The newest addition to the extremely successful Teach Yourself Series is here! This book is packed with useful tips on how to harness creativity in both lyric writing and music composition and is sure to inspire any aspiring songwriter! Good Vibrations is my story of how I had my voice restored to functional use. It is a step by step account of the exercises I did, and the fears I encountered. It also contains email correspondence of two people who were diagnosed with SD and I instructed each of them in the exercises by email with their voices being improved.

The eye of the camera lens is a window to our world. Through it, we see beauty, tragedy, and the passing of our lives. Sometimes, if we are especially fortunate, we are privileged to view fleeting moments in history. "Eye Remember" is a personal glimpse at the people, places, and events that shaped a generation of post World War II "baby-boomers." This volume contains photos, all from the author's personal collection, and profiles of celebrities, activists, and political leaders from those times. They colored the lives of us all.

This book teaches everything you need to know to get started singing the music you love. After an introduction to vocal technique, the author takes you from proper posture and breathing techniques to strengthening the vocal chords through intoning. This book teaches sight reading in a systematic way by creating exercises based on the same concepts that the student is studying in the Lesson Book. Exercises are short and the music is generally easier than correlating pages in the Lesson Book. Teachers, especially those in nursery and pre-primary schools, know that it takes specialized learning aids to help children learn how to identify objects, develop eye-hand and fine motor coordination, improve attention span, and learn to focus on the activity in which they are participating. The aim of BEE CLEVER Activity Books Keeping these important learning factors in mind, a pre-school educator and counsellor has created a series of simple and stimulating activity books. These help develop the skills a child needs, plus contribute to the further development of the child's 'writing readiness'. Pallavi Dalal - the creator of BEE CLEVER Activity Books - has spent over 25 years working with pre-school children. She says, "There has been much thought, care, understanding, laughter and joy that has gone into creating these books. I can only hope that they will bring children many 'magical moments' of learning, and spending time with each other in a happy and relaxed frame of mind." Two Important Factors While planning any activity for children, two important principles of learning are always uppermost in her mind: 1. "I see and I remember." 2. "I do and I understand." She has designed these books to develop differentiating and logical thinking skills in children and evaluate their interests in certain areas, without making them feel like they are being 'tested'! How BEE CLEVER books are

DIFFERENT - Objects illustrated are those a child is generally familiar with. - Instructions can be read to a child without having to simplify them. - Illustrations are bold and clear for the child to see and work comfortably. - Accurate use of grammar, punctuation and spelling. - Each book in the series explains the value of doing that specific activity. - Simple 'Do's and Don'ts' create a 'win-win' situation for the child. BEE CLEVER SERIES: - Colouring 1 - Colouring 2 - Join the Dots 1 - Join the Dots 2 Matching - Mazes 1 - Mazes 2 - Numbers 1 - Numbers 2 - Odd One Out - Opposites 1 - Opposites 2 - Pattern & Letter Writing 1 - Pattern & Letter Writing 2 - Phonics 1 - Phonics 2 - Shapes 1 - Shapes 2 - Story Sequence - What's Different? - What's Next? - What's Wrong?

Improving your singing takes time and effort so it's good to have a plan! Are you looking to kick off your vocal training, dust off your vocal cords, or just seeking some fresh ideas to help you improve your voice and vocal fitness? This book teaches you a solid vocal technique to

strengthen and build your voice with simple concepts and terminology through well-constructed vocal exercises. Based on the professional teaching methods developed by Jane Edgren at the Vocal Fitness Training(TM) studio, this book teaches skills in breathing, articulation, tone, and resonance in the low, middle and medium high range, with an emphasis on vocal fitness. There are 20 self-guided singing lessons, and 12-months of free online access to over 140 vocal exercise audio tracks and 30 instructional videos, using the special code provided within the book. Additionally, each lesson has corresponding Practice Plans so you don't have to figure out what to practice on your own. Each Practice Plan has a daily interactive playlist you can use with your smart phone, tablet or computer through the VocalFitnessStudio.com website. FAQs What is Vocal Fitness? Most people would never participate in an athletic activity without taking some lessons to learn the basic skills to become successful. Singing is no different. The parts of the body primarily responsible for generating vocal sound are muscles capable of responding positively to physical training, and your voice will improve when they are strong, flexible, and working properly. Well-trained muscles for singing easily produce clear tones throughout the range, improve the overall stamina of the voice, and bring the entire instrument into balance. Do I need to be able to read music to learn this material? No, it is not necessary to be able to read music, although music for each vocal exercise is included in the book. Can you learn to sing on your own? This book focuses on developing new muscle memory through vocal exercise primarily in the medium and low ranges to create a solid vocal technique, and the exercises are pretty straightforward, and easy to learn and execute. Does this program apply to all styles of singing? Almost every singer can benefit from some kind of vocal training that improves their vocal tone and breathing. This course seeks to improve your vocal fitness so that you can have a better foundation on which to sing your own style. Once you create a strong, reliable vocal sound, you can add your style of music to it. How is the course any different than watching videos on the Internet? Many singers turn to the Internet to learn more about how to improve their singing, and there are many videos offering quick answers to vocal challenges. But what is often missing is a long-term, progressive program to teach vocal technique methodically. Training a singing voice takes time, and there are no shortcuts to a great technique. How long does it take to see improvement? When a singer commits to practicing this vocal technique correctly, with thoughtfulness, discipline and patience, the time they invest will pay them back many times over. The process of singing (and speaking) is an ingrained habit, so consistent and deliberate practicing of the vocal exercises is required to allow the muscles to learn new form and position. You can expect measurable improvement as long as you take this approach and practice consistently. The length of time it takes to improve a singing voice also depends on an individual's vocal goals. A singer training for an operatic or musical theater career will spend far more time perfecting their technique and building their voice than one who sings in a less vocally demanding style. Training a singing voice takes time, and there are no shortcuts to a great technique.

"Beginners is ultimately about more than learning. It's about the possibilities that reside in all of us." --Daniel H. Pink, New York Times best-selling author of When, Drive, and To Sell is Human The best-selling author of Traffic and You May Also Like gives us an inspirational journey into the transformative joys that come with starting something new, no matter your

age Why do so many of us stop learning new skills as adults? Are we afraid to fail? Have we forgotten the sheer pleasure of being a beginner? Or is it simply a fact that you can't teach an old dog new tricks? Inspired by his young daughter's insatiable need to know how to do almost everything, and stymied by his own rut of mid-career competence, Tom Vanderbilt begins a year of learning purely for the sake of learning. He tackles five main skills (and picks up a few more along the way), choosing them for their difficulty to master and their distinct lack of career marketability--chess, singing, surfing, drawing, and juggling. What he doesn't expect is finding himself having rapturous experiences singing Spice Girls songs in an amateur choir, losing games of chess to eight-year-olds, and dodging scorpions at a surf camp in Costa Rica. Along the way, he interviews dozens of experts to explore the fascinating psychology and science behind the benefits of becoming an adult beginner. Weaving comprehensive research and surprising insight gained from his year of learning dangerously, Vanderbilt shows how anyone can begin again--and, more important, why they should take those first awkward steps. Ultimately, he shares how a refreshed sense of curiosity opened him up to a profound happiness and a deeper connection to the people around him--and how small acts of reinvention, at any age, can make life seem magical.

Every experience of life holds potential for learning spiritual and moral lessons. This book looks at four areas of creative expression - stories, songs, poems, and plays - and discovers Life Lessons with spiritual and moral significance. As a Christian minister, retired university professor, lover of music, community theater actor and director, writer and editor, the author says he finds theological relevance in these four arts areas. Some contain strong, direct expressions of Christian faith, others are less direct, and still others have no obvious connection with God or things religious. Even so, he has learned from each story, song, poem, and play and offers a Life Lesson from each. Stories include *The Shack* and *The Adventures of Huckleberry Finn*. Songs include Eric Clapton's "Tears in Heaven" and "We Shall Overcome." Poems include works by William Cullen Bryant, John Milton, John Keats, and Rudyard Kipling. Theater offerings include Broadway musicals, *Fiddler on the Roof* and *Cabaret*, and straight plays, *Inherit the Wind* and *Death of a Salesman*. Have you ever given consideration to what it would be like to be deaf? Not hearing a single sound. Sure, it's quiet in your house, but you still hear sounds. I would like to think the sensation would be equitable to being underwater, but that would not be a true statement. You can still hear things while being underwater: Waves swishing and people talking above the water - yelling or laughing. Deafness is pure silence. When something big drops to the floor, I "feel" the thump it made. When my dogs bark, I can't hear them, but if they jump on my bed while I'm sleeping, I can feel they are present to wake me for a incoming visitor, burglar, tornado or other natural disaster. This book is a candid, and comical view about hearing loss, Meniere's Disease, vertigo, and the process of undergoing cochlear implant surgery. It also goes into

depression and coping mechanisms for all of the above. It is a MUST read for someone or anyone you know (possibly yourself, but you won't admit it), who may be suffering from hearing loss. Progressive hearing loss is subtle. The sounds we often take for granted you no longer hear. Pay attention to your surroundings next time you are outside. Can you still hear the birds?
