In *Who Is the Dreamer Who Dreams the Dream? A Study of Psychic Presences*, James Grotstein integrates some of his most important work of recent years in addressing fundamental questions of human psychology and spirituality. He explores two quintessential and interrelated psychoanalytic problems: the nature of the unconscious mind and the meaning and inner structure of human subjectivity. To this end, he teases apart the complex, tangled threads that constitute self-experience, delineating psychic presences and mystifying dualities, subjects with varying perspectives and functions, and objects with different, often phantasmagoric properties. Whether he is expounding on the Unconscious as a range of dimensions understandable in terms of nonlinear concepts of chaos, complexity, and emergence theory; modifying the psychoanalytic concept of psychic determinism by joining it to the concept of autochthony; comparing Melanie Klein's notion of the archaic Oedipus complex with the ancient Greek myth of the labyrinth and the Minotaur; or examining the relationship between the stories of Oedipus and Christ, Grotstein emerges as an analyst whose clinical sensibility has been profoundly deepened by his scholarly use of mythology, classical thought, and contemporary philosophy. The result is both an important synthesis of major currents of contemporary psychoanalytic thought and a moving exploration of the nature of human suffering and spirituality.

Self-individualization has been interpreted as the process in which the all-embracing Self unfolds into an infinite variety of different individuals, plants, animals and men. A comparison of the different ways in which the Self manifests itself in the biological and psychological developmental processes, or in a visionary image of the undivided Self, reveals the same basic structure of expression. The Self, the one, is represented by a circular domain, and comprises a basic inner duality, the two, creating a paradox of conflicting opposites. In the undivided Self the two give rise to a trinity in which,

however, a quaternity is hidden. The latter expresses itself in this world as the four basic forces, the four Elements or the four main archetypes, specifying the possibilities or development in space and time. Self-individualization starts with the first appearance of a primary structure of an individual sub-Self. This is the fifth basic force, the fifth Element. Further development is characterized by four generative principles: 1st, the principle of wholeness: connection and integration (being oriented to remaining whole or restoring wholeness); 2nd, the principle of complementarity and compensation (a periodic shift between opposing influences); 3rd, the enstructuring principle (causing the relative stability of the spatial appearance of the manifest structure), and 4th, the principle of gesture (resulting in a gradual stepwise development of that structure into a full-grown individual).

When a former soldier and recluse murders two 17-year-old students at a posh Edinburgh boarding school, Inspector John Rebus immediately suspects there is more to the case than meets the eye.

Stephen G. Walker, Akan Malici, and Mark Schafer present a definitive, social-psychological approach to integrating theories of foreign policy analysis and international relations—addressing the agent-centered, micro-political study of decisions by leaders and the structure-oriented, macro-political study of state interactions as a complex adaptive system. The links between the internal world of beliefs and the external world of events provide the strategic setting in which states collide and leaders decide. The first part of this ground-breaking book establishes the theoretical framework of neobehavioral IR, setting the stage for the remainder of the work to apply the framework to pressing issues in world politics. Through these applications students can see how a game-theoretic logic can combine with the operational code research program to innovatively combine levels of analysis. The authors employ binary role theory to demonstrate that relying only on a state-systemic level or an individual-decision making level of analysis leads to an incomplete picture of how leaders steer their ships of state through the hazards of international crises to establish stable relations of cooperation or conflict.

The instant *Wall Street Journal*, *USA Today*, and international bestseller “While the history books are filled with tales of obsessive visionary geniuses who remade the world in their image with sheer, almost irrational force, I’ve found that history is also made by individuals who fought their egos at every turn, who eschewed the spotlight, and who put their higher goals above their desire for recognition.” —from the prologue Many of us insist the main impediment to a full, successful life is the outside world. In fact, the most common enemy lies within: our ego. Early in our careers, it impedes learning and the cultivation of talent. With success, it can blind us to our faults and sow future problems. In failure, it magnifies each blow and makes recovery more difficult. At every stage, ego holds us back. *Ego Is the Enemy* draws on a vast array of stories and examples, from literature to philosophy to history. We meet fascinating figures such as George Marshall, Jackie Robinson, Katharine Graham, Bill Belichick, and Eleanor Roosevelt, who all reached the highest levels of power and success by conquering their own egos. Their strategies and tactics can be ours as well. In an era that glorifies social media, reality TV, and other forms of shameless self-promotion, the battle against ego must be fought on many fronts. Armed with the lessons in this book, as Holiday writes, “you will be less invested in the story you tell about your own specialness, and as a result, you will be liberated to accomplish the world-changing work you’ve set out to achieve.”

A top performance expert reveals the secret behind many top athletes and executives: creating a heroic alter ego to activate when the chips are down. There’s only one person in the way of you untapping your potential: You. There’s also one person who can move you out of the way so you can perform at your peak. That person is already inside you. After twenty-one years of working with elite athletes, performers and leaders, Todd Herman has discovered how you can use your alter ego to achieve the seemingly impossible. It all clicked for Todd when he met Bo Jackson. When Herman met Bo Jackson, the professional athlete told him, “Bo Jackson never played a down of football in his entire life.” Bo explained that when he was young, he’d get into trouble because chaos caused by his anger issues. Then, he saw Friday the 13th and became fascinated by the cold, calculating nature of Jason Vorhees. In that moment, he resolved to stop being Bo Jackson, and start being Jason the moment he stepped on the field. In this transformative guide, Herman teaches you how to create and control an Alter Ego like Bo—and the thousands of other athletes, business leaders, entrepreneurs, and entertainers who have used this simple tool to change their lives. Herman also shares his own story: he knew that inside was a confident, self-assured, intelligent person who could help others get better results in their lives. When he started using superman’s classic trick—putting on a pair of glasses—he learned to trigger the specific traits he needed to achieve his goals. The Alter Ego Effect is not

about creating a false mask—it's about finding the hero already inside you. It's a proven way of overcoming the self-doubt, negativity, and insecurity that hold you back, and empowering you to ultimately become your best self.
