You can also find the book as a series of web pages with the same active links. About the author Steve McCrea gives a five-session course with tips about passing tests for college. His YouTube channel has some of the demonstrations for solving math and reading problems, and he gives tips and shortcuts for tackling the "problem solving." "Many of the math questions for the SAT and ACT are based on Geometry and Algebra," Steve points out. "Students often take the tests while doing homework from pre-calculus and trigonometry classes. No wonder many students are stumped. They are out of practice and they are working on Trig or Algebra 2 when the tests are asking for lower math skills. Another difficulty comes because the focus of many geometry classes is "finding the missing step in the proof" and "which theorem should we use?" Steve's tips help you increase your "processing speed" -- it's like upgrading your computer's chip. Some students find that they can get through to the end of the test and have time to check the problems that they skipped. The second part of his book answers the question, "Do you want a higher test score or do you want to get into a great college for you?" Pulling on his experience as a high school advisor, he shows you how to get free ebooks and set up a free website to highlight your achievements, skills and abilities. This is not your typical list of tips for getting a higher test score. This is a collection of procedures for finding free resources. Steve even offers you to get the book as a free download... go to TinyURL.com/SteveFreeTestPrepBook and get this book free. TinyURL.com/ShowYourWork1 (the free website) When preparing for a college interview, put yourself in the shoes of a college advisor. The college might need to go through tens of thousands of applications to select around 1000 students and make offers to them. The officer who looks at your application might have to review twenty or thirty applications that day. What can put you on the top of his "list of interesting applicants"? Are you well-rounded? Or are you "lumpy"? Are you focused in one or two areas that make you "spiky" and make you perhaps less rounded? What is your story? Look at the application. Does your application tell your story? Look at two portfolios of work TINYURL.com/AbelSite TINYURL.com/ExampleDP Ben Stanley shows almost every piece of school work that he completed at High Tech High. Abel Thon tells people "I want to be an occupational therapist" and shows a video of the place where he completed his internship. Which approach speaks to you? Ben's "everything" approach or Abel's "four page" approach? I prefer the four-page approach. Why not have both? Create a website to hold all of your work and then create a site that shows highlights. Make two portfolios. Here's my graduate portfolio Sites.google.com/site/eddsteve2011. I've got notes and essays from a dozen courses that I took as part of a graduate program at nova university.
