we are today. “Narrative nonfiction at its best—high interest and engaging, with meaty interdisciplinary science exploration. A top choice for tweens and teens.”—School Library Journal (starred review) “This narrative blend of history and science belongs on all shelves.”—Booklist (starred review) “A fascinating study of the ways in which a relationship with canines has been pivotal to humanity’s development . . . Sidebars and color photographs supplement and expand on the central narrative, which is all but certain to leave readers thinking about their dogs, and themselves, in entirely new ways.”—Publishers Weekly “Evident throughout [A Dog in the Cave] are the author’s passion and curiosity.”—The Horn Book

A relationship with an Alaskan Malamute is one that many envy, few can understand, and none can touch. Those living with this breed understand it is not an obligation, more than a responsibility, and greater than any other commitment—theirs is a way of life. This is the story of Noah—a proud seal and white Malamute—and the impact he made on the lives around him. Detailing what it is like to live with this rare breed of the arctic, all the wonderful (and sometimes not so wonderful) moments are here that would be of interest to anyone with paw prints on their heart. Hoping to positively contribute to the betterment of both humans and animals by raising awareness of the mutual bonds we share, this work explores the many lessons that can be learned from our canine companions. What readers are saying: "With passionate intensity, Tommy Williams succeeds in what he sets out to do: to record "what it's like to share one's life with a creature of the Arctic." And what a creature Noah was! "With the power and fury of an avalanche," Williams writes, "Noah descended upon my life." Having been swept away by malamute avalanches, I found Williams's depiction of the experience startlingly familiar and deeply moving. If your love for an individual dog has ever been so profound and so transformative that you have fallen under the thrall of an entire breed, then this marvelous book is for you. If you have ever loved a dog, you will love this book." - Susan Conant "If you've ever tried to explain to someone the relationship you have with your dog, or why your Malamute is more than "just a dog", you should have this book on your bookshelf- it has the words for you." - Ian Luke "Tommy has captured the essence of what it is like to share your life with an Alaskan Malamute." - DruAnne Martin "This is one of the best books I have read." - Marcia Barnes And to keep me humble... "This is hands down one of the worst books I've ever read." - JMR While this book may not be what some expect or want it to be, I can assure all it is exactly what I set out to write-The journey I shared with Malko's Never A Prisoner, Noah. Some of the material may be outside of the reader's comfort zone, but it is important to recognize what Carradine notes: "The quest for enlightenment is dangerous to the caterpillar but essential to the butterfly."

Eleven-year-old Matt is struggling in school and he has to set up his own business to save his failing math grade. But what is he even good at? The only thing he truly loves is his

team of dogs, and so Matt's Sled Dog School is born. Teaching dogsledding should be easy, right? But people, just like dogs, can be unpredictable. And sometimes the bravest thing a person can do is admit they need help. Like Terry Lynn Johnson's popular Ice Dogs, Sled Dog School is about overcoming adversity, finding your strengths, and your friends, and following your passions.

In the Colorado mountain town of Steamboat Springs there must be three hundred dogs. Jack's malamute, McKinley, is the leader of them all. But Jack, being human, has no way of knowing that. For him, his family's dog is just a great pal. And protector. Jack cannot know that Redburn, a "leash-licking" Irish setter, is McKinley's rival for the job of head dog. The boy cannot know, with the sudden hillside appearance of a she-wolf, Lupin, that not only McKinley's job -- but his life -- is in danger. Lupin's message: Dogs free yourselves from mankind. Come join us, we who need you to replenish our diminishing wolf pack in the wild. But imagine how a good dog, loyal to his human pup, would hear Lupin's call! McKinley's thrilling story tells itself, as first he and the boy together encounter Lupin in a canyon perfect for an old-time ambush, and later as they try to save her from both Redburn and a neighbor, a vicious man armed with a gun and a grudge. No one -- not even McKinley -- can foresee the end.

A book about every dog breed. "Breeds both familiar and unfamiliar are positively bursting out of this oversize volume... Dog lovers will spend hours poring over these winsome illustrations." -- School Library Journal The book brings together charming drawings of 300 domestic dog breeds, including every breed recognized by the American Kennel Club in the seven official groupings -- Working, Toy, Hound, Terrier, Herding, Sporting and Non-Sporting. Also included is a selection of purebreds not officially recognized by the American Kennel Club as well as some of the most popular "designer" dogs, such as the Labradoodle and Chiweenie. There are also breeds less familiar to North Americans but recognized by kennel clubs in other countries; for example, the Canadian Eskimo Dog and the Australian Silky Terrier. Jim Medway's color drawings are accurate and engaging. At the end of the book is an entertaining Puppy Identifier where children can test their ability to recognize the breed of 30 puppies. There is also a Dog Breed Fact Index with interesting trivia about all of the breeds. More than one-third of American households have a dog. With Big Dogs, Little Dogs, children and adults alike will enjoy learning and identifying the dogs that they encounter. It is fun and informative and it might instill a lifelong interest in "man's best friend."

For all lovers of dogs and adventure, come experience Kelly and Loki the Wolfdog's world together, as they explore the country and inspire those around them, revealing the endless possibilities between a man and his four-legged companion. During a blizzard in 2012, Kelly brought Loki—a husky/arctic wolf/malamute mix—home. Growing up in a family that took dog ownership very seriously, Kelly had his fair share of experiences with large dogs. But Loki was different. Instead of the dog entering into Kelly's world, Kelly felt that he had to listen closely to Loki and enter into his world. At that time, Kelly decided that he would do everything possible to not leave him behind at the house. They started backcountry snowboarding together when Loki was four months old, and before his third birthday, he'd seen most of the western United States. Loki the Wolfdog has developed a massive following across social media. With 1.5 million followers on Instagram and 140,000 likes on Facebook, people have grown to love following Kelly and Loki's adventures. Starting out just for fun, Kelly started an Instagram account for Loki documenting their escapades. The story was later picked up by numerous websites, giving them unexpected exposure. Realizing that they now have a voice in the social media community, they want to give back and inspire others to get out, explore the world, and make memories with their pups. Loki the Wolfdog has a massive following, because people have enjoyed watching Kelly and Loki's undeniable bond. The story is both philosophical and visual: an invitation to experience life through Kelly and Loki's eyes. In this second installment of the Renegades trilogy, Nova, Adrian, and the rest of their crew – Ruby, Oscar, and Danna -- are faced with escalating crime in Gatlon City, while covert weapons and conflicting missions have Nova and Adrian questioning not only their beliefs about justice, but also the feelings they have for each other. An argument that consciousness, more widespread than previously assumed, is the feeling of being alive, not a type of computation or a clever hack. In The Feeling of Life Itself, Christof Koch offers a straightforward definition of consciousness as any subjective experience, from the most mundane to the most exalted—the feeling of being alive. Psychologists study which cognitive operations underpin a given conscious perception. Neuroscientists track the neural correlates of consciousness in the brain, the organ of the mind. But why the brain and not, say, the liver? How can the brain, three pounds of highly excitable matter, a piece of furniture in the universe, subject to the same laws of physics as any other piece, give rise to subjective experience? Koch argues that what is needed to answer these questions is a quantitative theory that starts with experience and proceeds to the brain. In The Feeling of Life Itself, Koch outlines such a theory, based on integrated information. Koch describes how the theory explains many facts about the neurology of consciousness and how it has been used to build a clinically useful consciousness meter. The theory predicts that many, and perhaps all, animals experience the sights and sounds of life; consciousness is much more widespread than conventionally assumed. Contrary to received wisdom, however, Koch argues that programmable computers will not have consciousness. Even a perfect software model of the brain is not conscious. Its simulation is fake consciousness. Consciousness is not a special type of computation—it is not a clever hack.

Consciousness is about being.

Presents the story of a sled dog named Granite, who became deathly ill, but recovered to become lead dog for Susan Butcher as she raced the one-thousand-mile Iditarod race in Alaska. "This book will delight both animal lovers and military buffs!" — Elizabeth Letts, bestselling author of *The Eighty Dollar Champion* Millions rallied to the cause of freedom against Nazism and the menace of Imperial Japan. But did you know that some of those heroes had fur, or feathers? War animals guarded American coasts against submarine attack, dug out Londoners trapped in bomb wreckage, and carried vital messages under heavy fire on Pacific islands. They kept up morale, rushed machine gun nests, and even sacrificed themselves picking up live grenades. Now Robin Hutton, the bestselling author of *Sgt. Reckless: America's War Horse*, tells the heart-warming stories of the dogs, horses, mules, pigeons—and even one cat—who did their bit for the war effort. American and British families volunteered beloved family pets and farm dogs to aid in the war effort; Americans, including President Roosevelt, bought honorary commissions in the reserves for lapdogs and other pets not suitable for military duties to “exempt” them from war service and raise money to defeat Hitler and Tojo. Many of these gallant animals are recipients of the prestigious PDSA Dickin Medal, the “Animals’ Victoria Cross.” In *War Animals: The Unsung Heroes of World War II* you’ll meet: -Judy, the POW dog who helped her beloved human survive brutal Japanese prison camps -Cher Ami, the pigeon who nearly died delivering a message that saved American troops from death by friendly fire -Beauty, the “digging dog” who sniffed out Londoners buried in the wreckage of the Blitz—along with pets, including one goldfish still in its bowl! -Olga, the horse who braved shattering glass to do her duty in London bombings -Smoky, the Yorkshire terrier who did parachute jumps, laid communications wire through a pipe so small only she could navigate it, became the first therapy dog—and starred on a weekly TV show after the War -Simon, the war cat whose campaign against the “Mao Tse Tung” of the rat world saved food supplies and his ship’s crew -Chips, who guarded Roosevelt and Churchill during the Casablanca Conference, and the only dog to earn a Silver Star for his heroics The shining loyalty and courage of these heroes is a testimony to the enduring bond between us and the animals we love.
