How to live with difference—not necessarily in peace, but with resilience, engagement, and a lack of vitriol—is a defining worry in America at this moment. The poets, fiction writers, and essayists (plus one graphic novelist) who contributed to *Welcome to the Neighborhood* don't necessarily offer roadmaps to harmonious neighboring. Some of their narrators don't even want to be neighbors. Maybe they grieve, or rage. Maybe they briefly find resolution or community. But they do approach the question of what it means to be neighbors, and how we should do it, with open minds and nuance. The many diverse contributors give this collection a depth beyond easy answers. Their attentions to the theme of neighborliness as an ongoing evolution offer hope to readers: possible pathways for rediscovering community, even just by way of a shared wish for it. The result is an enormously rich resource for the classroom and for anyone interested in reflecting on what it means to be American today, and how place and community play a part. Contributors include Leila Chatti, Rita Dove, Jonathan Escoffery, Rebecca Morgan Frank, Amina Gautier, Ross Gay, Mark Halliday, Joy Harjo, Edward Hirsch, Marie Howe, Sonya Larson, Dinty W. Moore, Robert Pinsky, Christine Schutt, and many more.

This is the perfect book for an intellectually bored individual. In it, the author shares a serendipitous collection of his thoughts on a wide variety of conventional and unconventional topics. Professor Eisenberg has spent the past six decades challenging his students to think outside the proverbial box. Whenever he would ask them a question, and they answered, I dont know, he would say, I know that you dont know, but what do you think? Using this Socratic Method opened their minds and encouraged them to take risks. Convinced that a good question outweighs a hundred trite answers, the author has included a section of the book in which he asks himself a question and then proceeds to answer it. His favorite question is, What one word best describes your life? His answer was, Creative. The reader should come away from this book with a deeper understanding of why he chose the title, Welcome to my mind. He enthusiastically agrees with the following quotation. Whatever we possess becomes double value when we have the opportunity of sharing it with others. Jean-Nicholas Bouilly (1763-1842)

This book is an in-dept analysis of the letter/sound correspondence of USA English. It combines two databases, one from the Times of London which counts the frequency of words in the newspaper, and the other from the truespel database of phonetic spelling of USA English. Together they combine to count letter and sound correspondence for frequency analysis. Each of the 26 letters of the alphabet is examined and lists are made of a letters most frequent position in words, top ten words containing the letter, and sounds spelled by the letter. Each of the 40 sounds are analyzed similarly. The analysis represents once and for all how the sounds of USA English are spelled as spoken (spoken word dialog being the same as newspaper text) and how often and in what way the letters of the alphabet portray those sounds.

What happened to the culture of common law and English barristers in the long eighteenth century? In this wide-ranging sequel to *Gentlemen and Barristers: The Inns of Court and the English Bar, 1680-1730*, David Lemmings not only anatomizes the barristers and their world; he also explores the popular reputation and self-image of the law and lawyers in the context of declining popular participation in litigation, increased parliamentary legislation, and the growth of the imperial state. He shows how the bar survived and prospered in a century of low recruitment and declining work, but failed to fulfil the expectations of an age of Enlightenment and Reform. By contrast with the important role played by the common law, and lawyers, in seventeenth-century England and in colonial America, it appears that the culture and services of the barristers became marginalized as the courts concentrated on elite clients, and parliament became the primary point of contact between government and population. In his conclusion the author suggests that the failure of the bar and the judiciary to follow Blackstones mid-century recommendations for reforming legal culture and delivering the Englishmans birthrights significantly assisted the growth of parliamentary absolutism in government.

How colleges and universities can live up to their ideals of diversity, and why inclusivity and excellence go hand in hand. Most colleges and universities embrace the ideals of diversity and inclusion, but many fall short, especially in the hiring, retention, and advancement of faculty who would more fully represent our diverse world—in particular women and people of color. In this book, Abigail Stewart and Virginia Valian argue that diversity and excellence go hand in hand and provide guidance for achieving both. Stewart and Valian, themselves senior academics, support their argument with comprehensive data from a range of disciplines. They show why merit is often overlooked; they offer statistics and examples of individual experiences of exclusion, such as being left out of crucial meetings; and they outline institutional practices that keep exclusion invisible, including reliance on proxies for excellence, such as prestige, that disadvantage outstanding candidates who are not members of the white male majority. Perhaps most important, Stewart and Valian provide practical advice for overcoming obstacles to inclusion. This advice is based on their experiences at their own universities, their consultations with faculty and administrators at many other institutions, and data on institutional change. Stewart and Valian offer recommendations for changing structures and practices so that people become successful in ways that benefit everyone. They describe better ways of searching for job candidates; evaluating

candidates for hiring, tenure, and promotion; helping faculty succeed; and broadening rewards and recognition.
