When Judith discovers a dead body in the kiln of her pottery store, she's convinced it's the work of her ex-husband in an attempt to cause her trouble. After discussing the incident with members of her Scrabble Club, Judith soon learns that her ex may be off the hook, and that sticks and stones may break bones, but words can definitely get you killed. A short story.

The classic guide to tapping the practical benefits of an age-old book of wisdom--revised to captivate today's spiritual seekersBased on the revered Chinese philosophy with a 5,000-year-old tradition, the I Ching, or Book of Changes, is rich in revelations. An eminent expert on the powers of the subconscious, Dr. Joseph Murphy opens the guiding force of this ancient text to anyone with an appreciation of the possibilities. With the help of three coins--ordinary pennies will do-- readers will learn to apply their intuitive abilities to receive the I Ching's answers. With a practical outlook, this hands-on guide presents simple techniques for enlisting the I Ching's aid in everyday problem-solving and decision-making. Murphy explains the I Ching hexagram system, revealing its roots in human psychology and the principle of constant change. Demystifying obscure terms and symbols, the author leads the way to consulting the I Ching for clarity and guidance in times of confusion and crisis. By combining basic mathematical formulas with spiritual awareness, readers will realize the miracle-working potential of their own mind and connect with the I Ching's truths. As a result, they'll gain vital insights into questions about career, family, romance, financial security, and life goals. And they'll discover the wonder of genuine peace of mind. SECRETS OF THE I CHING, does not claim to predict the future. But it does provide the tools to mark any future with the promise of greater personal and spiritual fulfillment.

Digital electronics is a little more abstract than analog electronics, and trying to find a useful starter book can be tough. For those interested in learning digital electronics, with a practical approach, Beginning Digital Electronics Through Projects is for you. It is published in the same tradition as Beginning Analog Electronics Through Projects, Andrew Singmin's revision to the popular Beginning Electronics Through Projects. Beginning Digital Electronics Through Projects provides practical exercises, building techniques, and ideas for over thirty-five useful digital projects. Some digital logic knowledge is necessary, but the theory is limited to "need-to-know" information that will allow you to get started right away without complex math. Many components in this text are common to either analog or digital electronics, and beginners or hobbyists making

their start here will find an overview of commonly used components and their functions described in everyday terms. Each of the projects builds on the theory and component knowledge developed in earlier chapters, establishing progressively more ambitious goals. Step-by-step learning instructions help you determine the best ways of working with such projects as Schmitt Trigger Circuits, Versatile ICs, Digital Support Circuits, and much more. Two interesting wireless projects (an FM receiver and an FM transmitter) bring the final chapters of this book to a close. Provides a logical step by step project-based way to learn the basics of digital electronics Gives the reader hands-on learning experiences through building simple projects Explains circuit design, circuit testing, and how to design your own projects

All You Need is Luck is the very funny story of an ordinary couple who decided to take a chance and do something extraordinary which others only dream about. Sixteen years ago

Frank and Maria Nelson traded in excellent jobs, financial security, the safety net of family and friends, plus deep roots in their local community, for a nomadic lifestyle few people ever experience. All You Need is Luck recounts their first two years on the road after saying goodbye to their home in New Zealand. During this time they lived and worked in Australia, England and the United States besides visiting Indonesia, France and Thailand. Leaving their comfort zone thousands of miles behind, they worked at American summer camps in Vermont and Cape Cod; at hospitals, a university and other jobs in Melbourne and Brisbane; and looked after scores of pampered pets in the poshest of homes all over England. This amusing adventure will appeal to anyone with a sense of humour but especially those who sometimes wonder what it would be like just to take off...and keep going.

A synthesis of research on earthenware technologies of the Late Archaic Period in the southeastern U.S. Information on social groups and boundaries, and on interaction between groups, burgeons when pottery appears on the social landscape of the Southeast in the Late

Archaic period (ca. 5000-3000 years ago). This volume provides a broad, comparative review of current data from "first potteries" of the Atlantic and Gulf coastal plains and in the lower Mississippi River Valley, and it presents research that expands our understanding of how pottery functioned in its earliest manifestations in this region. Included are discussions of Orange pottery in peninsular Florida, Stallings pottery in Georgia, Elliot's Point fiber-tempered pottery in the Florida panhandle, and the various pottery types found in excavations over the years at the Poverty Point site in northeastern Louisiana. The data and discussions demonstrate that there was much more interaction, and at an earlier date, than is often credited to Late Archaic societies. Indeed, extensive trade in pottery throughout the region occurs as early as 1500 B.C. These and other findings make this book indispensable to those involved in research into the origin and development of pottery in general and its unique history in the Southeast in particular.

Memoirs cover the life of an immigrant from his youth in Berlin, Germany, experiencing World War II to his later immigration to the United States and service in the US Army and Special Forces, the Green Berets. The book covers his experiences as a member of the "Jungvolk" and Hitler Youth during Air Raids

in Berlin, evacuation of the family without a father to the East, life on a Trek from the Polish border back to Berlin and combat against the Russian Army. Following the loss of WWII it describes life under Soviet Occupation, bare survival and later flight to freedom from East Germany to West Germany. Reaching the American Sector in West Germany and processing through a refugee camp, his family was reunited with their father a former member of the German Air Force, who had been a POW. Having lost all of their personal belongings as a result of the war, the author was obligated to leave school to support the family. Unable to find adequate employment he eventually joined a para-military US Army unit, which later on gave him the opportunity to emigrate to the United States. Once in the States, he saw the opportunities the military offered to "Be all you can be", as the Army once promised in their recruiting efforts. He joined the Army and following his enlisted career advanced through his determination to become a commissioned officer, qualifying himself through extraordinary training in the field of Ranger, Airborne, Jungle Warfare and finally the US Army Special Forces, the so-called Green Berets. He had the opportunity to serve several tours in Germany, as well as tours in the Republic of South Vietnam during 1967-1968 and the Republic of Korea. Following a 20-year career in the military, the decorated combat veteran retired at Fort Bragg, NC and finally moved with his wife and two children to Hagerstown, MD.
