With 340 pages, and more than 500 illustrations and charts, size 8.25 x 10.75 inches, this is possibly the most complete workshop manual for the Alfa Romeo 750 & 101 series of automobiles. It includes: A reprint of the September 1958 factory Workshop Manual (No.637). The 12-page 'Transmission Appendix' from the December 1957 manual (No.611). The 15-page 1962 'Enclosure to the Shop Manual-Technical Characteristics' (No.854) plus the 1963 and 1964 'Technical Characteristics' publications for the 1600cc models (27 pages). Introduced in 1954, the initial 750 Series Giulietta was replaced by the 101 Series Giulietta in 1959. Both the 750 and 101 models were powered by a 1300cc (1290cc) engine. The engine capacity was increased in 1962 with the introduction of a 1600cc (1570cc) unit. Co-incident with this engine update, the Giulietta name was changed to Giulia, although they still retained their original 101 Series designation. From 1962 onwards, the updated Giulietta continued to be sold under the Giulia name until they were replaced by the all-new 105 Series Giulia-based models in 1965. As the predominance of the basic mechanical components of the 750 and 101 models remained unchanged during their 1954-1965 production run, the original Giulietta workshop manual was considered adequate and the factory supplemented it with the publication of 'Technical Characteristics' booklets (1963 &

1964) that updated the Factory manual with technical data specific to the 1600cc equipped cars. Timeline of the English language manuals issued by the Alfa factory for the 750 & 101 Series Giulietta and Giulia models: The first English language Workshop Manual (Part No.577 - 600 copies) was issued in May 1957 and it consisted of 14 individual booklets in a ring binder. In addition, a separate booklet numbered 15 was added a little later that was identified as 'Special Repair Data for the 'Sprint Veloce, Spider and Super Spider'. In December 1957, Alfa issued 1000 copies of a softbound workshop manual (Part No.611) that combined the booklets from the May 1957 publication into a single volume. It should be noted that booklet 14 'Special Tools and Equipment' was omitted from this edition and that the images are of poor quality. In September 1958, another 1000 copies of a softbound single volume manual (Part No.637) was issued and the images in this manual are almost photo quality. This edition also included the previously missing 'Special Tools' section. However, for some unknown reason the 12-page appendix to the transmission section from the December 1957 edition was omitted. This same part number (637) was reprinted by the factory in September 1961 (1000 copies). Finally, in November 1962, Alfa issued 2000 copies of a 15-page booklet 'Enclosure to the Shop Manual - Technical Characteristics' (Part No.854). This booklet expanded the technical data for the 1300cc models that was previously included in 'Technical Specifications' section of both the ring bound and softbound workshop manuals. However, in 1962, the Giulietta sport models: Sprint, Sprint Special and Spider were fitted with the new 1600cc engine and the Giulietta Series 101 name was dropped but they continued to be sold under the Giulia name (as 101 Series vehicles) until they were replaced by the all-new 105 Series Giulia-based models in 1965. Consequently, for the sake of completeness, the 20-page October 1963 'Technical Characteristics' booklet (Part No. 955 -1000 copies) for the 1600cc Giulia Ti, Spider & Sprint and the 7-page October 1964 'Technical Characteristics' for the Giulia Spider Veloce should be a required addition to this list of manuals for the 750 and 101 Series models.

Alfa Romeo Giulietta Spider Maintenance and Restoration Book

The most trustworthy source of information available today on savings and investments, taxes, money management, home ownership and many other personal finance topics.

After a period of post-war austerity, in 1957 Alfa Romeo decided it was time to re-enter the market for luxury/executive class cars with a new range designed for the growing number and prosperity of potential customers. Thus, the first models in the new 2000 series emerged, followed by the 2600 series in 1962. That they were not hugely successful, although some 18,540 were manufactured between 1957 and 1966, can be attributed to a number of factors, principally cost. Largely ignored for many years, these cars are now recognized as a significant element in Alfa Romeo's history and this book is a valuable record of their story. Richly illustrated with over 200 colour and black & white photographs, this book introduces the history of the company and its early designs; describes the early Berlina saloon, Spider convertible and Sprint coupe, and their development into the 2600 series; details the evolution of the 1900-based engine into the 6-cylinder 2600 engine; provides a history of the SZ Sprint Zagato; includes information on prototypes, show specials, specification tables, colour schemes and production numbers and, finally, includes a chapter on owning a 2000 or 2600.

The Alfa Romeo 105 series Spider is one of the most admired drop-head sports cars to come out of Italy. Launched in 1966, its radical new look was not immediately welcomed. As prospective buyers gradually warmed to the model, enhancements were introduced including more powerful engines and higher-spec body and interior fittings. Despite its inauspicious start, production of this much-admired car lasted for twenty-seven years, finally stopping in 1993. Jim Talbott and Andrew Brown pay homage to the 105/115 series Alfa Spider. With over 330 photographs, many specially commissioned, this new book describes the Alfa Romeo company history including its philosophy of incorporating driver appeal into all of its products, resulting in some of the most desirable vehicles of their age; it details the evolution of the 105/115 series through four distinct body styles; lists the technical design specifications and every major version of the Spider and finally, discusses the issues and challenges of finding and owning a classic Spider.

Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension,

Alfa Romeo All-Alloy Twin Cam Companion provides an excellent technical and historical overview of the Giulietta and Giulia family of small sporting roadsters, coupes and sedans. If an Alfa Romeo had one of the all-alloy four-cylinder engines and reached production, it's covered in the Alfa Romeo All-Alloy Twin Cam Companion. That means that even after the Giulia name was dropped - particularly in the United States - the many variants of Duetto, GTV, Berlina and Alfetta are covered, from 1954 through 1994 when the final Alfas-including the four-cylinder Spiders-were sold in the United States. When it came to Alfa Romeos, author Pat Braden was an enthusiast's enthusiast. Pat didn't just write about Alfas - he lived and breathed Alfas. From the mid-1950s when he first owned a Giulietta Sprint until his death in August 2002, Pat had owned scores of Alfa Romeos, ranging from a 6C 1750GTC and an 8C 2300 to 1900s, Giuliettas, Giulias and countless later models. Alfa models are discussed according to history, engine, chassis and trouble spots. Without being a repair manual, this book contains important technical information needed to understand and enjoy one of these Alfas, as well as to perform many minor repair, maintenance, and service tasks. Braden starts with a brief overview of Alfa Romeo history, followed by a look at Alfa's presence in America. He also explores the major models of coupe, spider and berlina that used the all-alloy four-cylinder, as well as the limited production variants. Of course, he also gives much attention to that mighty engine itself. Braden explains the design and history of the engine, as well as exploring trouble spots and offering extensive advice and tips. Additional technical sections focus on the fuel system, transmission, brakes and chassis, not to mention overall restoration. Alfa Romeo All-Alloy Twin Cam Companion is a key to getting the absolute maximum benefit and enjoyment out of Alfa.

How Cars Work is a completely illustrated primer describing the 250 most important car parts and how they work. Whether you want to go racing or have maximum street performance, the expert advice in this book will help you to build a powerful and reliable engine first time-without wasting money on incompatible components or modifications that don't work. Covers 1300, 1600, 1750, 1800 and 2000 dohc engines (not Twin Spark). Also offers advice on suspension, brakes, steering and gearing.

Alfa Romeo is synonymous with style and performance. These qualities are epitomized in forty years' production of the famous Alfa Romeo series of Spider sports cars. From the Giulietta Spider of 1955 to the latest style launched in 1996, John Tipler offers the full and fascinating story of the conception, design, introduction and production of these stylish automobiles.

After saving Alfa Romeo from oblivion in 1987, it took Fiat nearly five years to debut the first new Alfa produced under its control. This is the story of how the competition versions of the 155/156/147 family of cars were developed and subsequently raced to many championship titles and race wins. Alfa Romeo's 155 saloon was a comprehensively successful racing touring car that won the German and world-wide DTM Championship, and later ITC races. The model also took on the role of representing the company in national touring car championships throughout the world, most notably winning the British Touring Car Championship in 1994. The 156 was Alfa's successor to the 155 and was also raced with much success. This book follows the development and competition history of this model too, along with its sibling, the 147. Together, these models kept the Alfa Romeo name at the pinnacle of motor sport for many years, from 1992 to 2006, and will become future motorsport classics.

Alfa Romeo 916 GTV and Spider traces the complete story of the Alfa Romeo GTV and Spider models produced between 1994 - 2005, commonly known to enthusiasts by the manufacturer's project code as the 916 series. The 916 models would always be controversial - they replaced the iconic Spider, the best-selling Alfa Romeo sports model of all time, and the brand-establishing Alfetta GTV. Sharing components and a platform with a humble Fiat hatchback, would the cars ever be considered 'real' Alfa Romeos? The cars were critically acclaimed, and, though they faced tough competition in the late 1990s from the likes of the Audi TT, they remained in production for over a decade. Topics covered include: Full history of the 916 series GTV and Spider models; Design, development and evolution of the models from 1994 - 2005; Participation of the GTV in motorsport; Model variations in depth through all three facelifts; Previously unpublished production figures, and chassis numbers for the desirable, limited-edition GTV Cup model. Comprehensively

researched guide to the entire lifespan of the 916 series. Will appeal to Alfa Romeo and automotive enthusiasts. The history and design process are examined along with an in-depth guide to each of the model variants produced. The cars' current position in the classic car market is considered. Superbly illustrated with 240 colour photographs. Robert Foskett is a life-long Italian car enthusiast with a special interest in Alfa Romeo.

Guide to information on ... cars and light trucks.

Ten years have passed since the original edition of this book was published, but Alfa Romeo enthusiasts everywhere are more active today than ever in preserving, modifying and racing these excellent cars. Throughout this time, the author in true Alfista fashion, never stopped looking for and trying new techniques to increase the power, overall performance and reliability of Alfas and their engines. This book is the result of much research, and also first-hand experience gained through many Alfa rear wheel drive model projects, from the 105 series to the last of the 75 models. There is a lot of completely new information regarding TwinSpark Cylinder head mods, big-brake mods, LSD adjustment procedure, electrical system improvements, plus many flow-bench diagrams, dyno plots, and much more.
