The English explorer Henry Hudson devoted his life to the search for a water route through America, becoming the first European to navigate the Hudson River in the process. In *Fatal Journey*, acclaimed historian and biographer Peter C. Mancall narrates Hudson's final expedition. In the winter of 1610, after navigating dangerous fields of icebergs near the northern tip of Labrador, Hudson's small ship became trapped in winter ice. Provisions grew scarce and tensions mounted amongst the crew. Within months, the men mutinied, forcing Hudson, his teenage son, and seven other men into a skiff, which they left floating in the Hudson Bay. A story of exploration, desperation, and icebound tragedy, *Fatal Journey* vividly

From a New York Times-bestselling historian comes the story of how the alphabet ordered our world. *A Place for Everything* is the first-ever history of alphabetization, from the Library of Alexandria to Wikipedia. The story of alphabetical order has been shaped by some of history's most compelling characters, such as industrious and enthusiastic early adopter Samuel Pepys and dedicated alphabet champion Denis Diderot. But though even George Washington was a proponent, many others stuck to older forms of classification -- Yale listed its students by their family's social status until 1886. And yet, while the order of the alphabet now rules -- libraries, phone books, reference books, even

Handwriting isn't just discovering the alphabet - fine motor skills, hand eye co-ordination and an interest in putting pen to paper are crucial as your child builds their handwriting skills. The final goal is for handwriting to become an instinctive skill, so your child can concentrate on what, and not how, they are writing. All children learn to write at a slightly unique pace, but as a general guide research indicates that handwriting skills expand in these stages: 1 year - Can scribble on paper. 2 years - Can make horizontal, circular, and vertical marks on paper. 3 years - Can copy horizontal, circular, and vertical lines. 4-5 years (Reception) - Can use a pencil and hold it effectively to form recognisable letters, most of which are correctly formed. 5-6 years (Year 1) - Can form lower case and capital letters. Can form digits 0 to 9. 6-7 years (Year 2) - Can use the strokes needed to join letters. Can write capital letters, lower case letters and digits that are all the correct size in relation to each other. 7-9 years (Years 3 and 4) - Can use the strokes needed to join letters. Increasing the legibility, consistency, and quality of their handwriting. 9 to 11 years (Years 5 and 6) - Can write legibly, fluently and with increasing speed. Whether it's perfecting the alphabet, fine tuning motor skills, or improving spelling proficiency, handwriting persists an essential element of early education. Use this handwriting workbook to practice printing and cursive, as well as
