

Allombra Dellillimani

Come ogni anno in agosto Roma si spopola e Serena segue i genitori alla casa di campagna. La località sembra essersi fatta troppo stretta per lei e affiora tutto il suo malcontento. Poi qualcosa succede, fa amicizia con degli anziani in vacanza e due mondi si incontrano. Il collante è l'affascinante racconto di un anziano reduce di guerra che porta tutti a riflettere e vivere sentimenti forti e coinvolgenti al punto da rielaborare problemi irrisolti e trovare la serenità.

Historic-archaeological Thriller A secret hidden for centuries, places soaked with magic, a tormented love story, an occult sect: these are the ingredients of a novel where history and irony, archaeology and mystery are mixed to create a captivating story. A fascinating trip throughout space and time, from ancient romans to medieval crusades, from the byzantine empire to the Renaissance House of Medici, until today. Tarsus (Turkey), 8 July 2010. A university professor finds in his excavations what many looked for in vain: the tomb of Julian the Apostate, the philosophe emperor. But the sepulchre is empty and right after the discovery the archaeologist is found dead. Has he been murdered? Who stole Julian's mortal remains? Where is the famous treasure that was buried with the roman emperor? That's from here that the adventure starts for Francesco Speri, a bank employee passionate about history, who, with the help of his beloved Chiara, investigates among ancient sites and ciphered codes. The intrigue gets thicker when a neo-pagan organisation will try in any way to stop the protagonist, who is willing to go on with his researches of the professor and the

Apostate at all costs...

L'estate di SerenaPragmata

Neo Tokyo, California is a city built so high that none of its residents have ever seen the ground. It is a place where citizens cosmetically alter their bodies to look like Japanese anime characters. It is a place where ninja battles determine the fate of corporate business ventures. It is the home of Basu-- a 700 pound killing machine who uses his grotesque excess weight as a deadly weapon.

WildFly is the most popular open-source Java application server. This book is an in-depth guide to the administration and management of the of the application server, covering all of the latest architectural and management changes such as:

- How to achieve High Availability of your WildFly cluster
- How to configure the newest subsystems (agroal, mp subsystems)
- Delivering advanced and leak-proof Datasource configuration
- Provisioning custom Server distributions with Galleon tool.
- Using the Undertow Web server as front-end for mod_cluster and as Reverse Proxy Server
- Migrating your older legacy configurations to WildFly newer subsystems
- Securing the application server with Elytron Framework
- Configuring a robust JMS cluster with Apache Artemis MQ
- Running WildFly in the cloud with Openshift and CRC
- Configuring Eclipse Micro Profiles and much more, with improved online examples!
