Burning with Desire Geoffrey Batchen,1999-03-15 In an 1828 letter to his partner, Nicéphore Niépce, Louis Daguerre wrote, I am burning with desire to see your experiments from nature. In this book, Geoffrey Batchen analyzes the desire to photograph as it emerged within the philosophical and scientific milieus that preceded the actual invention of photography. Recent accounts of photography's identity tend to divide between the postmodern view that all identity is determined by context and a formalist effort to define the fundamental characteristics of photography as a medium. Batchen critiques both approaches by way of a detailed discussion of photography's conception in the late eighteenth and early nineteenth centuries. He examines the output of the various nominees for first photographer, then incorporates this information into a mode of historical criticism informed by the work of Michel Foucault and Jacques Derrida. The result is a way of thinking about photography that persuasively accords with the medium's undeniable conceptual, political, and historical complexity.

**Each Wild Idea** Geoffrey Batchen,2002-02-22 Essays on photography and the medium's history and evolving identity. In *Each Wild Idea*, Geoffrey Batchen explores a wide range of photographic subjects, from the timing of the medium's invention to the various implications of cyberculture. Along the way, he reflects on contemporary art photography, the role of the vernacular in photography's history, and the Australianness of Australian photography. The essays all focus on a consideration of specific photographs—from a humble combination of baby photos and bronzed booties to a masterwork by Alfred Stieglitz. Although Batchen views each photograph within the context of broader social and political forces, he also engages its own distinctive formal attributes. In short, he sees photography as something that is simultaneously material and cultural. In an effort to evoke the lived experience of history, he frequently relies on sheer description as the mode of analysis, insisting that we look right at—rather than beyond—the photograph being discussed. A constant theme throughout the book is the question of photography's past, present, and future identity.

Cultures of Mass Tourism Pau Obrador Pons, Penny Travlou, Dr Mike Crang, 2012-11-28 With more than 230 million international tourists a year, the Mediterranean region is the largest tourist destination in the world. This book outlines that its economic importance is matched by its significance as a cultural and aesthetic phenomenon. Through a series of ethnographic insights into some of the key sites of mass Mediterranean tourism, it focuses on package tourists' experiences of the serial, banal and depthless spaces that are mushrooming along the coast and the enchantments, dissolutions and dreams that saturate them. Moving away from the notion of authentic places corrupted by mass tourism, the book shows how new forms and spaces are made and remade by the mobilities and performances of locals, workers and tourists. Finally, the book looks at the complex materialities of mass tourism and the many networks that make it possible.

**Tartessos and the Phoenicians in Iberia** Sebastián Celestino Pérez, Carolina López-Ruiz, 2016 This is the first book in English about the earliest historical civilization in the western Mediterranean, known as Tartessos. It combines the expertise of its two authors in archaeology, philology, and cultural history to present a comprehensive, coherent, theoretically up-to-date, and informative overview of the discovery, sources, and debates surrounding this puzzling culture of ancient Iberia and its complex hybrid identity vis-à-vis the western Phoenicians.

*Drawing and Painting in the Italian Renaissance Workshop* Carmen Bambach, 1999 In *Drawing and Painting in the Italian Renaissance Workshop*, Carmen Bambach reassesses the role of artists and their assistants in the creation of monumental painting. Analyzing representative wall paintings and the many drawings related to the various stages of their production, Bambach convincingly reconstructs the development of workshop practice and design theory in the early modern period. Her exhaustive analysis of archaeological and textual evidence provides a timely and much-needed reassessment of the working methods of artists in one of the most vital periods in the history of art.

**Sculpture** Rudolf Wittkower, 1991 With the aid of over 180 photographs, this book studies what unites and separates sculptors across the centuries. It looks at the masters of Archaic Greece, the Middle Ages, through the great names of Michelangelo, Cellini and Bernini to Rodin, Brancusi and Henry Moore. By studying their working methods and techniques, the author discloses their artistic ideas and convictions, thereby opening up new avenues of approach for the spectator.

**Iconography, Propaganda, and Legitimation** Allan Ellenius, 1998 Representations of political power play an important role in Western art history from the late Middle Ages up to modern times. This volume by leading experts is a wide-ranging survey of significant trends in the development of political imagery.

*The Akashic Experience* Ervin Laszlo, 2009-02-12 Firsthand testimonies by 20 leaders in culture and science of their interactions with the Akashic field • Provides important evidence for the authenticity of nonmaterial contact that human beings have with each other and with the cosmos • Demonstrates that the increasing frequency and intensity of these experiences is evidence of a widespread spiritual resurgence • Includes contributions by Alex Grey, Stanislav Grof, Stanley Krippner, Swami Kriyananda, Edgar Mitchell, and others Knowing or feeling that we are all connected to each other and to the cosmos by more than our eyes and ears is not a new notion but one as old as humanity. Traditional indigenous societies were fully aware of nonmaterial connections and incorporated them into their daily life. The modern world, however, continues to dismiss and even deny these intangible links--taking as real only that which is physically manifest or proved "scientifically." Consequently our mainstream culture is spiritually impoverished, and the world we live in has become disenchanting. In *The Akashic Experience*, 20 leading authorities in fields such as psychiatry, physics, philosophy, anthropology, natural healing, near death experience, and spirituality offer firsthand accounts of interactions with a cosmic memory field that can transmit information to people without having to go through the senses. Their experiences with the Akashic field are now validated and supported by evidence from cutting-edge sciences that shows that there is a cosmic memory field that contains all information--past, present, and future. The increasing frequency and intensity of these Akashic experiences are an integral part of a large-scale spiritual resurgence and evolution of human consciousness that is under way today.

*Philip II of Spain, Patron of the Arts* Rosemarie Mulcahy, 2004 The image of Philip II (1527-98) as stern and assiduous defender of his political inheritance and of the catholic faith is tempered and enriched by the image of patron and collector of art. During the forty-two years of his reign (1556-98) through widespread patronage and persistent guidance he transformed the arts in Spain, then largely provincial, into the international and modern. The building of the Escorial - known in its own time as the eighth wonder of the world - and other royal residences attracted artists and craftsmen to enter the royal service, among them Titian, Anthonis Mor, El Greco, Federico Zuccaro, Pompeo, Leoni and Alonso Sanchez Coello. Part of his collection was to form the basis of the Prado Museum when it was founded in the nineteenth century. Although Philip is recognized as one of the most important art patrons of the Renaissance little has been published in English on his remarkable achievement. This selection of essays by Rosemarie Mulcahy gives a sense of the variety of talent, both Spanish and foreign, that flourished under Philip II's patronage and provides fascinating insights into the king's artistic projects. The topics covered include: the function of religious art, court portraiture, art and diplomacy, art as propaganda, the use of

preparatory drawings. The volume contains 16 colour plates and over 100 black and white illustrations.

**Christ Versus Arizona** Camilo José Cela,2007 Christ versus Arizona turns on the events in 1881 that surrounded the shootout at the OK Corral, where Wyatt Earp, Doc Holliday, and Virgil and Morgan Earp fought the Clantons and the McLaurys. Set against a backdrop of an Arizona influenced by the Mexican Revolution and the westward expansion of the United States, the story is a bravura performance by the 1989 Nobel Prize-winning author. A monologue by the naive, unreliable, and uneducated Wendell L. Espana, the book weaves together hundreds of characters and a torrent of interconnected anecdotes, some true, some fabricated. Wendell s story is a document of the vast array of ills that welcomed the dawning of the twentieth century, ills that continue to shape our world in the new millennium.

*Speaking of Spain* Antonio Feros,2017-04-03 Momentous changes swept Spain in the fifteenth century. A royal marriage united Castile and Aragon, its two largest kingdoms. The last Muslim emirate on the Iberian Peninsula fell to Spanish Catholic armies. And conquests in the Americas were turning Spain into a great empire. Yet few in this period of flourishing Spanish power could define “Spain” concretely, or say with any confidence who were Spaniards and who were not. *Speaking of Spain* offers an analysis of the cultural and political forces that transformed Spain’s diverse peoples and polities into a unified nation. Antonio Feros traces evolving ideas of Spanish nationhood and Spanishness in the discourses of educated elites, who debated whether the union of Spain’s kingdoms created a single fatherland (patria) or whether Spain remained a dynastic monarchy comprised of separate nations. If a unified Spain was emerging, was it a pluralistic nation, or did “Spain” represent the imposition of the dominant Castilian culture over the rest? The presence of large communities of individuals with Muslim and Jewish ancestors and the colonization of the New World brought issues of race to the fore as well. A nascent civic concept of Spanish identity clashed with a racist understanding that Spaniards were necessarily of pure blood and “white,” unlike converted Jews and Muslims, Amerindians, and Africans. Gradually Spaniards settled the most intractable of these disputes. By the time the liberal Constitution of Cádiz (1812) was ratified, consensus held that almost all people born in Spain’s territories, whatever their ethnicity, were Spanish.

**The Flight of Icarus** ,1998-08 Exploring autobiographical texts written by European urban craftsmen from the 15th to the 18th centuries, this book studies memoirs, diaries, family chronicles, travel narratives, and other forms of personal writings from Spain, France, Italy, Germany, and England. In the process, it reveals the significance of written self-expression in early modern popular culture.
